

Do Not Pay Medicaid Screening Service

analyzes your Medicaid client data allowing you
to prevent and recover improper payments

Identify deceased clients and cease Managed Care payments for ineligible clients

Identify any quality or integrity issues within your data such as duplicate or invalid SSNs

Continually screen clients at a frequency that suits your needs for timely case development

View clients prioritized by risk of death and urgency of adjudication

**ROBUST DEATH
SCREENING**

We will match your clients to our death data, including validation through state vital records.

We will provide a score of the confidence of death based on our trained algorithms.

**DATA QUALITY
AND INTEGRITY**

We will identify clients with suspicious Social Security Numbers.

We will identify instances in your data where multiple clients are using the same name, SSN, or other attribute.

**CUSTOM
FEATURES**

We continuously add new functionalities and can customize the results to meet your needs.

In the near future, we will be able to match your client list to other participating states' lists to identify improper overlap due to dual enrollment.

**Are you interested in finding out how the Medicaid Screening Service
can help you screen your clients?**
