Deliver

Welcome to the Financial Information Repository!

We’ve made some exciting enhancements and additions to our site to enhance your user experience. These changes are a part of our long-term vision, and improve our ability to offer business intelligence functionality and analytics for effective decision-making.

Our first enhancements provide several search options to improve user experience and navigation. Users now have the ability to navigate through the menu ribbon along the top of the screen or the various data categories along the left side of the page. Also, we improved the organization of information, simplified our menus, and made the reports and data more accessible.

We hope you enjoy browsing the enhanced FIR Private Portal. As always, user feedback is essential to the development and improvement of the site as we explore and identify future enhancements, so please contact us with your feedback.

</tbody>
</table>

1. **Verifier**
   - Vernon
   - I compare my agency’s data with Treasury’s records. We have our own accounting management system but I have to login to multiple data sources to ensure accuracy and compliance with Treasury of detailed data.

2. **Analyzer**
   - Angela
   - My manager gives me special initiatives with a short lifespan. I know the data is there to support it, but it’s difficult to get on-demand. I need ad-hoc reporting capabilities to better provide what is asked of me.

3. **Decision-Maker**
   - Dianne
   - I make data-driven decisions to help my business operate more efficiently. Having business intelligence capabilities helps inform these decisions.

4. **Advisor**
   - Austin
   - I help agencies achieve designated goals. Scorecards and business intelligence capabilities can provide a demonstration of progress when agencies apply my recommendations.
