4:05 PM to 4:15 PM	10-minute Break	10
4:15 PM to 5:30 PM	Innovation in the Federal Government	75

2020 JFMIP Webinar

Session Title	Session Description
Principals Roundtable / Scantlebury Award	The JFMIP Principals work in cooperation with each other and with operating agencies to improve and coordinate financial management policies and practices throughout the government. In this session, the Principals or their representatives will discuss with the audience important federal financial management topics. The panelists will consist of Gene Dodaro, Comptroller of the United States, Dave Lebryk, Fiscal Assistant Secretary of the Department of Treasury, and Mike Rigas, Acting Deputy Director of Management at the Office of Management and Budget and the Acting Director for the U.S. Office of Personal Management.
The CFO Act at 30 – Where We’ve Been, Where We’re Going	Passage of the Chief Financial Officers Act (CFO Act) of 1990 was a transformative event for federal financial management as it ushered in a then new era of accountability and transparency compelling the federal government to improve its financial reporting and systems infrastructure. Over the Act’s thirty-year existence, federal financial management has continued to evolve through and despite a wide range of landmark events, including Y2K, 9/11, the financial crisis, and the pandemic. Much has been accomplished over the past three decades, but there is still much left to do. Another new era marked by innovations in data, technology, and a service-based marketplace is charting a new course for federal financial management. In this session, experts from Treasury, GAO, and the CFO community will discuss the successes of the past and how they can be leveraged and integrated with innovations of the present to take federal financial management into the future.
Evolving and Adapting the Federal Workforce	The world around us is constantly evolving. Technological advances are changing the way that governments and the world approach day to day life and conduct business. The recent pandemic has highlighted the importance of living and working remotely and nimbly. The federal workforce must be able to quickly adapt and learn new skills in order to fully leverage the opportunities and face the challenges that our rapidly changing world presents. This session will feature leaders from across the federal government to explore initiatives that are underway to prepare the federal workforce for this exciting and challenging time.
Innovation in the Federal Government	This interactive session will explore how advanced technologies such as AI, data analytics, and distributed ledger/blockchain deployed today across the federal government are transforming the future of federal financial management and the accountability community in general. We hope you can join us for this informative discussion, moderated by GAO’s Chief Scientist, with GAO’s Chief Data Scientist and technology financial leaders from several federal agencies.
