- APPENDIX A LINKS TO FIT BUSINESS USE CASE LIBRARY DOCUMENTS .................................................................................................................20
PURPOSE
Treasury’s Office of Financial Innovation and Transformation (FIT) is the Line of Business (LoB) Managing Partner for the Federal Financial Management (FFM) service area. FIT has developed a library of FFM Business Use Cases which reflect the business needs of the financial management community. The library consists of the Federal Financial Management Business Use Case Library Overview, that provides the framework for understanding and using the business use cases, and a series of documents containing the business use cases organized within end-to-end business processes. A list of the available documents can be found in Appendix A.

This document contains the FFM business use cases associated with the Request-to-Procure Business Process and should be used in conjunction with the Federal Financial Management Business Use Case Library Overview.

BUSINESS USE CASE STRUCTURE
The sections of the FFM business use cases are described below.

Business Use Case Identifier: includes information about the key underlying components. The notation for a business use case identifier is shown below.

Business Scenario(s) Covered: identifies differing situations or conditions that occur when executing an end-to-end business process and reflect the scope and complexity of federal government agency missions.

Business Actor(s): identifies the typical offices or roles performing events in the business use case.

Synopsis: provides a summary of the events that take place within the business use case.

Assumptions and Dependencies: includes context information about events that have occurred prior to the first event identified in the business use case or outside of the business use case and dependencies on events accomplished in other business use cases. There are several common assumptions that are established for all business use cases. Additional assumptions or dependencies are included if needed for the specific business use case.
**FFMSR ID Reference(s):** includes a list of the Federal Financial Management System Requirements (FFMSR) that apply for the business use case.

**Initiating Event:** identifies the event that triggers the initiation of the business use case.

**Typical Flow of Events:** includes the Federal Financial Management (FFM) and non-FFM events that may occur to complete the business scenario(s) included in the business use case. The non-FFM events are provided for business context. Also included are the inputs and outputs or outcomes that one would expect to occur during or as a result of the event.
REQUEST-TO-PROCURE BUSINESS USE CASES

**030.FFM.L1.01 Procurement Within a Single Fiscal Year**

**End-to-End Business Process:** 030 Request-to-Procure

**Business Scenario(s) Covered**
- Single Year Funds

**Business Actor(s)**
Procurement Office; Finance Office; Vendor

**Synopsis**
A request for the purchase of goods (e.g., non-leased office equipment) is submitted using funds that expire at the end of the current fiscal year. An order or award is prepared and sent to a vendor.

**Assumptions and Dependencies**

1. There may or may not be automated (near/real-time or batch) interfaces between service areas/functions/activities or between provider solutions/systems.
2. There is no presumption as to which activities are executed by which actor, or which activities are automated, semi-automated, or manual.
3. Supporting information for general ledger transactions includes sub-ledger entries when sub-ledgers are used.
4. Appropriate attributes (e.g., object class and project) are included as part of the accounting string.
5. Relationships between use cases are described in the Framework for Federal Financial Management Use Cases found in the related overview document.
6. All predecessor activities required to trigger the Initiating Event have been completed.
7. Funds availability checks are performed against appropriations/fund accounts for obligating funds, and against obligations for disbursing funds in accordance with OMB A-11, Section 150.2.
8. There is sufficient and appropriate time to complete, receive and pay for the purchase of goods.
9. There are sufficient funds to make the purchase.
10. The Agency has purchased from the vendor before and the vendor has already been set up in the FM system.
11. The purchase is made from an approved acquisition schedule.
12. The agency is using commitment accounting.
13. The procurement request includes all necessary information for completing funds control checks.
14. The amount of the approved order or award is the same as the committed amount.

**FFMSR ID Reference(s)**
1.1.2; 2.1.2; 2.2.1

**Initiating Event**
The federal agency office requests office furniture.

030.FFM.L1.02 Procurement During Continuing Resolution

**End-to-End Business Process:** 030 Request-to-Procure

**Business Scenario(s) Covered**
- Procurement During a Continuing Resolution on Procurement

**Business Actor(s)**
- Procurement Office; Finance Office; Vendor, Program Office

**Synopsis**
A request for the purchase of services (e.g., continuation of IT security services for critical financial systems) is submitted during a Continuing Resolution (CR-1). The order (e.g., purchase order, task order, and delivery order) or award is issued as subject to availability of funds and only funds allocated in CR-1 are obligated. CR-1 ends without an approved budget and a second CR (CR-2) is issued. The order or award is modified and the obligated funds are increased by those authorized by CR-2 less the amount previously obligated in CR-1. An approved budget is issued at the end of CR-2. The order or award is modified and funds obligated are increased by those authorized for the fiscal year less the amount previously obligated in CR-1 and CR-2. Funds availability checks are performed to ensure obligated amounts do not exceed the amounts authorized by CR-1, CR-2, or the budget year during each period respectively.

**Assumptions and Dependencies**
1. There may or may not be automated (near/real-time or batch) interfaces between service areas/functions/activities or between provider solutions/systems.
2. There is no presumption as to which activities are executed by which actor, or which activities are automated, semi-automated, or manual.
3. Supporting information for general ledger transactions includes sub-ledger entries when sub-ledgers are used.
4. Appropriate attributes (e.g., object class and project) are included as part of the accounting string.
5. Relationships between use cases are described in the Framework for Federal Financial Management Use Cases found in the related overview document.
6. All predecessor activities required to trigger the Initiating Event have been completed.
7. Funds availability checks are performed against appropriations/fund accounts for obligating funds, and against obligations for disbursing funds in accordance with OMB A-11, Section 150.2.
8. There are two CRs and funding is limited to the amount made available under the CRs.
9. No “no-year” funding is available.
10. During the CRs, no new programs are started.
11. The order or award is for continuation of a program initiated in a prior fiscal year.
12. When the final budget is approved, there are sufficient funds to cover obligations incurred during the CRs.
13. The Agency has purchased from the vendor before and the vendor has already been set up in the FM system.
14. The purchase request includes all necessary information for completing funds control checks during and subsequent to CR-1 and CR-2.

**FFMSR ID Reference(s)** 1.1.2; 2.1.2; 2.2.1

**Initiating Event**
During CR-1, a request is received to issue a PO to continue services.

## 030.FFM.L2.01 Procurement Across Fiscal Years Using Multi-Year Funds

### End-to-End Business Process: 030 Request-to-Produce

### Business Scenario(s) Covered
- Multi-Year Funds
- Multiple Funding Sources
- Multiple Vendors on a Procurement request

### Business Actor(s)
- Procurement Office
- Finance Office
- Federal Agencies
- Vendors

### Synopsis
A procurement request for development of a complex project is prepared for a federal program with two funding sources. The project is expected to take two years to complete and to require multi-year funds. To help meet local small business development goals, multiple orders or awards from the one procurement request are issued.

### Assumptions and Dependencies
1. There may or may not be automated (near/real-time or batch) interfaces between service areas/functions/activities or between provider solutions/systems.
2. There is no presumption as to which activities are executed by which actor, or which activities are automated, semi-automated, or manual.
3. Supporting information for general ledger transactions includes sub-ledger entries when sub-ledgers are used.
4. Appropriate attributes (e.g., object class and project) are included as part of the accounting string.
5. Relationships between use cases are described in the Framework for Federal Financial Management Use Cases found in the related overview document.
6. All predecessor activities required to trigger the Initiating Event have been completed.
7. Funds availability checks are performed against appropriations/fund accounts for obligating funds, and against obligations for disbursing funds in accordance with OMB A-11, Section 150.2.
8. There are sufficient funds to make the purchase.
9. The agency is using commitment accounting.
10. The agencies have completed proper acquisition planning steps including the cost estimate.
11. The agencies have obtained the appropriate internal management approvals.
12. The vendors are properly registered in government systems and the relevant payee information has been set up in the FM system.

### FFMSR ID Reference(s)
- 1.1.2; 2.1.2; 2.2.1

030.FFM.L2.02 Single Award from Multiple Procurement Requests

**End-to-End Business Process:** 030 Request-to-Procure

**Business Scenario(s) Covered**
- Single Award from Multiple Procurement Requests

**Business Actor(s)**
- Procurement Office; Finance Office; Federal Agency Requestors; Vendor

**Synopsis**
Procurement requests from two offices (Requestors) within a federal agency are submitted to the Procurement Office. Both requests are for the same item. The procurement requests are combined when a single order or award is issued to a Vendor to fulfill both procurement requests.

**Assumptions and Dependencies**

1. There may or may not be automated (near/real-time or batch) interfaces between service areas/functions/activities or between provider solutions/systems.
2. There is no presumption as to which activities are executed by which actor, or which activities are automated, semi-automated, or manual.
3. Supporting information for general ledger transactions includes sub-ledger entries when sub-ledgers are used.
4. Appropriate attributes (e.g., object class and project) are included as part of the accounting string.
5. Relationships between use cases are described in the Framework for Federal Financial Management Use Cases found in the related overview document.
6. All predecessor activities required to trigger the Initiating Event have been completed.
7. Funds availability checks are performed against appropriations/fund accounts for obligating funds, and against obligations for disbursing funds in accordance with OMB A-11, Section 150.2.
8. There are sufficient funds to make the purchase.
9. The Requestors have obtained the appropriate management approvals.
10. Each Requestor has submitted a procurement request which was approved and an associated commitment for each procurement request has already been established in the FM system.
11. The Agency has purchased from the vendor before and the vendor has already been set up in the FM system.
12. The purchase is made from an approved acquisition schedule.
13. The Agency is using commitment accounting.

**FFMSR ID Reference(s)**
1.1.2; 2.1.2; 2.2.1

**Initiating Event**
Two approved procurement requests are determined to be requesting the same item.
