APPENDIX A LINKS TO FIT BUSINESS USE CASE LIBRARY DOCUMENTS ................................................................................. 11
PURPOSE
Treasury’s Office of Financial Innovation and Transformation (FIT) is the Line of Business (LoB) Managing Partner for the Federal Financial Management (FFM) service area. FIT has developed a library of FFM Business Use Cases which reflect the business needs of the financial management community. The library consists of the Federal Financial Management Business Use Case Library Overview, that provides the framework for understanding and using the business use cases, and a series of documents containing the business use cases organized within end-to-end business processes. A list of the available documents can be found in Appendix A.

This document contains the FFM business use cases associated with the Apply-to-Perform Business Process and should be used in conjunction with the Federal Financial Management Business Use Case Library Overview.

BUSINESS USE CASE STRUCTURE
The sections of the FFM business use cases are described below.

Business Use Case Identifier: includes information about the key underlying components. The notation for a business use case identifier is shown below.

**080. FFM. L1. 01**

Business Scenario(s) Covered: identifies differing situations or conditions that occur when executing an end-to-end business process and reflect the scope and complexity of federal government agency missions.

Business Actor(s): identifies the typical offices or roles performing events in the business use case.

Synopsis: provides a summary of the events that take place within the business use case.

Assumptions and Dependencies: includes context information about events that have occurred prior to the first event identified in the business use case or outside of the business use case and dependencies on events accomplished in other business use cases. There are several common assumptions that are established for all business use cases. Additional assumptions or dependencies are included if needed for the specific business use case.
**FFMSR ID Reference(s):** includes a list of the Federal Financial Management System Requirements (FFMSR) that apply for the business use case.

**Initiating Event:** identifies the event that triggers the initiation of the business use case.

**Typical Flow of Events:** includes the Federal Financial Management (FFM) and non-FFM events that may occur to complete the business scenario(s) included in the business use case. The non-FFM events are provided for business context. Also included are the inputs and outputs or outcomes that one would expect to occur during or as a result of the event.
**APPLY-TO-PERFORM BUSINESS USE CASES**

</table>

**End-to-End Business Process:** 080 Apply-to-Perform

**Business Scenario(s) Covered**
- Accruals for Grants
- Grant Disbursement Offsets

**Business Actor(s)**
Program Office; Finance Office; Award Recipient

**Synopsis**
A discretionary award (i.e., grant) is issued by a federal agency to the Award Recipient. The Award Recipient was overpaid for a previous award from the same grant program. The award is a significant percentage of the program budget. The Award Recipient's progress is monitored and financial and performance reports are received. The Award Recipient submits an invoice to request payment. Disbursement is made with a partial offset to recover the previous overpayment.

**Assumptions and Dependencies**
1. There may or may not be automated (near/real-time or batch) interfaces between service areas/functions/activities or between provider solutions/systems.
2. There is no presumption as to which activities are executed by which actor, or which activities are automated, semi-automated, or manual.
3. Supporting information for general ledger transactions includes sub-ledger entries when sub-ledgers are used.
4. Appropriate attributes (e.g., object class and project) are included as part of the accounting string.
5. Relationships between use cases are described in the Framework for Federal Financial Management Use Cases found in the related overview document.
6. All predecessor activities required to trigger the Initiating Event have been completed.
7. Funds availability checks are performed against appropriations/fund accounts for obligating funds, and against obligations for disbursing funds in accordance with OMB A-11, Section 150.2.
8. Funds have been committed for the grants program.
9. The agency has and uses a process for estimating accrual liability amounts.
10. The Award Recipient has had awards with the federal agency and is set up in the FM system.
11. Grant award transactions are provided to the FM system on a per award basis (i.e., not aggregated across awards).
12. The Award Recipient sends invoices to the program office and does not receive any payments in advance.
13. The overpayment from a previous grant was drawn from the same fund as the newly awarded grant and an associated receivable has been established.

## 080.FFM.L2.02 Administrative Grant Closeout

**End-to-End Business Process:** 080 Apply-to-Perform (Grants Management)

### Business Scenario(s) Covered

- Administrative Grant Closeout

### Business Actor(s)

- Program Office; Finance Office; Award Recipient

### Synopsis

An accrual liability for a previous grant award is established by a federal agency. An expected financial and performance report and invoice are not received by the agency. The Award Recipient is determined to be no longer operating and the award is administratively closed.

### Assumptions and Dependencies

1. There may or may not be automated (near/real-time or batch) interfaces between service areas/functions/activities or between provider solutions/systems.
2. There is no presumption as to which activities are executed by which actor, or which activities are automated, semi-automated, or manual.
3. Supporting information for general ledger transactions includes sub-ledger entries when sub-ledgers are used.
4. Appropriate attributes (e.g., object class and project) are included as part of the accounting string.
5. Relationships between use cases are described in the Framework for Federal Financial Management Use Cases found in the related overview document.
6. All predecessor activities required to trigger the Initiating Event have been completed.
7. Funds availability checks are performed against appropriations/fund accounts for obligating funds, and against obligations for disbursement funds in accordance with OMB A-11, Section 150.2.
8. No illegal activity occurred against the terms of the grant agreement.
9. The Award Recipient has been paid for all work that has been invoiced.
10. The Award Recipient has received no payments to which it was not entitled.
11. No commitments or obligations have been made for future fiscal years.

### FFMSR ID Reference(s)

1.1.2; 1.1.4; 2.2.1

### Initiating Event

Agency learns the Award Recipient is no longer operating.
## USE CASE 080.FFM.L2.02 ADMINISTRATIVE GRANT CLOSEOUT
