

FMCF Version 1.1 Release Notes

June 24, 2022

The FM QSMO has updated the Financial Management Capability Framework (FMCF) to enhance its useability. The updates and clarifications made to FMCF components as of Version 1.1 are summarized below.

- **5. Core FS Pre-Built Business Reports:**
 - Updated the description for the *Combined Schedule X* report to clarify that only *Schedule P* data is required to be produced from the Core FS Baseline Solution.
 - Included language on the *Report Principles and Assumptions* worksheet to clarify that Core FS Solution Providers may add additional fields.
 - **6. Core FS Pre-Built Business Information Exchanges (BIEs):**
 - Removed OTCnet and TCIS from the *Core FS Pre-Built BIE List* worksheet. BIEs are not required for these two systems in the Core FS Baseline Solution.
 - Clarified information about the incoming and outgoing CARS file references on the *Core FS Pre-Built BIE List* worksheet.
 - Updated grants payment BIE requirements on the *Core FS Pre-Built BIE List* worksheet to clarify that at least one is required. Treasury ASAP is preferred; however, HHS PMS is an acceptable alternative.
-
