

Federal Financial Management Business Use Case Library for Acquire-to-Dispose

June 24, 2022
Version 1.1

Final Government Review in Progress

This document contains proposed updates to the currently published [Financial Management \(FM\) Standards](#) and corresponding components of the [Federal Integrated Business Framework \(FIBF\)](#) that support capabilities defined for solutions and services in the FM QSMO Marketplace. Proposed updates are reflective of feedback provided by Federal agencies and industry which are currently being reviewed for approval. Once approved, updated/final versions will be published accordingly.

Appendix A: FFM Business Use Case Library Documents	61

Purpose

The Federal Financial Management (FFM) Business Use Case Library consists of an Overview and a series of documents containing the business use cases organized within end-to-end business processes. The **FFM Business Use Case Library Overview** provides the framework for understanding and applying the business use cases to agency financial operations. A list of the available documents in the FFM Business Use Case Library can be found in Appendix A.

This document contains the FFM Business Use Cases associated with the Acquire-to-Dispose Business Process and should be used in conjunction with the **FFM Business Use Case Library Overview**.

Business Use Case Structure

The sections of the FFM Business Use Cases are described below.

Business Use Case Identifier: includes information about the key underlying components. The notation for a business use case identifier is as shown.

Figure 1: The notation for a business use case identifier.

Business Scenario(s) Covered: identifies differing situations or conditions that occur when executing an end-to-end business process and reflect the scope and complexity of federal government agency missions.

Business Actor(s): identifies the typical offices or roles performing events in the business use case.

Synopsis: provides a summary of the events that take place within the business use case.

Assumptions and Dependencies: includes context information about events that have occurred prior to the first event identified in the business use case or outside of the business use case and dependencies on events accomplished in other business use cases. There are several common assumptions that are established for all business use cases. Additional assumptions or dependencies are included if needed for the specific business use case.

FFMSR ID Reference(s): includes a list of the Federal Financial Management Systems Requirements (FFMSR) that apply for the business use case.

Initiating Event: identifies the event that triggers the initiation of the business use case.

Typical Flow of Events: includes the Federal Financial Management (FFM) and non-FFM events that may occur to complete the business scenario(s) included in the business use case. The non-FFM events are provided for business context. Also included are the inputs and outputs or outcomes that one would expect to occur during or as a result of the event.

Acquire-to-Dispose Business Use Cases

020.FFM.L1.01 Property, Plant, and Equipment (PP&E) Assets	
End-to-End Business Process: 020 Acquire-to-Dispose	
Business Scenario(s) Covered	
<ul style="list-style-type: none"> Acquiring a PP&E Asset Leasing a PP&E Asset Depreciation of a PP&E Asset 	<ul style="list-style-type: none"> Disposing of a PP&E Asset Replacing an Asset
Business Actor(s)	
Finance Office; Property Management Office; Program Office	
Synopsis	
Physical control of new, purchased equipment with an expected 10-year life is acquired by a federal agency for a 20-year program. Additional costs are incurred to place the new equipment into service. After eight years, it is decided to dispose of the purchased equipment. A capital lease of equipment is implemented to replace the purchased equipment and the leased equipment is operated through the end of the program. Once the agency completes the capital lease of the replacement equipment, retirement and disposal activities for the replaced equipment are performed.	

020.FFM.L1.01 Property, Plant, and Equipment (PP&E) Assets

Assumptions and Dependencies

1. There may or may not be automated (near/real-time or batch) interfaces between functional areas/functions/activities or between provider solutions/systems.
2. There is no presumption as to which activities are executed by which actor, or which activities are automated, semi-automated, or manual.
3. Supporting information for general ledger transactions includes sub-ledger entries when sub-ledgers are used.
4. Appropriate attributes (e.g., object class and project) are included as part of the accounting string.
5. Relationships between use cases are described in the Framework for Federal Financial Management Use Cases found in the related overview document.
6. All predecessor activities required to trigger the Initiating Event have been completed.
7. Funds availability checks are performed against appropriations/fund accounts for obligating funds, and against obligations for disbursing funds in accordance with OMB A-11, Section 150.2
8. The acquired and leased equipment are procured in a previous Request-to-Procure business process.
9. The acquired and leased equipment are received, accepted and paid for in a previous Procure-to-Pay business process.
10. There is no increase in the value of the purchased equipment during its useful life.
11. The criteria for a capital lease are met.
12. All additional costs, including labor, have been identified, approved and expended.
13. The property record includes all information needed to determine depreciation, including cost, asset class and useful life.
14. The depreciation method is determined by the agency's Property Management function.
15. The determination of gains or losses incurred in the disposition of the purchased equipment is determined by the agency's Property Management function.

Business Scenario(s) Covered	
<ul style="list-style-type: none"> Bulk Purchases 	<ul style="list-style-type: none"> Transfers between Department Components
Business Actor(s)	
Department Warehousing Office; Finance Office; Property Management Office; Program Office	
Synopsis	
<p>A federal department uses a warehousing office to manage the acquisition and distribution of bulk purchases across programs. This warehousing office buys property in bulk (e.g., office equipment, emergency equipment) and then holds property for distribution until requested by programs. The warehousing office purchases one lot of property that is held in the warehouse for over a year before transferring it to a program office. The property value and depreciation schedule are recorded when the equipment is originally received. The property book value is periodically reduced to reflect the depreciation.</p>	

020.FFM.L1.02 Bulk Purchases

Assumptions and Dependencies

1. There may or may not be automated (near/real-time or batch) interfaces between functional areas/functions/activities or between provider solutions/systems.
2. There is no presumption as to which activities are executed by which actor, or which activities are automated, semi-automated, or manual.
3. Supporting information for general ledger transactions includes sub-ledger entries when sub-ledgers are used.
4. Appropriate attributes (e.g., object class and project) are included as part of the accounting string.
5. Relationships between use cases are described in the Framework for Federal Financial Management Use Cases found in the related overview document.
6. All predecessor activities required to trigger the Initiating Event have been completed.
7. Funds availability checks are performed against appropriations/fund accounts for obligating funds, and against obligations for disbursing funds in accordance with OMB A-11, Section 150.2.
8. The property was acquired in a previous Request-to-Procure business process.
9. The property was received, accepted and paid for in a previous Procure-to-Pay business process.
10. The expense of operating the warehouse is not associated with the property transferred to the program office.
11. The property information includes Federal Supply Code and salvage value.
12. The property purchased requires depreciation.
13. The property record includes all information needed to determine depreciation, including cost, asset class, useful life and depreciation method
14. The determination of depreciation is a Property Management function and will be shown as a non-FFM Event regardless of the office or process used in its determination.
15. The Program office uses the same FM system as the Department.
16. Depreciation expense is incurred by the office with custodial responsibility.

020.FFM.L1.03 Bulk Purchase Immediately Distributed

End-to-End Business Process: 020 Acquire-to-Dispose

Business Scenario(s) Covered

- Bulk Purchase Immediately Distributed

Business Actor(s)

Property Management Office; Finance Office; Information Technology (IT) Office; Program Offices

Synopsis

A bulk purchase of desktop Commercial Off the Shelf (COTS) software is received. All the software is immediately distributed to Program Offices, and the property record is established with the Program Offices as custodians with their locations. The expense of the software is distributed to the Program Offices.

Assumptions and Dependencies

1. There may or may not be automated (near/real-time or batch) interfaces between functional areas/functions/activities or between provider solutions/systems.
2. There is no presumption as to which activities are executed by which actor, or which activities are automated, semi-automated, or manual.
3. Supporting information for general ledger transactions includes sub-ledger entries when sub-ledgers are used.
4. Appropriate attributes (e.g., object class and project) are included as part of the accounting string.
5. Relationships between use cases are described in the Framework for Federal Financial Management Use Cases found in the related overview document.
6. All predecessor activities required to trigger the Initiating Event have been completed.
7. Funds availability checks are performed against appropriations/fund accounts for obligating funds, and against obligations for disbursing funds in accordance with OMB A-11, Section 150.2.
8. The property was acquired by the IT Office in a previous Request-to-Procure business process.
9. The software and licenses were received, recorded in the property management system and distributed.
10. PP&E has a useful life exceeding two years and is recorded and tracked in the property management system.
11. The total cost of the bulk purchase does not meet the agency threshold for capitalization.
12. Cost allocation by location is unavailable for direct charging at time of acquisition, requiring post acquisition cost distribution process.

020.FFM.L2.01 Complex Systems

End-to-End Business Process: 020 Acquire-to-Dispose

Business Scenario(s) Covered

- Complex Systems
- Work in Progress
- General PP&E
- Internal Use Software
- Increase Life and Value of Asset
- Enhancing an Asset

Business Actor(s)

Office of the CIO; Finance Office; Property Management Office

Synopsis

A federal Agency is developing a complex system (including hardware and internal use software) that is expected to take two years to build. After the complex system is put into operation the hardware is upgraded to extend its life expectancy.

Assumptions and Dependencies

020.FFM.L2.01 Complex Systems

1. There may or may not be automated (near/real-time or batch) interfaces between functional areas/functions/activities or between provider solutions/systems.
2. There is no presumption as to which activities are executed by which actor, or which activities are automated, semi-automated, or manual.
3. Supporting information for general ledger transactions includes sub-ledger entries when sub-ledgers are used.
4. Appropriate attributes (e.g., object class and project) are included as part of the accounting string.
5. Relationships between use cases are described in the Framework for Federal Financial Management Use Cases found in the related overview document.
6. All predecessor activities required to trigger the Initiating Event have been completed.
7. Funds availability checks are performed against appropriations/fund accounts for obligating funds, and against obligations for disbursing funds in accordance with OMB A-11, Section 150.2.
8. The complex system is being developed by agency in-house personnel for internal use.
9. The expected life of a hardware component purchased in year one is five years.
10. The hardware was procured in a previous Request-to-Procure business process.
11. The hardware was received, accepted and paid for in a previous Procure-to-Pay business process.
12. The base software used in the development of the complex system was procured in a previous Request-to-Procure business process.
13. The base software was received, accepted and paid for in a previous Procure-to-Pay business process.
14. The hardware depreciation schedule begins when the hardware is accepted.
15. The complex system software depreciation schedule begins when the system is placed into operation.
16. The property information includes property salvage value.
17. When the hardware is upgraded, no original components are removed or retired.
18. The property record includes all information needed to determine depreciation, including cost, asset class, useful life, and depreciation method.
19. The determination of depreciation is a Property Management function.
20. The software property record, where available, includes the information needed to determine the value of work in progress.
21. The value of the software work in progress is determined by the agency's Property Management function.
22. In accordance with FITARA, all information technology spending is coordinated with the Chief Information Officer.

FFMSR ID Reference(s)	1.1.2; 1.1.3

020.FFM.L2.02 Leasehold Improvements

End-to-End Business Process: 020 Acquire-to-Dispose

Business Scenario(s) Covered

- Leasehold Improvement

Business Actor(s)

Property Management Office; Finance Office; Private Entity Lessor (PEL)

Synopsis

A property owned by a PEL has been leased by a government agency for a five-year term. After occupying the property, leasehold improvements are made and paid for by the agency. The leasehold improvements are determined to have a useful life of ten years, but are amortized based on the remaining lease period (4 years). The lease is ended as agreed at the end of the lease period, and the leasehold improvements revert to the PEL.

020.FFM.L2.02 Leasehold Improvements

Assumptions and Dependencies

1. There may or may not be automated (near/real-time or batch) interfaces between functional areas/functions/activities or between provider solutions/systems.
2. There is no presumption as to which activities are executed by which actor, or which activities are automated, semi-automated, or manual.
3. Supporting information for general ledger transactions includes sub-ledger entries when sub-ledgers are used.
4. Appropriate attributes (e.g., object class and project) are included as part of the accounting string.
5. Relationships between use cases are described in the Framework for Federal Financial Management Use Cases found in the related overview document.
6. All predecessor activities required to trigger the Initiating Event have been completed.
7. Funds availability checks are performed against appropriations/fund accounts for obligating funds, and against obligations for disbursing funds in accordance with OMB A-11, Section 150.2.
8. The lease contract required to lease the property has been executed under previous Request-to-Procure and Procure-to-Pay processes.
9. Monthly disbursements related to the lease are made under the separate Procure-to-Pay process.
10. A property record has already been established for the leased property.
11. The leasehold improvements to be made have been identified, and the vendor has been selected through a previous Request-to-Procure process.
12. An order or award has been issued for the leasehold improvements in a previous Request-to-Procure process.
13. The leasehold improvements exceed the capitalization threshold and are completed by the end of the first year of the lease.
14. The vendor performing leasehold improvements has been properly registered in government systems, the relevant payee information has been set up in the FM system, and the invoice is submitted electronically.
15. Tolerance percentages or amounts between obligation and commitment amounts and between expenditure and obligation amounts have been established.

020.FFM.L3.01 Real Property: Stewardship Land, Heritage Assets, Construction, and Impairment	
End-to-End Business Process: 020 Acquire-to-Dispose	
Business Scenario(s) Covered	
<ul style="list-style-type: none"> • Heritage Assets • Stewardship Land • Construction in Progress • Capitalization of Labor Costs 	<ul style="list-style-type: none"> • Environmental Hazardous Substances on/in Property • Impairment • Construction in Abeyance
Business Actor(s)	
Property Management Office; Finance Office; Procurement Office	
Synopsis	
<p>Approval to construct an additional structure (e.g., gift shop) on stewardship land containing a heritage asset is received. Site preparation costs for the additional structure are included as costs for the stewardship land. The cost of construction is capitalized as work progresses and invoices are received. The cost of government labor for managing construction is capitalized as part of the overall cost of the additional structure. Hazardous substances are found on the property during construction. A stop work order is issued, and after evaluation of the hazard, the construction is placed in abeyance. The asset value of the incomplete structure is impaired because the asset cannot be used.</p>	

020.FFM.L3.01 Real Property: Stewardship Land, Heritage Assets, Construction, and Impairment

Assumptions and Dependencies

1. There may or may not be automated (near/real-time or batch) interfaces between functional areas/functions/activities or between provider solutions/systems.
2. There is no presumption as to which activities are executed by which actor, or which activities are automated, semi-automated, or manual.
3. Supporting information for general ledger transactions includes sub-ledger entries when sub-ledgers are used.
4. Appropriate attributes (e.g., object class and project) are included as part of the accounting string.
5. Relationships between use cases are described in the Framework for Federal Financial Management Use Cases found in the related overview document.
6. All predecessor activities required to trigger the Initiating Event have been completed.
7. Funds availability checks are performed against appropriations/fund accounts for obligating funds, and against obligations for disbursing funds in accordance with OMB A-11, Section 150.2.
8. The heritage asset is not a multi-use heritage asset.
9. The construction vendor is properly registered in government systems, the relevant payee information has been set up in the FM system, and invoices are submitted electronically.
10. Tolerance percentages or amounts between obligation and commitment amounts and between expenditure and obligation amounts have been established.
11. Attempts to have the previous owner remediate the hazardous substance have failed.
12. The hazardous substance prohibits continuation of construction and prevents structure from being used for its intended purpose.
13. Contract termination activities to place construction in abeyance are properly executed but are not included as events in this use case.
