THE SECRETARY OF THE TREASURY  
WASHINGTON

NOV 27 1973

Dear Sirs:

I have the honor to transmit herewith the Combined Statement of Receipts, Expenditures and Balances of the United States Government for the fiscal year ended June 30, 1973. This submission is in accordance with the provisions of section 15 of the Act of July 31, 1894 (31 U.S.C. 1029) and section 114 of the Act of September 12, 1950 (31 U.S.C. 66b).

Sincerely yours,

George P. Shultz

President of the Senate

Speaker of the House of Representatives

## INTRODUCTION

The requirements of law for the preparation of an annual report on receipts and outlays of the Government originated December 31, 1791 under a standing order of the House of Representatives. This was superseded by the following:

Section 15 of the Act of July 31, 1894 (31 U.S.C., 1964 ed., Supp. III sec. 1029) which provides, "It shall be the duty of the Secretary of the Treasury annually to lay before Congress, on the first day of the regular session thereof, an accurate combined statement of the receipts and expenditures during the last preceding fiscal year of all public moneys, including those of the Post Office Department, designating the amount of the receipts, whenever practicable, by ports, districts, and States, and expenditures, by each separate head of appropriation," and

Section 114 of the Act of September 12, 1950 (31 U.S.C. 66b (a) which provides, "The Secretary of the Treasury shall prepare such reports for the information of the President, the Congress, and the public as will present the results of the financial operations of the Government....". Section 114 also provides that the duties imposed upon the Treasury Department by Section 15 of the Act of July 31, 1894 may be exercised and performed by the Secretary as a part of his broader authority and duties under this section.

This report is recognized as the official publication of the details of receipt and outlay data with which all other reports containing similar data must be in agreement. In addition to serving the needs of Congress, the Office of Management and Budget uses this report in reviewing the President's budget programs; the General Accounting Office in its audit activities; the various departments and agencies of the Government in reconciliation of their accounts; and the general public in its continuing review of the operations of the government. Other reports prepared by the Treasury Department that contain related information are: Monthly Statement of Receipts and Outlays of the United States Government; Treasury Bulletin; and the Annual Report of the Secretary of the Treasury on the State of the Finances.

## DESCRIPTION OF ACCOUNTS RELATING TO CASH OPERATIONS

The classes of accounts maintained in connection with the cash operations of the Federal Government, exclusive of public debt operations, include: (1) The accounts of fiscal officers or agents, collectively, who receive money for deposit in the U.S. Treasury or for other authorized disposition or who make expenditures by drawing checks on the Treasurer of the United States or by effecting payments in some other manner; (2) the accounts of administrative agencies which classify receipt and outlay transactions according to the individual receipt, appropriation, or fund account; and (3) the accounts of the Treasurer of the United States whose office is responsible for the receipt and custody of money deposited by fiscal officers or agents, for the payment of checks drawn on the Treasurer, and the payment of public debt securities redeemed. A set of central accounts is maintained in the Treasury Department for the purpose of consolidating financial data reported periodically from these three sources in order to present the results of cash operations in central financial reports on a unified basis for the Government as a whole, and as a means of internal control.

The central accounts relating to cash operations disclose monthly and fiscal year information on: (1) The Government's receipts by principal sources, and its outlays according to the different appropriations and other funds involved; and (2) the cash transactions, classified by types, together with certain directly related assets and liabilities which underlie such receipts and outlays. The accounting for receipts is on the basis of collections, and outlays is on the basis of checks issued and cash payments made, except that interest on the public debt is on an accrual basis.

## DESCRIPTION OF ACCOUNTS RELATING TO CASH OPERATIONS—Continued

The structure of the accounts provides for a reconciliation, on a firm accounting basis, between the published reports of receipts and outlays for the Government as a whole and changes in the Treasurer's cash balance by means of such factors as checks outstanding, deposits in transit, and cash held outside the Treasury. Within the central accounts, receipt and outlay accounts are classified as described in the following paragraphs.

### Budget Accounts

General fund receipt accounts - General fund receipt accounts are credited with all receipts which are not earmarked by law for a specific purpose. General fund receipts consist principally of internal revenue collections, which include income taxes, excise taxes, estate, gift, and employment taxes. The remainder consist of customs duties and a large number of miscellaneous receipts, including fees for permits and licenses, fines, penalties, and forfeitures; interest and dividends; rentals; royalties; and sale of Government property.

Special fund receipt accounts - Special fund receipt accounts are credited with receipts from specific sources which are earmarked by law for a specific purpose, but which are not generated from a cycle of operations. The Congress may appropriate these receipts on an annual basis or for an indefinite period of time. Examples of special fund receipts are those arising from rents and royalties under the Mineral Leasing Act, the revenue from visitors to Yellowstone National Park, the proceeds of the sale of certain timber and reserve lands, and other receipts authorized to be credited to the reclamation fund.

General fund expenditure accounts - General fund expenditure accounts are established to record amounts appropriated by the Congress to be expended for the general support of the Government. Such accounts are classified according to the limitations that are established by the Congress with respect to the period of availability for obligation of the appropriation, as 1-year, multiple-year, or "no-year" (without a time limit), and with respect to the agency authorized to enter into obligations and approve outlays.

Special fund expenditure accounts - Special fund expenditure accounts are established to record appropriated amounts of special fund receipts to be expended for special programs in accordance with specific provisions of law. These accounts are generally available without time limit, but may also be subject to time limitations as in the case of general fund accounts.

Revolving fund accounts - These are funds authorized by specific provisions of law to finance a continuing cycle of operations in which outlays generate receipts, and the receipts are available for outlay without further action by Congress. They are classified as (a) public enterprise funds where receipts come primarily from sources outside the Government and (b) intragovernmental funds where receipts come primarily from other appropriations or funds. These accounts are usually designated as "no-year" accounts, i.e., they are without limitation as to period of availability for outlay. Examples of public enterprise revolving funds are the Tennessee Valley Authority and the Commodity Credit Corporation. Examples of intragovernmental revolving funds are the General Supply Fund administered by the General Services Administration and the Government Printing Office Revolving Fund.

Consolidated working fund accounts - These are accounts established to receive (and subsequently disburse) advance payments from other agencies or bureaus pursuant to Section 601 of the Economy Act (31 U.S.C. 686) or other provisions of law. Consolidated working funds may be credited with advances from more than one appropriation for the procurement of goods or services to be furnished by the performing agency with the use of its own facilities within the same fiscal year. Outlays recorded in these accounts are stated net of advances credited and are classified under the agencies administering the accounts. The accounts are subject to the fiscal year limitations of the appropriations or funds from which advanced.

Management fund accounts - These are working fund accounts authorized by law to facilitate accounting for and administration of intragovernmental activities (other than a continuing cycle of operations) which are financed by two or more appropriations. This classification is also often applied to the consolidated working funds for interagency activities described above.

**DESCRIPTION OF ACCOUNTS RELATING TO CASH OPERATIONS - Continued**

Trust fund accounts - These are accounts maintained to record the receipt and outlay of moneys held in trust by the Government for use in carrying out specific purposes or programs in accordance with the terms of a trust agreement or statute. The receipts of many trust funds, especially the major ones, not needed for current payments are invested in public debt and Government agency securities. Generally, trust fund accounts consist of separate receipt and outlay accounts, but when the trust corpus is established to perform a business-type operation, the fund entity is called a "trust revolving fund" and a combined receipt and outlay account is used. Some of the major trust fund accounts are the Federal old-age and survivors insurance trust fund, Unemployment trust fund, Civil service retirement and disability trust fund, the National service life insurance trust fund, and the Highway trust fund.

Transfer appropriation accounts - These accounts are established to receive (and subsequently disburse) allocations which are treated as non-expenditure transactions at the time the allocation is made including certain transfers under Section 601 of the Economy Act (31 U.S.C. 686), and similar provisions of law.

Other Accounts

Deposit fund accounts - Deposit funds are combined receipt and outlay accounts established to account for receipts that are either (a) held in suspense temporarily and later refunded or paid into some other fund of the Government upon administrative or legal determination as to the proper disposition thereof, or (b) held by the Government as banker or agent for others and paid out at the direction of the depositor. Such funds are not available for paying salaries, expenses, grants, or other outlays of the Government.

**EXPLANATION OF TRANSACTIONS AND BASES OF FIGURES**

As indicated in the "Table of Contents", the Combined Statement of Receipts, Expenditures and Balances of the United States Government consists of: Part One - Summary statements with supporting tables and schedules; Part Two - Details of receipts; Part Three - Details of appropriations, outlays, and balances; Part Four - Other informational data; and Part Five - Details of foreign currency transactions, with an introductory statement explaining bases of figures, account classification, etc.

**BUDGET RECEIPT AND OUTLAY ACCOUNTS**Receipt Accounts

Part Two of this report contains the detail of internal revenue, customs, and miscellaneous receipts. Internal revenue and customs receipts are included in this report on the basis of reports of collections, which means they are reported as of the time that the cash received is placed under accounting control. Other receipts of the Government are reported on a collections received basis. Revolving fund and management fund receipts, reimbursements and refunds of moneys previously expended, are not included in the receipt tables, but are deducted from gross outlays.

## BUDGET RECEIPT AND OUTLAY ACCOUNTS—Continued

### Outlay Accounts

Part Three, Section I, of this report contains the detailed tabulations of outlay accounts, by organizational unit, showing the various transactions that relate to such accounts which affect the budget surplus or deficit of the Government. The accounts are arranged according to general, special, revolving, management and trust funds, showing the titles, period of availability, and account symbols. Following are explanations of the column headings in the tabulations.

1. Balances beginning of fiscal year - The amounts shown in the first money column represent ending balances as of the close of the preceding fiscal year. An analysis of the total of these balances, expressed in terms of Fund Resources and Fund Equities, is presented on the basis of reports of the administrative agencies, submitted on Treasury Form No. BA-R 2108 in accordance with requirements of Treasury Department Circular No. 965, Revised.

#### Fund Resources include:

- a. Undisbursed balances (by year account).
- b. Investments in Federal securities - These amounts represent investment holdings (at par value) of Government accounts in public debt and agency securities.
- c. Unfunded contract authority - These amounts represent unused authority.
- d. Borrowing authority - These amounts represent unused authority.
- e. Accounts receivable - These amounts represent receivables which, when collected, will be credited directly to the appropriation or fund, and are reported as deductions to unpaid obligations. Such amounts consist of reimbursements earned and refunds receivable, i.e., amounts earned (both billed and unbilled) for accomplished delivery or performance as of June 30, overpayment refund receivables, travel advances and other advances which did not liquidate specific obligations, e.g., advances to General Services Administration Supply Fund are included.
- f. Unfilled customer orders - These amounts consist of undelivered customer's orders to the extent that it represents valid obligations recorded by the ordering agency for those appropriations using an authority to obligate anticipated reimbursements. The amount shown for an annual appropriation covers only those orders for which valid obligations were incurred under such annual account or orders for common-use items to be delivered from stock in accordance with 32 Comp. Gen. 436.

#### Fund Equities include:

- a. Unobligated balance - These amounts are the unobligated balances of no-year and multiple-year accounts which are unexpired for obligation, and unobligated balances of annual and merged prior-year accounts carried forward into the fiscal year representing the excess of receivables over gross unpaid obligations. Such excess amounts are footnoted as "Excess of receivables over unpaid obligations which is unavailable for obligation." Over-obligations are also footnoted.
- b. Accounts payable - These amounts represent liabilities for goods and services received as of June 30, representing valid obligations supported by documentary evidence.
- c. Undelivered orders - These amounts represent orders for goods and services remaining undelivered as of June 30, representing valid obligations supported by documentary evidence, for which the liability has not yet accrued.

### 2. Appropriations, and other obligational authority

a. Appropriations--Article I, Section 9, of the Constitution of the United States, provides that "No money shall be drawn from the Treasury but in consequence of appropriations made by law." The appropriations included in this report are the amounts which Congress authorized to be established for the fiscal year. These amounts do not represent cash actually set aside in the Treasury for the purposes specified in the appropriation acts; they represent limitations of amounts which agencies may obligate during the time period specified in the respective appropriation acts. In some instances, the Congress reappropriates part or all of the unobligated balances of prior-year appropriations which would otherwise expire. In other instances, the Congress authorized the transfer of obligational authority covering current appropriations from one agency or purpose to another. These transactions decrease and increase the amounts available for obligation in the particular appropriation accounts and are explained by applicable footnotes. The appropriations are classified to show the amounts appropriated from an organizational standpoint, and are shown in the second money column.

**BUDGET RECEIPT AND OUTLAY ACCOUNTS—Continued**

b. Contract authorizations - Contract authorizations represent a grant of authority by the Congress to incur obligations prior to the enactment of appropriations. A contract authorization does not, in itself, permit the spending of money. It must be followed by an appropriation to permit payment of the obligations incurred thereunder. New contract authority granted during the fiscal year is shown in the second money column. Appropriations enacted for the fiscal year to liquidate such authority are included in this column as current year appropriations with a corresponding decrease to unfunded contract authority.

c. Authority to spend public and agency debt receipts - In some instances, the Congress grants authority to Government corporations or agencies to make outlays from funds to be borrowed from the Secretary of the Treasury or from the public. In the case of borrowings from the Treasury, the Secretary is directed to use proceeds from the sale of public debt securities. Legislation is generally specific with respect to the amount of money that can be advanced by the Treasury to each corporation or agency and often requires that the borrowing transactions be accomplished by the issuance of formal notes of the agency. A few agencies of the Government are authorized by law to issue their own securities to the public. Before issuing these securities, the agencies are required to secure approval from, or consult with, the Secretary of the Treasury with respect to terms of the borrowing and timing thereof. Such borrowings and repayment of borrowings from the Treasury or the public represent financing transactions and, therefore, do not affect the budget surplus or deficit. Borrowing authority granted by the Congress during the fiscal year is shown in the second money column.

3. Transfers, borrowings, and investments (net)

a. Transfers of obligated balances from lapsed appropriations to merged prior-year accounts as required by 31 U.S.C. 701, and other transfers by request of the administrative agencies concerned, as authorized by law, are shown in the third money column. The other transfers are, in the majority of cases, for the benefit of the advancing appropriation accounts, and outlays from such transfer appropriation accounts are associated with the account to which the funds were originally made available. Explanatory footnotes showing the statutory authority and amounts transferred to or from the various accounts are given at the end of each organizational chapter.

b. Other transactions shown in this column include the following:

(1) Borrowings - (a) Borrowings from the Treasury - representing the net of borrowings from or repayments to the Treasury as authorized by the Congress. (b) Borrowings from the public - representing the net of the par value of issues or redemptions of securities of Government corporations and agencies, under the agency debt authorizations granted by the Congress.

(2) Investments - representing the net par value of purchases and sales of public debt and Government agency securities.

4. Outlays - The outlays shown in the fourth money column are reported generally on the basis of checks issued by Government disbursing officers net of collections. Certain modifications of this basis are described as follows:

a. Interest on the public debt is reported on an accrual basis.

b. Where payment is made in cash rather than by check, the cash payment is the outlay.

c. Certain outlays of an intragovernmental nature do not require the issuance of checks; for example, charges made against appropriations representing a part of employees' salaries which are withheld for individual income taxes and for savings bond allotments.

Outlays are stated net of collections representing reimbursements as authorized by law, refunds of moneys previously expended, and receipts of revolving and management funds. In this connection, public debt or agency securities which are acquired in lieu of other properties, or donated, are considered as constructive receipt of cash and, therefore, the par amounts of such securities are included as receipts (reductions of outlays) of the acquiring agency.

## BUDGET RECEIPT AND OUTLAY ACCOUNTS—Continued

5. Balances withdrawn and other transactions - The fifth money column includes net transactions for several types of activities as follows:

a. Unobligated balances withdrawn - Represents reductions of appropriations pursuant to 31 U.S.C. 702 which provides that "Upon the expiration of the period of availability for obligation, the unobligated balance shall be withdrawn and, if the appropriation was derived in whole or in part from the general fund, shall revert to such fund, but if the appropriation was derived solely from a special or trust fund, shall revert, unless otherwise provided by law, to the fund from which derived."

b. Unexpended balances withdrawn - Represents reduction of appropriations pursuant to 2 U.S.C. 102A which provides that "the unexpended balances of appropriations which are subject to disbursement by the Secretary of the Senate or the Clerk of the House of Representatives shall be withdrawn as of June 30, of the second fiscal year following the year for which provided."

c. Transfer to surplus fund of the Treasury - Transfers of unexpended balances of appropriations to what is termed in the law the "Surplus Fund of the Treasury" represent withdrawals of funds from such appropriations on the books without affecting the cash in the Treasury. The term "Surplus Fund of the Treasury," as used by the Congress in the Act of March 3, 1795 (1 Stat. 437) and in certain other acts, and by the Treasury Department, does not represent a fund consisting of unappropriated surplus or other assets as the term would ordinarily imply in accounting terminology; nor does it have any relation to surplus income. It is merely an expression of the action to give effect to an act of the Congress to withdraw or writeoff balances of certain appropriations. The net effect is to reduce the amount of the unexpended appropriation and thereby reduce the agency's authorization to obligate or spend. The amounts of appropriations so withdrawn are explained by appropriate footnotes.

d. Restorations to the appropriation accounts - Represents the re-establishment of balances pursuant to 31 U.S.C. 702 which provides, "That when it is determined necessary by the head of the agency concerned that a portion of the unobligated balance withdrawn is required to liquidate obligations and effect adjustments, such portion of the unobligated balance may be restored to the appropriate accounts."

e. Capital transfers - Represents nonexpenditure transfers from revolving funds on account of repayment of investment or distribution of earnings.

f. Adjusted appropriations of prior-year receipts - Special and Trust fund accounts - Represents a current year reduction of prior-year appropriations to conform to the adjusted receipts of those prior-years.

g. Changes in receivables, payables, undelivered orders, unfilled customer orders, and unobligated balances.

6. Balances end of fiscal year - The balances in this column represent column 1 balances as adjusted by column 2, 3, 4 and 5 transactions.

Part Three, Section II, of this report contains the detailed data relating to transactions for deposit fund accounts, none of which affect the budget results. The accounts are listed according to organizational units and the columnar headings of the tabulations are on the same basis as Part Three, Section I.

Off-Budget Federal Agencies - These agencies would normally fall within the budget except that certain provisions of law or administrative determinations have required that transactions of such agencies should not affect budget results. The present off-budget agencies are: Export-Import Bank of the United States which was classified as off-budget pursuant to Public Law 92-126, dated August 17, 1971, and most outlays of the Rural Electrification Administration, including the Rural Telephone Bank, which were classified outside the budget pursuant to Public Law 93-32, dated May 11, 1973.

The financial statement on the preceding page does not purport to show all that the Government owns and owes but is confined to showing those assets and liabilities which are directly related to the cash operations of the Department of the Treasury and the rest of the Government. The statement is supported by a system of central accounts maintained in the Department of the Treasury in conformity with generally accepted Governmental accounting principles applied on a basis consistent with the preceding fiscal year.

NOTE 1 The balance in the Treasurer's account is stated as published in the daily Treasury statement for the last working day of the fiscal year. The net amount of deposit and withdrawal transactions in the fiscal year which were processed for entry in the Treasurer's account after the year-end daily Treasury statement was published have been applied to arrive at the balance on an actual basis.

NOTE 2 Represents deposits confirmed by depositaries not included in the Treasurer's account on June 30.

NOTE 3 Represents funds held as deposits for others which are liabilities of the Government and as such are not used as factors in determining the budget surplus or deficit.

NOTE 4 Represents securities issued by Government agencies which are direct liabilities of the issuing agency. The proceeds from sales and expenditures for redemptions are not used as factors in determining the budget surplus or deficit.

NOTE 5 Represents the net amount of public debt receipts and expenditures in the fiscal year which were processed for entry in the Treasurer's account after the year-end daily Treasury

statement was published. These transactions are recognized as being in transit at June 30 but have not been applied to the public debt outstanding balance published in the daily Treasury statement for June 30.

NOTE 6 This liability does not include interest on savings bonds of any series. The liability for interest on savings bonds which are sold at a discount is included in public debt principal on the basis of the increment in redemption value. The liability for interest on other savings bonds is recorded when the interest checks are issued with a corresponding liability for interest due and payable (equivalent, in this case, to checks outstanding).

NOTE 7 Military payment certificates are issued in certain overseas areas by military finance officers, in lieu of dollar instruments, to discharge obligations incurred under appropriations of the Department of Defense. The amount outstanding is shown as a liability.

NOTE 8 Represents deposits in the Treasurer's account and cash held outside Treasury in accounts of certain collecting officers not classified on June 30.

1/ Most Government payroll offices in the continental United States are required to have a check drawn, as of the payroll date, in favor of a Federal Reserve Bank to cover income and FICA taxes withheld from the pay of Federal employees. A Federal Tax Deposit Form 501 accompanies the check. This is in accordance with instructions in Part III, Chapter 3000, Section 3030 of the Treasury Fiscal Requirements Manual, submitted under cover of transmittal letter No. 23, dated October 17, 1968.

With most Federal agencies (Defense and certain other agencies excluded) making bi-weekly payments through the Federal tax deposit system that are excluded from this table, the amounts shown in the clearing accounts for withheld income and FICA taxes are substantially less than reflected in prior years. On the other hand, taxes withheld from the pay of Federal employees are covered into the Treasury on a more timely basis.

For Federal payroll offices outside the continental United States (Section 3040 of the aforementioned Chapter 3000), Defense and certain other agencies, income and FICA taxes withheld are accounted for as credited to clearing accounts pending charges representing payments submitted to District Directors of Internal Revenue with quarterly tax returns. Credits, payments, and balances in those clearing accounts maintained in the central books of the Treasury are reflected in this table.

1/ Amounts shown for each particular State as internal revenue receipts should not be interpreted as the actual tax burden of the residents of such States. Adjustments have not been made for cases where an individual resides in one State and derives his income from another. Also, the taxes of some corporations are paid from a principal office, although their manufacturing or service operation may be located in another State, or throughout several States. In the case of excise taxes on tobacco and automobiles, this tax is on the sales of these products at the retail level; thus the revenue is derived from the buyers located throughout the country rather than from the principal office of the manufacturers.

2/ Includes tax on unrelated business income of exempt organizations.

3/ Collections of individual income tax not withheld are inclusive of old-age, disability and hospital insurance taxes on self-employment income. Similarly, the collections of income tax withheld are reported in combined amount with old-age, disability and hospital insurance taxes on salaries and wages. Estimated separate national totals for individual income tax and for old-age, disability and hospital insurance taxes are shown in the Monthly Statement of Receipts and Outlays of the U. S. Government. Amounts of old-age, disability and hospital insurance tax collections, classified by States, are compiled by the Social Security Administration as a by-product of its wage and income record-keeping operations and are published periodically in the Social Security Bulletin.

4/ Tax payments made to banks, under the Federal tax deposit system, are included in the internal revenue collections for the period in which the Federal tax deposit is purchased. However, such payments are not classified by internal revenue districts (not by tax subclasses to which excise taxes relate) until the Federal tax deposit payment is applied to the taxpayers' liability in the internal revenue offices. Accordingly, the items shown as "Undistributed Federal tax deposits" represent the amount of Federal tax deposit forms purchased but not yet applied to the Taxpayers' liability.

5/ Beginning with fiscal year 1957, the United States total for individual income tax withheld is adjusted to exclude withheld individual income taxes transferred to the Government of Guam

in accordance with provisions of Public Law 630 approved August 1, 1950 (64 Stat. 392). This adjustment amounted to \$10,709,523.09.

6/ Includes railroad reemployment compensation tax and tax on railroad employee representatives.

7/ Amounts of internal revenue taxes collected on Puerto Rican tobacco and liquor manufacturers transported to the United States, or consumed in the island (less refunds, drawbacks, and expenses), are covered into the Treasury of Puerto Rico under the provisions of secs. 7652(a)(3) and 5314(a) of the Internal Revenue Code of 1954.

**SECTION II – AUTHORIZATIONS TO SPEND  
FROM DEBT RECEIPTS**

---

## 1. BACKGROUND

The "authority to expend from public debt receipts" is a term identified with legislative authorizations to use, for specific purposes, Government funds realized from the sale of public debt securities. This practice came into use in 1932 to finance activities of the Reconstruction Finance Corporation, and has since been used numerous times to finance various Government programs. Table 7 covers the details of such Congressional authorizations, distinguishing between those considered by committees on appropriations, and by other committees.

Legislation providing authority to spend from public debt receipts, whether contained in appropriation or substantive legislation, requires approval by the Congress prior to enactment. When contained in appropriation legislation, consideration is given by the committees on appropriations; when included in substantive legislation, consideration is given by those committees with jurisdiction over the particular area of law involved. Legislation containing this authority has the same force and effect as an appropriation and is so treated in Treasury accounts and reports, and in the annual Budget Document. Like an appropriation, borrowing authority does not, by itself, create an increase in the public debt; it is the expenditure made as a result of either an appropriation or a borrowing authorization which affects the level of the public debt through its impact on Government cash balances.

In addition to financing certain activities of Government corporations and special programs as authorized by the Congress, this borrowing authority method has been used to finance the Government's subscription to international organizations. Though not yet used, borrowing authority exists as "stand-by" authority in connection with bank deposits insured by the Federal Deposit Insurance Corporation (12 U.S.C. 1824), and investments in savings and loan institutions insured by the Federal Savings and Loan Insurance Corporation (12 U.S.C. 1725i). This authority has also been made available, but not used, in connection with the purchase, sale or redemption of debentures of Federal home loan banks. During fiscal year 1970 the authority of these banks, which are Government-sponsored, was increased to \$4,000,000,000. The Federal National Mortgage Association, also a Government-sponsored Corporation, has authority to spend and have outstanding \$2,250,000,000 from public debt receipts.

A forerunner of this type of financing is found in the Acts of February 25, 1791 (1 Stat. 196), and April 10, 1816 (3 Stat. 209), which provided for the establishment of the First and Second Banks of the United States, respectively, and directed that the Government's subscription to the stock of these banks be financed by the issuance of public debt securities. Also, in the purchase of the Louisiana Territory, the Act of November 10, 1803 (2 Stat. 246) authorized payment through the issuance of certificates of stock "in like manner as for the present domestic funded debt." Still another example of early borrowing authority is found in the Act of June 28, 1902 (32 Stat. 484), which provided for payments on account of the acquisition and additional construction of the Panama Canal.

## 2. MAJOR LEGISLATIVE PROVISIONS

(a) The Reconstruction Finance Corporation Act, approved January 22, 1932, as amended, provided borrowing authority to the Corporation for general and special purposes, as follows:

"The Corporation may issue \*\*\* its notes, debentures, bonds, or other such obligations in an amount outstanding at any one time sufficient to enable the Corporation to carry out its functions under this chapter or any other provision of law, \*\*\* The Secretary of the Treasury is authorized to purchase any obligations of the Corporation \*\*\* to use as a public-debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as amended. \*\*\*." (15 U.S.C. 606).

(b) The Act of July 31, 1945, establishing the Export-Import Bank of Washington (renamed the Export-Import Bank of the United States effective March 13, 1968), contained authorization to expend \$825,000,000 from public debt receipts to subscribe to the Bank's capital stock. Payment for \$174,000,000 of capital stock shall be made by the surrender to the Bank for cancellation of the preferred stock heretofore issued by the Bank and purchased by the Reconstruction Finance Corporation. The Secretary of the Treasury shall pay the Corporation the par value of the preferred stock upon its surrender to the Bank. In addition, the Act contained authority for the Bank to borrow funds from the Treasury:

Borrowings from the Treasury - "The Export-Import Bank of Washington is authorized to issue from time to time \*\*\* its notes, debentures, bonds, or other obligations; \*\*\* shall not exceed \$6,000,000,000 \*\*\* The Secretary of the Treasury is authorized and directed to purchase any obligations of the Bank issued hereunder and for such purpose \*\*\* is authorized to use as a public-debt transaction the proceeds of any securities issued \*\*\*." (12 U.S.C. 635d)

(c) Operations of the Commodity Credit Corporation are financed by borrowings from the Treasury pursuant to statutory provisions as follows:

"With the approval of the Secretary of the Treasury, the Commodity Credit Corporation is authorized to issue and have outstanding at any one time, bonds, notes, \*\*\* in an aggregate amount not exceeding \$14,500,000,000 \*\*\* The Secretary of the Treasury in his discretion, is authorized to purchase any obligations of the Commodity Credit Corporation issued hereunder, and for such purpose \*\*\* is authorized to use as a public-debt transaction the proceeds from the sale of any securities \*\*\* All redemptions, purchases, and sales by the Secretary \*\*\* shall be treated as public-debt transactions \*\*\*." (15 U.S.C. 713a-4)

(d) Loan programs of the Farmers Home Administration and its predecessor agencies were financed with funds borrowed by the Reconstruction Finance Corporation until 1947 when the borrowing authority was transferred to the Secretary of Agriculture, and subsequent borrowings authorized in annual acts of Congress:

"When authorized by Congress, the Secretary is authorized to make and issue notes for the purpose of obtaining funds in such amounts as the Congress may approve annually in appropriation Acts for making direct loans under this chapter \*\*\* The Secretary of the Treasury is authorized and directed to purchase any notes of the Secretary issued hereunder. \*\*\* All redemptions, purchases, and sales by the Secretary of the Treasury of such notes shall be treated as public debt transactions of the United States." (7 U.S.C. 1988b)

- (e) The Postal Reorganization Act, approved August 12, 1970 provided borrowing authority as follows:  
 "(a) The Postal Service is authorized to borrow money and to issue and sell such obligations as it deems necessary to carry out the provisions of this title. The aggregate amount of such obligations outstanding at any one time shall not exceed \$10,000,000,000. \*\*\*" (39 U.S.C. 2005). "For the purpose of any purchase of the obligations of the Postal Service, the Secretary of the Treasury is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as now or hereafter in force. \*\*\*" (39 U.S.C. 2007).

### 3. PROCEDURE AND EFFECT

Generally, authority to borrow from the Treasury is without fiscal year limitation; however, a limitation is usually provided as to the maximum amount of borrowings repayable to the Treasury that can be outstanding at any one time. The amount so authorized, together with collections and earnings realized under the program, remain available to the agency for an indefinite period. The amounts of borrowings are generally credited by the Treasury to a revolving fund account for the borrowing agency; repayments of borrowings reduce the agency's operating fund and restore the authorization for additional borrowings.

From time to time borrowing provisions are contained in annual departmental appropriation acts and the borrowing activity of agencies is reflected annually in the fiscal year accounts. In such instances, repayments by the agencies do not restore borrowing authorizations, and any additional authority to borrow must be provided by new legislation.

Where borrowings are made for programs which are nonrevenue-producing, or which result in losses, the Congress has authorized cancellations of the notes or other securities held by the Secretary of the Treasury. Where the authorizations are for an indefinite period, cancellations result in a restoration of borrowing authority in an equivalent amount. Advances and repayments of borrowings do not affect the administrative budget surplus or deficit. Only actual expenditures by borrowing agencies for authorized program purposes, or the recoveries and/or realizations on related assets, have such effect. This is the same as for agency programs financed by appropriation acts.

Conforming with the provisions of law regarding the treatment of these borrowings as public-debt transactions, it can be said that the proceeds from public debt issues are used to purchase notes from borrowing agencies and repayments by such agencies are applied toward the redemption of public debt securities.

### 4. EXPLANATION OF TABLES

Table 3 - Status of Authorizations to Spend from Public Debt and Agency Debt Receipts, Fiscal Year 1973 - Relates to the activity and status of authorizations during the current fiscal year, by agency and program. Reflects the amounts of unused authorizations at beginning of the year, current authorizations, adjustments, borrowings from Treasury, repayments which restore authority, nonrestoring repayments, and unused authorizations at end of year.

Table 4 - Status of Borrowings Handled as Public Debt Transactions, Cumulative 1932 through 1973, by Agency and Program - The data in this table relate to activity under the authorizations by the various agencies and programs. Figures are cumulative from inception, showing totals of advances by Treasury, repayments to Treasury, note cancellations authorized by the Congress, transfers between agencies, and balances due the Treasury.

Table 5 - Cancellations of Notes, and Cash Recoveries Thereon, Relating to Borrowings Handled as Public Debt Transactions, Cumulative through June 30, 1973 - Contains information on cancellations of notes as authorized by the Congress and the amounts of recoveries against such cancellations, identified as to agency and program, with citations to statutory authority, current year transactions, and cumulative figures for prior and current fiscal years.

Table 6 - Status of Congressional Authorizations to Spend from Public Debt Receipts, Fiscal Years 1932 - 1973 - Shows status of authorizations and status of borrowings for each of the years 1932 - 1973. Includes annual data on gross borrowings from the Treasury, and net borrowing transactions with the public that increase or decrease the agencies' authority to borrow from the Treasury.

Table 7 - Acts of Congress Authorizing Expenditures from Public Debt Receipts, January 22, 1932 through June 30, 1973 - Contains information, by agency and program, as to origin, and amount of authority. In columnar arrangement are shown the dates of Acts, citation of statute, volume and page, citation of U. S. Code title, and section, and amounts of authorizations, identified as to whether handled by the appropriations committees or other Congressional committees.

AUTHORIZATIONS TO SPEND FROM DEBT RECEIPTS

**Table 3 - STATUS OF AUTHORIZATIONS TO SPEND FROM PUBLIC DEBT AND AGENCY DEBT RECEIPTS, FISCAL YEAR 1973, BY AGENCY AND PROGRAM - Continued**

**FOOTNOTES**

Note: -- In certain instances the Congress authorizes agencies to borrow either from the Secretary of the Treasury under authorizations to spend from public debt receipts or from the public under corporate debt receipts. In most of these cases, Congress provides specified limitations and conditions for each type of borrowing authority; however, a maximum amount of borrowings that can be outstanding at any one time under the combined authority is usually established in the provision of law. Therefore, amounts shown in Parts I and II of this table for agencies having both types of borrowing authority should not be combined since this would involve a duplication or overstatement of the maximum authority set by the Congress.

<sup>1/</sup> No cancellations have been made since the fiscal year 1957.  
<sup>2/</sup> Certain deposits have been made to miscellaneous receipts which include cash recoveries but they are not included in this table because the portions applicable to the assets acquired against the cancellations cannot be identified.  
<sup>3/</sup> For details of the years 1938-1947; 1948-1952, and 1953-1959, see the Combined Statements for the following years: 1947 pages 733-734; 1952, pages 444-446; and 1959, pages 516-518. Details for each year from 1960 through 1972, will be found in corresponding tables in subsequent yearly Combined Statements.

<sup>4/</sup> No cash recoveries were made during the fiscal year 1973.  
<sup>5/</sup> Does not include appropriations made by the Congress for restoration of capital impairment amounting to \$45,313,031,967.06 through June 30, 1973.  
<sup>6/</sup> Transferred to Disaster loans, etc., revolving fund, pursuant to Public Law 38, approved April 6, 1949.  
<sup>7/</sup> Excludes amount of equity of the U. S. Treasury as a result of cancellations of Home Owners' Loan Corporation and Reconstruction Finance Corporation obligations.

Less than \$50,000.

1/ In cases where the amounts of Congressional authorizations have been indefinite, the net amount of transactions in the year generally represents the increase or decrease in borrowing authority. In addition to authority to borrow from the Treasury, some agencies also receive authority to borrow from the public, usually under the same provision of law.

2/ Excludes refundings.

3/ Amounts represent transactions under the combined authority to borrow either from the Secretary of the Treasury or the public, and do not represent the total borrowings from the public under other provisions of law.

4/ For detail by agency, see Table 3, Part I.

SUMMARY

Increases as above:	
Through appropriation committees.....	\$17,042.7
Through other Congressional committees.....	<u>116,449.9</u>
Total.....	<u>133,492.6</u>
Decreases as above:	
Through appropriation committees.....	4,363.6
Through other Congressional committees.....	<u>32,197.0</u>
Total.....	<u>36,560.6</u>

1. Includes amounts for establishment of original authority as well as increases and decreases (-) in this authority. If authorizations are indefinite in amount, the figures used generally represent the net amounts of actual borrowings.
2. Represents administrative cancellation of borrowing authority.
3. Most outlays of this Administration, including the Rural Telephone Bank, were classified outside the unified budget totals effective as of the close of business May 11, 1973, pursuant to an act approved May 11, 1973 (87 Stat. 65-71).
4. Represents transfers to Treasury consisting of notes held by the Reconstruction Finance Corporation and unadvanced balances which the Corporation had been authorized and directed to lend to this Agency.
5. Reductions have been netted against the authorizations.
6. This account was abolished effective July 1, 1970 and all its assets, liabilities and authorizations were transferred to the rural housing insurance fund pursuant to an act approved December 24, 1969 (83 Stat. 399). All authority to borrow was used before this account was abolished.
7. Authority to borrow the amounts stated in appropriation acts of October 14, 1949, and May 19, 1956, was authorized in an act approved July 15, 1949 (63 Stat. 437).
8. This account was abolished effective as of the close of business August 30, 1972, and all its assets, liabilities and authorizations were transferred to the agricultural credit insurance fund pursuant to an act approved August 30, 1972 (86 Stat. 661).
9. Authorized to borrow amounts from the Treasury as may be authorized in appropriation acts (see footnote 8).
10. Authorizations of \$466.1 million were transferred from the agricultural credit insurance fund as provided by an act approved August 30, 1972 (86 Stat. 661). Authority to borrow from the Treasury is indefinite in amount.
11. Authorization to borrow from the Treasury is indefinite. This amount represents net amount obligated, less the unexpended fund balance.
12. Authorization to borrow from the Treasury is indefinite. This amount represents borrowings of \$12.7 million from the Treasury less repayments of \$5.1 million.
13. Has been reduced by \$50.0 million which was transferred to the urban mass transportation fund pursuant to an act approved July 9, 1964 (78 Stat. 303).
14. Authorization to borrow from the Treasury is indefinite. Represents amount transferred from unused authorizations to borrow from the public.
15. The amount of \$453.4 million, formerly shown on this line, and the amount of \$260.5 million formerly shown below (now \$112.7 million) have been reduced by a total of \$601.2 million which represents the decrease in borrowings from the Treasury during the fiscal year 1973.
16. Includes \$268.1 million representing administrative adjustment of borrowing authority during the fiscal year 1973.
17. Authorization to borrow from the Treasury is indefinite. This fund has borrowed \$.4 million from the Treasury which has been repaid.
18. Authorized to borrow such amounts from the Treasury as may be authorized in appropriation acts.
19. This Corporation was terminated on June 30, 1969, by an act approved September 2, 1958 (72 Stat. 1759). Responsibility for liquidating the remaining assets of the Corporation was transferred to the General Services Administration. All borrowings were made while it was under the Department of the Interior.
20. Represents authorization of \$150.0 million less proceeds from sales of loans amounting to \$8.8 million returned to the fund during the fiscal year 1966 (see footnote 21).
21. Represents proceeds from sales of loans during the fiscal year 1962 through 1965. Amounts authorized to be advanced in any fiscal year after June 30, 1962, through June 30, 1967, were required to be reduced by the amount returned to the fund from loan sales during the previous fiscal year.
22. Represents cancellation of available unused authority pursuant to an act approved July 6, 1961 (75 Stat. 202).
23. Pursuant to an act approved August 17, 1971 (85 Stat. 345-346), the net outlays of this Corporation were classified outside the unified budget totals, effective as of the close of business August 16, 1971.
24. This corporation was abolished and its assets transferred to the Secretary of the Treasury for liquidation pursuant to an act approved October 3, 1961 (75 Stat. 773). All borrowings were made while it was under the Farm Credit Administration.
25. Borrowing authority of \$10,000.0 million has been reduced by \$250.0 million which represents authority used to borrow from the public.
26. Sections of the Code cited for this Corporation refer to 1946 and prior editions. The 1947 act superseded all prior legislation.
27. Authorization to borrow from the Treasury is indefinite. This amount represents amount used to carry out the provisions of the act.
28. Authorized to borrow from the Treasury for payment of interest on or retirement of principal on stadium bonds issued to the public in accordance with an act approved July 18, 1958 (72 Stat. 423).
29. Includes \$10.0 million transferred from unused authorizations to borrow from the public.

<b>Foreign Currencies held by the U.S. Government:</b>	<b>Page</b>
<b>Table I - Analysis of Total Foreign Currencies held by the U.S. Government, June 30, 1973</b>	<b>596-599</b>
<b>Table II - Foreign Currencies held by the U.S. Government, Fiscal Year 1973, Transactions and Balances Including Trust Fund Accounts</b>	<b>600-604</b>

The U.S. Government acquires and spends large amounts of foreign currencies in the course of its overseas operations. Foreign currencies acquired are purchased with dollars from commercial sources or received without direct purchase with dollars, hereafter referred to as "purchased" or "nonpurchased" foreign currencies. Clarification may be required to distinguish between currencies purchased with dollars and those acquired without direct purchase with dollars, since dollars are in fact used to purchase the commodities or items which are exchanged for most of the "nonpurchased" foreign currencies. The major distinction is that direct purchase of foreign currencies from outside commercial sources generally will involve dollar flows into the economy and banking system of the foreign government, whereas the expenditure for commodities, etc., generally will not.

This report deals primarily with the "nonpurchased" foreign currencies received -

- (1) in exchange for agricultural commodities financed by the Department of Agriculture (including repayment of loans of these funds);
- (2) in repayment of loans financed by dollar expenditures under the Foreign Assistance Act of 1961, and prior acts as amended;
- (3) as payment of interest on deposits of foreign currency in foreign banks;
- (4) from various other programs.

These nonpurchased foreign currencies are separate and distinct from the Budget Expenditure Accounts included in Part Three of the Combined Statement and do not affect the Budget surplus or deficit of the U.S. Government except to the extent that the currencies are "sold for dollars."

Table I of this report includes the balances of purchased foreign currencies held by the various U.S. and military disbursing officers. Thus all foreign currencies held by the U.S. Government are included in Table I of this report. Both Tables I and II, however, exclude foreign country owned funds (usually called "counterpart") which are local currencies owned and held by foreign Governments in special counterpart accounts in accordance with Section 609 of the Foreign Assistance Act of 1964 (22 U.S.C. 2359) and similar provisions of law. These latter currencies are not available for use by the U.S.; but the U.S. Government, through the Agency for International Development, has some say in how they are used by the foreign governments. These "counterpart" funds are reported by the Treasury in the "Inventory of Non-purchased Foreign Currencies."

Details by country and account previously shown in Part Five (from 1958 to 1969) may be found in a periodic report published by the Department of the Treasury, Bureau of Accounts, Division of Government Financial Operations, Special Reporting Operations.

## AVAILABILITY OF NONPURCHASED FOREIGN CURRENCIES

The foreign currencies reported herein in large part are neither freely convertible to other currencies nor freely spendable by the U.S. Government for the general support of its overseas operations. Most of the currencies are restricted by the terms of international agreements to use for specific programs and may not be used for other purposes without the consent of the foreign governments involved. These restricted accounts, however, are generally unfunded under a "reservation system" to account for currencies used temporarily for other U.S. Government programs. The Department of the Treasury maintains central memorandum reservation accounts for each country, similar to special fund accounts in the dollar area. The remainder of the currencies are termed nonrestricted. Although not generally convertible to other currencies or to U.S. dollars, nonrestricted currencies may be used for payment of official U.S. obligations in the country concerned, for accommodation exchanges for U.S. personnel, and sale for dollars to U.S. citizens and non-profit organizations for travel or other purposes in selected countries. Thus, nonrestricted currencies substitute for currencies which the U.S. Government would otherwise purchase with U.S. dollars from commercial sources.

Where the supply of a nonrestricted currency is great enough to more than meet U.S. requirements for the next two years (exclusive of requirements financed by restricted or reserved currencies), the currency is designated as excess by the Department of the Treasury. This designation permits agencies to request reservations of the currency for expenditure under appropriations for "special foreign currency programs" which utilize excess currencies exclusively. The designated excess currency countries for the fiscal year are shown in Table I. Where the supply of currencies is above the immediate needs of the U.S. Government but not sufficient for the country to be declared excess, the currency is designated as near-excess by the Department of the Treasury. The designated near-excess currency countries for the fiscal year are also shown in Table I. The currencies of the other countries (about 115-120) are called non-excess currencies, indicating that the nonrestricted U.S. holdings are not expected to exceed requirements for the reasonable foreseeable future. In most non-excess currency countries, the U.S. Government must purchase currencies from commercial sources for part of its operating requirements.

U.S.-owned foreign currencies which are restricted to expenditure for loans or grants within the country are called country use currencies. Other U.S.-owned currencies, whether restricted or not, are called U.S. use currencies.

Foreign currency "FT" accounts are divided in this report into four categories according to whether the currencies are restricted or nonrestricted, and whether or not the use of the currencies requires an appropriation.

Holding accounts are used generally when the specific availability of currencies is not known at the point of collection. When the availability is determined, the Department of the Treasury issues transfer authorizations moving the currencies from the holding account to one of the three categories of accounts described below.

Treasury sales accounts are for nonrestricted currencies which are not earmarked for any particular use and are available for sale to any government agency for official uses, including accommodation exchange. Such currencies are used to replenish disbursing officers' working balances, which are maintained to pay vouchers chargeable to regular dollar appropriations and to make accommodation exchanges for U.S. personnel. These working balances, which are replenished with currencies purchased with U.S. dollars from commercial sources when no currencies are on hand in Treasury sales accounts, are accounted for in terms of their U.S. dollar value and are included in the Government's regular accounts and financial reports as cash assets in the same manner as U.S. dollars. The transfer of currencies from foreign currency "FT" sales accounts to the disbursing officer's working balance constitutes the first recognition of these currencies in the regular dollar accounts (balances of which are referred to as "purchased" currencies), hence even though the transfer is merely a book entry between foreign currency and dollar accountability, it is usually called a "sale for dollars" or a "purchase from Treasury" depending on which side of the transaction is being viewed. In accounting terms the entry in the dollar accounts is a debit to cash and a credit to a receipt, appropriation, or fund account. Subsequently, when currencies in the working balance are disbursed to liquidate obligations, the accounting entry is a debit to an appropriation or fund account and a credit to cash.

Program accounts are established for "restricted" or "reserved" currencies which are earmarked by the terms of international agreements, or as a result of determinations under U.S. law, for specific programs. In this report, two types of program accounts are distinguished--those requiring appropriations and those not requiring appropriations. The Department of the Treasury does not, in either case, control the rate and manner of use of these currencies; this control rests with program agencies.

Program accounts requiring appropriations are for currencies earmarked for a particular program which is conducted under authority of a dollar appropriation. The accounting treatment involved in the expenditure of these currencies is similar to that described above for sales accounts: The currencies are transferred to dollar accountability for expenditure; the transfer is shown in these foreign currency tables as a "sale for dollars"; and the entries in the dollar accounts result in a debit to an appropriation and a credit to a receipt, appropriation, or fund account. On the other hand, because these currencies can only be used for particular programs, the transfer to dollar accountability and the expenditure of the currencies are virtually simultaneous, and the currencies do not become an effective part of disbursing officers' working balances. The appropriations which utilize restricted foreign currencies are of two types--regular appropriations which have no inherent foreign currency limitations and appropriations with limitations which restrict them in part to expenditure of foreign currencies acquired without purchase with dollars.

Program accounts not requiring appropriations are for currencies earmarked for use under foreign currency expenditure authorizations. Such authorizations are granted specifically by the Congress as waivers to Section 1415 of the Act of July 15, 1952 (31 U.S.C. 724) which provides that foreign currencies will not be available for expenditure except as provided in appropriation acts. The currencies do not come under the regular dollar accounting processes of the Government at any point. Their use is reported in these tables in the "expenditure" column.

In addition to the foregoing fourfold classification of accounts based on availability characteristics and type of expenditure authorization, foreign currency accounts are classified as Treasury or agency accounts and trust accounts (See Table II).

## BASES OF FIGURES

Figures stated in dollar equivalents in this report are based on the foreign currency units as maintained in the official accounts of the various U.S. and military disbursing officers of the U.S. Government. Receipts are recorded in these accounts on the basis of actual currency collections received by disbursing officers. Disbursements are recorded on the basis of checks issued or payments made in foreign currency.

In general, the U.S. dollar equivalents are computed at rates at which disbursing officers could acquire currencies by purchase with dollars from commercial sources for official use. Exchange rates for financial reporting are prescribed in accordance with Paragraph 4 of Procedures Memorandum No. 1 issued under Treasury Circular No. 930, Revised. Exchange rates for selling currencies to agencies are prescribed in accordance with Section 281.6 of Treasury Circular No. 930, Revised.

TABLE I - ANALYSIS OF TOTAL FOREIGN CURRENCIES HELD BY THE U.S. GOVERNMENT  
June 30, 1973 - continued

FOOTNOTES

- 1/ Non-restricted currencies may be used for payment of official obligations in the countries concerned, for accommodation exchange for U.S. personnel and for sale to U.S. citizens and non-profit organizations for travel and other purposes.
- 2/ These currencies are restricted by the terms of international agreements or by administrative determination to specific program uses. Examples include funds for emergency relief and other programs under P.L. 480, American schools and hospitals abroad under the Foreign Assistance Act, expenses of Congressional committees, etc.
- 3/ Country use currencies are U.S.-owned foreign currencies which are restricted to expenditure for loans or grants within the respective countries according to agreement terms.
- 4/ These minus figures represent the offset to the amounts of currencies used temporarily for other purposes under the unfunding concept pursuant to Public Law 89-677 of October 15, 1966. See also footnote 5 to Table II.
- 5/ Represents amounts committed to agencies for their future use for specific programs. If no FT funds are available when needed, currencies will be purchased from commercial sources. See also footnote 5 to Table II.
- 6/ Negative balances result from end-of-month payments to be funded from FT funds or purchases in the market with U.S. dollars in the following month.
- 7/ Includes accommodation exchange transactions and purchases from banks and other commercial sources by disbursing officers. In most excess and near excess currency countries, the entire amounts shown are the result of accommodation exchange receipts authorized under Treasury Circular No. 830 of July 28, 1966, as revised.
- 8/ Represents the purchase of foreign currencies by departments and agencies with appropriated dollars from available Treasury "FT" holdings.
- 9/ Excess currencies are the currencies of countries for which it has been determined that the supply is great enough to more than meet U.S. requirements for at least the next two years.
- 10/ Near-excess currencies are those where the supply of currencies available is above the immediate needs of the U.S. Government but not by an amount great enough for the country to be declared an excess currency country.
- 11/ Non-excess currencies are all currencies not designated as "excess" or "near-excess."
- 12/ Czechoslovakia - Represents funds transferred from the Department of the Army to the Department of the Treasury.
- 13/ The CFA franc is the official currency unit for Ivory Coast, Niger, Senegal, and Chad, as well as certain other countries and is freely exchangeable for any other currency in the French franc area. All purchases of CFA francs are shown under Senegal.
- 14/ Japan - Includes \$19,649,321 which is available for educational, scientific, and cultural activities pursuant to an agreement with the Government of Japan, dated January 9, 1962.
- 15/ Consists of currencies of various countries received in payment of fees, services, etc., which were immediately purchased with appropriated funds for operating needs of collecting agencies with the proceeds being credited to miscellaneous receipts of the Treasury.
- 16/ Includes \$3,214,382,000 which was purchased by the Department of Defense.
- 17/ Includes \$157,405,000 which was purchased by the Department of Defense.
- 18/ Total balance of purchased foreign currencies includes adjustments of \$34,031,308 for Army and \$201,357 for Navy which are not included in Memorandum Column of Table A - Schedule 3 in Part I. of the Combined Statement.

FOREIGN CURRENCY ACCOUNTS

TABLE II - FOREIGN CURRENCIES HELD BY THE U.S. GOVERNMENT FISCAL YEAR 1973-CONTINUED  
Transactions and Balances Including Trust Fund Accounts 1/

FOOTNOTES

- 1/ For the purpose of providing a common denominator, the currencies of the foreign countries are herein stated in U.S. dollar equivalents. It should not be assumed that dollars in amounts equal to the balances shown are actually available with respect to the transactions and balances in the custody of the Treasury. The dollar equivalents were calculated at varying rates of exchange. The opening balances are based on the June 30, 1972 reporting rates. Receipts are valued at the previous end-of-the-quarter reporting rates with the exception of currencies received under Public Law 480, as amended, Sections 103(c), 402, 502(a), and Section 6, Title II of the Mutual Security Act of 1954, as amended, which currencies are valued at international agreement rates which are referred to as either import or loan repayment rates. Currencies sold for dollars are valued at the exchange rate in effect on the date of sale. The June 30, 1973, Treasury and Agency balances are valued at the June 30, 1973 reporting rates. Transfers and expenditures are valued at the beginning of the quarter reporting rates.
- 2/ Dollars acquired from the sale of foreign currencies are derived from charges against dollar appropriations of the Federal Agencies which use the currencies. These dollar proceeds are credited to either miscellaneous receipts or to other appropriate accounts on the books of the Treasury.
- 3/ Represents net differences caused by: (1) rate fluctuations; (2) the conversion of one currency to another; (3) withdrawals of currencies by Government disbursing officers at rates which vary from collection rates; and (4) other adjustments. Positive figures indicate increases and negative figures indicate decreases in dollar values.
- 4/ Consists of currencies of various countries received in payment of fees, services, etc., which were immediately purchased with appropriated funds for operating needs of collecting agencies, proceeds of which are credited to miscellaneous receipts of the Treasury. These amounts exclude repayments to appropriations.
- 5/ Under Procedures Memorandum No. 2, dated January 16, 1964, of Department Circular 930, Revised, which is in consonance with Section 508 of Public Law 89-257, approved December 31, 1963, as extended, reservations established under specific authority of law or in connection with special foreign currency program appropriations, generally will not involve the setting aside of these currencies in restricted funded "FT" accounts. This procedure allows the use of foreign currencies in lieu of direct dollar expenditures without making any change whatsoever in the system of congressional control of dollars or currencies or in the availability of currencies for programs for which they are reserved under existing law. It permits currencies on hand to be used for current U.S. needs which would otherwise require dollar purchase in the market with the stipulation that such currencies will be replaced as needed later. This contributes towards improving the United States balance-of-payments situation through a change in Treasury banking and accounting arrangements.
- The primary advantage of the procedure is the improvement of the balance-of-payments situation, since dollar outflows for acquisition of currencies on the market is delayed until the currencies on hand have been utilized. A secondary advantage of the procedure is the simplification of accounting for and reporting on the use of foreign currencies thus putting the accounting for reserved foreign currencies on the same basis as that used for reserved U.S. dollars.
