Additional Financial Management Service Releases on Federal Finances

Sold on a subscription basis only (exceptions noted) by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.†

Combined Statement of Receipts, Outlays, and Balances of the United States Government. This statement presents budget results and the cash-related assets and liabilities of the Federal Government with supporting details. Single copy price: \$67.00 (domestic), \$93.80 (foreign).

Financial Report of the United States Government. This annual report provides information about Government financial operations on the accrual basis. Single copy price: \$26.00 (domestic), \$36.40 (foreign).

† Subscription order form on inside back cover.

The Treasury Bulletin is for sale by the Superintendent of Documents U.S. Government Printing Office Washington, D.C. 20102. The Treasury Bulletin is issued quarterly in March, June, September, and December by the Financial Management Service, Governmentwide Accounting, Budget Reports Division. Statistical data is compiled from sources within Treasury departmental offices and bureaus, as well as various other Federal program agencies. Readers can contact the publication staff at (202) 874-9938/9939 to inquire about any of the published information. Suggestions are welcome.

The publication staff can also be reached by electronic mail.

Profile of the Economy

[Source: Office of Macroeconomic Analysis] As of May 10, 2010

Introduction

The economy grew for the third straight quarter in the first 3 months of 2010, following a year and a half of nearly steady contraction. Financial as well as economic conditions have improved, and as evidence of more broad-based activity, final sales have grown for four straight quarters. Labor market conditions improved as payroll jobs increased during the first quarter of this year for the first time since the final quarter of 2007. Although the labor market is stabilizing, the unemployment rate remains very high and recovery in employment this year is likely to be slow.

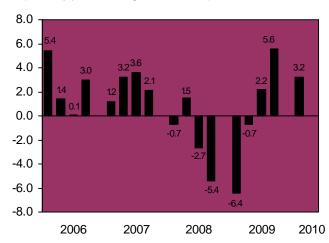

Despite rising oil prices over the past several months, labor market slack and excess capacity in the economy continue to keep the headline and core (a measure excluding food and energy prices) rates of inflation in check. Conditions in housing are mixed but have been stabilizing, and financial markets have generally improved for more than a year. Stock market indexes posted double-digit gains last year, and have posted small gains on a year-to-date basis. Treasury bond yields have remained fairly steady for the past several months. Most economists predict moderate economic growth through 2010. The economy has been supported by a wide variety of measures implemented under the American Recovery and Reinvestment Act of 2009 (ARRA, or the "Recovery Act"), as well as efforts to restore financial stability and improve conditions in housing markets. A few of these measures were temporarily extended. For example, the first-time homebuyer tax credit, which was instrumental in boosting home sales in the fall of 2009, was extended earlier this year, but expired at the end of April. Most of the fiscal stimulus will have been implemented by the end of this year, and most recently, government policy has focused on restoring long-term fiscal balance. While the basic stance of monetary policy remains accommodative, all of the special monetary policy supports have been removed, with the exception of a portion of one facility for commercial mortgage-backed securities, which is scheduled to close at the end of June.

Economic Growth

Economic conditions continued to improve in the first quarter of 2010. According to the Advance estimate, real gross domestic product (GDP) rose by 3.2 percent at an annual rate, following a 5.6 percent gain in the fourth quarter of 2009 and 2.2 percent in the third quarter. The moderation in the pace of growth in the first quarter was due to a smaller change in inventory investment; although businesses started to build inventory for the first time in 2 years, the quarterly contribution to GDP growth was only 1.6 percentage points,

Growth of Real GDP

(Quarterly percent change at annual rate)

compared with a 3.8 percentage point contribution in the fourth quarter of 2009. Final sales (considered a better measure of underlying demand because it subtracts out inventory movements) rose 1.6 percent in the first quarter, about the same pace as in the last two quarters of 2009. Consumer spending and exports each rose for the third straight quarter. Business investment grew, on balance: although business spending on structures fell, investment in equipment and software grew at a rapid pace for the second straight quarter. Residential investment fell sharply after two consecutive quarters of growth. Government spending fell for the second straight quarter, as state and local government spending fell and federal spending edged up after no change in the previous quarter.

Consumer spending-which accounts for about 70 percent of GDP-surged 3.6 percent in the first quarter, the fastest pace since the first quarter of 2007. This surge followed growth of 1.6 percent in the fourth quarter and 1.0 percent over the four quarters of 2009. Consumer spending has expanded for three straight quarters, and in the first quarter of 2010 contributed 2.6 percentage points to real GDP growth.

Residential investment–mostly residential homebuilding–now accounts for only about 3-1/2 percent of GDP after sharply falling since early 2006. After several quarters of steep declines, residential investment surged 19 percent in the third quarter of 2009 and grew by almost 4 percent in the final quarter, but fell nearly 11 percent in the first quarter of 2010. Monthly housing measures (starts, sales, inventories, and prices) remain weak, but signs of recovery are emerging. In March, single-family starts edged down 0.9 percent but

were nearly 50 percent higher than a year earlier. Sales of new single family homes surged almost 27 percent, up from a record low in March 2009 but still about 70 percent below the mid-2005 high. Inventories of unsold new and existing homes continued to shrink in March but remain very high relative to sales. The number of unsold new single-family homes is at a 39-year low.

Higher levels of home sales and declining inventories have helped stabilize house prices, although the most recent monthly measures have been mixed. The Federal Housing Financing Authority (FHFA) purchase-only house price index has been relatively stable since November 2008 but fell 0.2 percent in February 2010 and was down 3.4 percent from a year earlier. The Standard & Poor's (S&P)/Case-Shiller composite home price indexes were down in February, but both rose on a year-over-year basis for the first time since December 2006: the 20-city index rose 0.6 percent and the 10-city index rose 1.4 percent.

After declining in the first three quarters of 2009, business investment spending picked up in the two most recent quarters. Nonresidential fixed investment—about 10 percent of GDP—grew by 5.3 percent at an annual rate in the fourth quarter, and then by 4.1 percent in the first quarter of 2010. Outlays for equipment and software grew for the second straight quarter, and most recently contributed 0.8 percentage point to real GDP growth. Investment in structures continued to fall, extending a decline that began in mid-2008 and subtracting 0.4 percentage point from real GDP growth. Altogether, business fixed investment added 0.1 percentage point to real GDP growth in the first quarter.

Exports account for about 12 percent of GDP, while imports, which are subtracted from total domestic spending to calculate GDP, account for about 17 percent. Net exports have contributed roughly 1 percent to annual growth in each of the last 3 years, but in recent quarters the contribution has been mixed. In the first quarter of 2010, exports grew by nearly 6 percent and imports grew 9 percent; both had grown at double-digit rates in each of the two previous quarters. As a result, net exports subtracted 0.6 percentage point from real GDP growth in the first quarter.

Although the U.S. trade balance in goods and services and the current account (which also includes investment income flows and unilateral transfers) remain in deficit, both deficits have narrowed appreciably in recent years as the U.S. economy has slowed. The merchandise trade deficit reached \$840 billion in 2008, but declined to \$517 billion in 2009. The current account balance has been in deficit almost continuously since the early 1980s, and in 2006, reached a record \$804 billion, equivalent to 6.0 percent of GDP. As of 2009, the current account deficit had narrowed to about \$420 billion, equivalent to 3.0 percent of GDP.

Public sector purchases—which account for roughly 20 percent of GDP—declined 1.8 percent at an annual rate in the first quarter, adding 0.1 percentage point to GDP growth. Federal spending rose 1.4 percent, but was more than offset

by a 3.8 percent decline in state and local government spending. The latter cut about 0.5 percentage point from real GDP growth in the latest quarter.

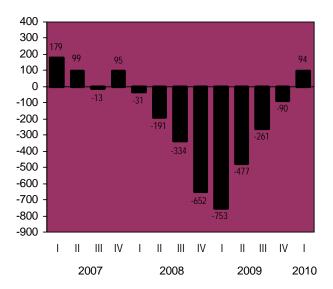

Labor Markets

Labor market conditions deteriorated through 2008 and worsened during the first part of 2009, but job losses moderated significantly in the second half of 2009 and jobs increased in the first 4 months of 2010. From the beginning of the recession in December 2007 through April 2010, 7.8 million jobs have been lost, including roughly 4.7 million jobs in 2009 alone. However, job losses started to slow in the second quarter of 2009, and during the first quarter of 2010, payrolls rose by an average of 94,000 per month; in the year through April, the economy has added a total of about 573,000 jobs. The unemployment rate generally trended higher during 2009, peaking at 10.1 percent in October-a 26-year high and 5.7 percentage points above the March 2007 low of 4.4 percent. Although unemployment declined to 9.7 percent during each of the first 3 months of this year, it edged back up to 9.9 percent in April, as the prospect of increasing job creation prompted more unemployed workers to re-enter the labor force as job seekers (thus increasing the number actually counted as unemployed). A measure of unemployment that includes workers who are underemployed and those who are only marginally attached to the labor force reached a record high of 17.4 percent in October 2009 (series dates from 1994)nearly double its level of 8.8 percent in December 2007. This broader measure edged down to 17.1 percent in April 2010. And, roughly 44 percent of the unemployed have been out of work for 27 weeks or more-a new record.

Job losses have been spread broadly across most sectors; from the start of the recession through April 2010, the manufacturing sector has lost 2.1 million jobs, and construction payrolls fell by 1.9 million. Over that same period, transportation payrolls fell by more than 425,000, and payrolls in the leisure/hospitality and finance/ insurance/real estate sectors each fell by more than 400,000. However, some of these same sectors have begun to add jobs. For example, payrolls in the manufacturing, retail trade, and leisure and hospitality industries have increased in each of the last 4 months, and construction employment has risen in each of the past 2 months. A variety of other sectors have also seen job creation: Federal government employment increased 59,000 in April, which was more than accounted for by temporary Census hires, and employment in private service-producing industries rose by 166,000 in April. A few sectors have seen job growth throughout the recession: since December 2007, the health care and education sectors have together added about 930,000 payroll jobs, including a net gain of about 614,000 jobs in health care.

Payroll Employment

(Average monthly change in thousands from end of quarter to end of quarter)

Inflation

Headline consumer inflation is higher than a year ago, mainly due to rising oil prices. Nonetheless, the high-level of unemployment, along with the low-level of capacity utilization, continue to restrain underlying inflationary pressures, and both headline and core rates of inflation are relatively low. Headline consumer prices rose 2.3 percent over the 12 months ending in March, higher than the 0.4 percent decline in the year-earlier period. Energy prices rose 18.3 percent in the year through March. Core inflation has decelerated, however: on a 12-month basis core consumer prices rose 1.1 percent through March, compared with an increase of 1.8 percent a year ago. For the most recent 3 months, headline consumer prices rose at an annual rate of 3.2 percent (with energy prices rising by just over 16 percent at an annual rate over the same period), and the rate of core price inflation was 1.9 percent.

Oil prices have risen since late 2008, but are well-below the record highs reached in mid-summer 2008. The retail price of regular gasoline hit a record of \$4.11 per gallon in early July 2008 then dropped to \$1.61 in late December 2008. As of end-April the price had risen to \$2.90 per gallon, \$1.22 higher than the December 2008 low and nearly 82 cents higher from April 2009. The front-month futures price for West Texas Intermediate (WTI) crude oil rose to a record

Unemployment Rate

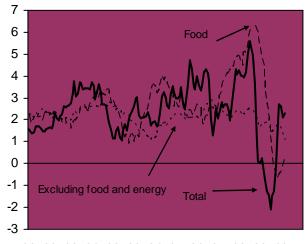

(Percent) 11.0 10.5 Apr. 2010 10.0 9.9% 9.5 9.0 8.5 8.0 7.5 7.0 6.5 6.0 5.5 5.0 4.5 4.0 3.5 01 02 03 04 05 06 07 80

\$147 per barrel in July 2008, then dropped to a recent low of about \$34 per barrel in December 2008, and has since risen to an average \$84 per barrel in April 2010–up \$35 from a year ago.

Food prices rose rapidly over much of 2007 and 2008, remaining above the overall inflation rate, but have since trended much lower. In the 12 months through March 2010, consumer food prices edged up 0.2 percent, contrasting sharply with the 4.4 percent rise of the previous year.

Consumer Prices

(Percent change from a year earlier)

Federal Budget

The federal budget deficit widened to \$1.4 trillion in fiscal year 2009 (almost 10 percent of GDP), well above the \$459 billion in fiscal year 2008 (3.2 percent of GDP). This deterioration followed 3 years of improvement that had trimmed the deficit to \$162 billion (1.2 percent of GDP) in fiscal year 2007.

The Federal budget is projected to show a deficit of \$1.6 trillion in fiscal year 2010 which is \$143 billion higher than last year's deficit of \$1.4 trillion. The fiscal year 2010 deficit is projected to be 10.6 percent of GDP, the highest percentage since 1945 (when it was 22 percent). The latest projections show a shrinking of the deficit to 5.1 percent of GDP in fiscal year 2012 and a decline to 3.9 percent of GDP in fiscal year 2015. Over the long term (fiscal years 2015 to 2020), the deficit is expected to average 3.9 percent of GDP. More than 80 percent of the overall deficit in the long term is due to interest payments; the primary deficit (receipts less spending excluding interest payments) is forecast to fall from 9.4 percent of GDP in the current fiscal year to 1.1 percent of GDP in fiscal year 2014, and to average 0.7 percent in the remaining years through fiscal year 2020.

Economic Policy

Key fiscal and monetary policy actions taken over the past few years have kept the economy from contracting even further, and continue to boost the recovery in 2010 and beyond. Most recently, government policy has focused on setting and achieving goals related to long run fiscal sustainability.

On the fiscal policy side, the ARRA authorizes the government to spend \$787 billion towards stimulating domestic demand, including \$288 billion in tax benefits, \$275 billion in contracts, grants, and loans, and \$224 billion in entitlements. As of late April 2010, a total of nearly \$390 billion in funds had been paid out. This spending will continue to provide an important boost to economic activity in 2010. Specifically, the Recovery Act is expected to create or save an estimated 3.5 million jobs in a range of industries from clean energy to health care. Late last year, the first-time home buyer tax credit was extended and expanded temporarily (it expired on April 30), and a new Small Business Jobs and Wages Tax Credit was announced to help small businesses create jobs.

The Administration's fiscal year 2011 budget includes proposals to help cut the budget deficit in the medium term. These include freezing all non-security discretionary spending for 3 years, allowing the 2001 tax cuts to expire for high income households, instituting a bank responsibility fee, and winding down activities in Iraq. The Administration has also created a bipartisan National Commission on Fiscal Responsibility and Reform that has been charged with

identifying policies to reduce the primary deficit to zero by the 2015 fiscal year and to reduce the overall budget deficit to a level consistent with a sustainable debt-to-GDP ratio (which includes policies that address the growth of federal spending).

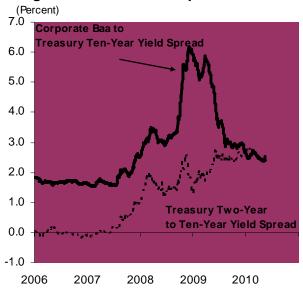

Partly in response to rising financial market stress, as well as signs of more slowing in the broader economy, the Federal Reserve began easing monetary policy in August 2007. It has since cut the rate dramatically to a target range of 0 percent to 0.25 percent at the December 2008 Federal Open Market Committee (FOMC) meeting, which brought the target to its lowest level in history. The target range was maintained at the FOMC's most recent meeting in late April the Committee observed continued strengthening in economic activity, the beginnings of labor market improvement, supportive financial conditions, and subdued inflation. The Federal Reserve responded to financial market stresses and the weakened economy by significantly expanding its tools to increase liquidity in credit markets and easing lending terms to sectors that needed a temporary injection, including a variety of facilities and funds directed at specific financial markets. All of these special facilities have expired, with the exception of the portion of the Term Asset-Backed Securities Loan Facility earmarked for commercial mortgage-backed securities, which is scheduled to close on June 30, 2010.

Financial Markets

Financial markets have largely recovered from the unprecedented strains experienced in the fall of 2008, helped by a wide range of financial stability measures as well as the boost to growth from the ARRA. Credit flows began picking up early in 2009 and have since improved substantially, although bank lending has yet to pick up. Measures of risk tolerance and volatility have largely returned to pre-crisis levels although in the very recent past there has been some deterioration, owing to investors' concerns about the resolution of Euro-area sovereign debt issues and possible spill-over effects in the U.S.

The S&P 500 index rose 23.5 percent in 2009, rebounding from a 38.5 percent plunge in 2008, the sharpest loss since 1931 (when an earlier version of the index, containing only 90 stocks, dropped 47 percent). Measured from the S&P 500's 12-year low in mid-March 2009, the index has surged 70 percent through mid-May 2010, and is about 3 percent higher year-to-date. The S&P stock market volatility index (VIX), often used as a measure of financial market uncertainty, surged to an all-time high of 80 percent in late October 2008, after hovering in a range of 20 to 30 percent for most of 2008. The VIX retreated to roughly 15 percent in early April, but has since partially retraced, reaching about 41 percent in early May, the highest level in a year.

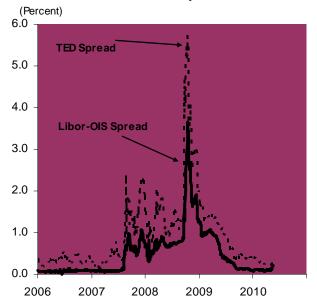

Long-Term Interest Rate Spreads

A variety of factors have buffeted long-term Treasury interest rates, including flight-to quality flows in response to multiple financial market pressures as well as supply concerns related to funding of the government's debt. The yield on the 10-year note reached a low of 2.1 percent in late December 2008, but then moved higher, closing in early April 2010 above the 4 percent mark for the first time since October 2008. Since then, the yield has fluctuated between 3.4 and 3.9 percent, reaching the lower end of the range in early May as uncertainty over Euro-area sovereign debt issues intensified. The 3-month Treasury bill yield, by contrast, generally trended lower throughout 2008 under the relatively steady influence of safe-haven demand for shortterm liquid assets. The yield fell to almost zero-reaching a record low-by the end of December 2008, then fluctuated in a range of 0.0 to 0.2 percent throughout 2009. This year, the yield has moved in a narrow range of 0.05 to 0.15 percent. The 2- to 10-year Treasury yield spread, one measure of the steepness of the yield curve, widened noticeably starting in mid-2007, when it was roughly 20 basis points, to 290 basis points in mid-January 2010, but has since narrowed to about 265 basis points as of early May. In the current economic environment, a generally steepening yield curve may suggest a rising probability of economic recovery.

Key interest rates on private securities, which spiked in response to financial market turbulence in late 2008, have since retraced as conditions have stabilized. The spread between the 3-month London Inter-bank Offered Rate (LIBOR) and the 3-month Treasury bill rate (the TED spread, a measure of inter-bank liquidity and credit risk) rose to an all-time high of nearly 460 basis points in early October 2008, but improvements in short-term credit availability led to a narrowing of this spread to 9 basis points in March 2010. Through early May, the spread has widened

Short-Term Interest Rate Spreads

o 26 basis points. The spread between the Baa corporate bond yield and the 10-year Treasury yield peaked at nearly 620 basis points in December 2008 and has since narrowed, reaching about 240 basis points as of early May 2010–still very high by historical standards.

Rates for conforming mortgages have remained relatively stable over the past several months, and jumbo mortgage rates have trended lower. The interest rate for a 30-year conforming fixed-rate mortgage rose to about 5.5 percent at the end of 2009, but has since declined somewhat, reaching 5.15 percent as of early May.

Foreign Exchange Rates

The value of the U.S. dollar compared with the currencies of seven major trading partners (the euro area countries, Japan, Canada, the United Kingdom, Australia, Sweden, and Switzerland) has depreciated significantly from its peak in February 2002, but most recently has begun to stabilize. Between February 2002 and January 2009, the exchange value of the dollar compared to an index of these currencies fell by about 16 percent. Between October 2007 and October 2009, however, the dollar appreciated by roughly 4.0 percent against these currencies. Over the longer timeframe, the dollar depreciated by about 33 percent against the yen, and by 34 percent against the euro. Over the past 2 years, the dollar has depreciated by about 9 percent against the yen, but has appreciated by about 17 percent against the euro. The dollar has appreciated against an index of currencies of 19 other important trading partners (including China, India, and Mexico). Between February 2002 and January 2009, the dollar firmed by about 1 percent against this basket of currencies, and over the past 2 years, has appreciated by about 6 percent.

INTRODUCTION: Federal Fiscal Operations

Budget authority usually takes the form of appropriations that allow obligations to be incurred and payments to be made. Reappropriations are Congressional actions that extend the availability of unobligated amounts that have expired or would otherwise expire. These are counted as new budget authority in the fiscal year of the legislation in which the reappropriation act is included, regardless of when the amounts were originally appropriated or when they would otherwise lapse.

Obligations generally are liquidated by the issuance of checks or the disbursement of cash—*outlays*. Obligations may also be liquidated (and outlays recorded) by the accrual of interest on public issues of Treasury debt securities (including an increase in redemption value of bonds outstanding); or by the issuance of bonds, debentures, notes, monetary credits, or electronic payments.

Refunds of collections generally are treated as reductions of collections, whereas payments for earned-income tax credits in excess of tax liabilities are treated as outlays. Outlays during a fiscal year may be for payment of obligations incurred in prior years or in the same year. Outlays, therefore, flow in part from unexpended balances of prior year budget authority and from budget authority provided for the year in which the money is spent. Total outlays include both budget and off-budget outlays and are stated net of offsetting collections.

Receipts are reported in the tables as either budget receipts or offsetting collections. They are collections from the public, excluding receipts offset against outlays. These, also called governmental receipts, consist mainly of tax receipts (including social insurance taxes), receipts from court fines, certain licenses, and deposits of earnings by the Federal Reserve system. Refunds of receipts are treated as deductions from gross receipts. Total Government receipts are compared with total outlays in calculating the budget surplus or deficit.

Offsetting collections from other Government accounts or the public are of a business-type or market-oriented nature. They are classified as either collections credited to appropriations or fund accounts, or offsetting receipts (i.e., amounts deposited in receipt accounts). The former normally can be used without an appropriation act by Congress. These occur in two instances: (1) when authorized by law, amounts collected for materials or services are treated as reimbursements to appropriations. For accounting purposes, earned reimbursements are also known as revenues. These offsetting collections are netted against gross outlays in determining net outlays from such appropriations; and (2) in the three types of revolving funds (public enterprise, intragovernmental, and trust); offsetting collections are netted against spending, and outlays are reported as the net amount.

Offsetting receipts in receipt accounts cannot be used without appropriation. They are subdivided into three categories: (1) proprietary receipts, or collections from the public, offset against outlays by agency and by function; (2) intragovernmental transactions, or payments into receipt accounts from governmental appropriation or fund accounts. They finance operations within and between Government agencies and are credited with collections from other Government accounts; and (3) offsetting governmental receipts that include foreign cash contributions.

Intrabudgetary transactions are subdivided into three categories: (1) interfund transactions—payments are from one fund group (either Federal funds or trust funds) to a receipt account in the other fund group; (2) Federal intrafund transactions—payments and receipts both occur within the Federal fund group; and (3) trust intrafund transactions—payments and receipts both occur within the trust fund group.

Offsetting receipts are generally deducted from budget authority and outlays by function, subfunction, or agency. There are four types of receipts, however, that are deducted from budget totals as undistributed offsetting receipts. They are: (1) agencies' payments (including payments by offbudget Federal entities) as employers into employees' retirement funds; (2) interest received by trust funds; (3) rents and royalties on the Outer Continental Shelf lands; and (4) other interest (i.e., that collected on Outer Continental Shelf money in deposit funds when such money is transferred into the budget).

The Government has used the unified budget concept set forth in the "Report of the President's Commission on Budget Concepts" as a foundation for its budgetary analysis and presentation since 1969. The concept calls for the budget to include all of the Government's fiscal transactions with the public. Since 1971, however, various laws have been enacted removing several Federal entities from (or creating them outside of) the budget. Other laws have moved certain off-budget Federal entities onto the budget. Under current law, the off-budget Federal entities consist of the two Social Security trust funds, Federal Old-Age and Survivors Insurance and the Federal Disability Insurance Trust Fund, and the Postal Service.

Although an off-budget Federal entity's receipts, outlays, and surplus or deficit ordinarily are not subject to targets set by the Congressional resolution, the Balanced Budget and Emergency Deficit Control Act of 1985 [commonly known as the Gramm-Rudman-Hollings Act as amended by the Budget Enforcement Act of 1990 (2 United States Code 900-922)] included off-budget surplus or deficit in calculating deficit targets under that act and in calculating excess deficit. Partly for this reason, attention has focused on both on- and off-budget receipts, outlays and deficit of the Government.

Tables **FFO-1**, **FFO-2**, **and FFO-3** are published quarterly and cover 5 years of data, estimates for 2 years, detail for 13 months, and fiscal year-to-date data. They provide a summary of data relating to Federal fiscal operations reported by Federal entities and disbursing officers, and daily reports from the FRBs. They also detail accounting transactions affecting receipts and outlays of the Government and off-budget Federal entities and their related effect on assets and liabilities of the Government. Data are derived from the "Monthly Treasury Statement of Receipts and Outlays of the United States Government."

- Table **FFO-1** summarizes the amount of total receipts, outlays, and surplus or deficit, as well as transactions in Federal securities, monetary assets, and balances in Treasury operating cash.
- Table **FFO-2** includes on- and off-budget receipts by source. Amounts represent income taxes, social insurance taxes, net contributions for other insurance and retirement, excise taxes, estate and gift taxes, customs duties, and net miscellaneous receipts.
- Table **FFO-3** details on- and off-budget outlays by agency.

- Table **FFO-4** summarizes on- and off-budget receipts by source and outlays by function as reported to each major fund group classification for the current fiscal year to date and prior fiscal year to date.
- Table **FFO-5** summarizes internal revenue receipts by states and by type of tax. Amounts reported are collections made in a fiscal year. They span several tax liability years because they consist of prepayments (estimated tax payments and taxes withheld by employers for individual income and Social Security taxes), payments made with tax returns and subsequent payments made after tax returns are due or are filed (that is, payments with delinquent returns or on delinquent accounts).

Amounts are reported based on the primary filing address provided by each taxpayer or reporting entity. For multistate corporations, the address may reflect only the district where such a corporation reported its taxes from a principal office rather than other districts where income was earned or where individual income and Social Security taxes were withheld. In addition, an individual may reside in one district and work in another.

• Table **FFO-6** includes customs collection of duties, taxes, and fees by districts and ports.

Second-Quarter Receipts

The following capsule analysis of budget receipts, by source, for the second quarter of fiscal year 2010 supplements fiscal data reported in the March issue of the "Treasury Bulletin." At the time of that issue's release, not enough data were available to adequately analyze collections for the quarter.

Individual income taxes—Individual income tax receipts, net of refunds, were \$185.8 billion for the second quarter of fiscal year 2010. This is an increase of \$11.4 billion over the comparable prior year quarter. Withheld receipts increased by \$10.6 billion and non-withheld receipts decreased by \$9.8 billion during this period. Refunds decreased by \$10.6 billion over the comparable fiscal year 2009 quarter. There was an increase of \$7.0 billion in accounting adjustments between individual income tax receipts and the Social Security and Medicare trust funds over the comparable quarter in fiscal year 2009.

Corporate income taxes—Net corporate income tax receipts were \$20.0 billion for the second quarter of fiscal year 2010. This is an increase of \$14.2 billion compared to the prior year second quarter. The \$14.2 billion change is

comprised of an increase of \$17.7 billion in estimated and final payments, and an increase of \$3.5 billion in corporate refunds.

Employment taxes and contributions—Employment taxes and contributions receipts for the second quarter of fiscal year 2010 were \$206.8 billion, a decrease of \$17.4 billion over the comparable prior year quarter. Receipts to the Federal Old-Age and Survivors Insurance, Federal Disability Insurance, and Federal Hospital Insurance trust funds changed by -\$11.0 billion, -\$1.9 billion, and -\$4.5 billion respectively. There was a -\$5.0 billion accounting adjustment for prior years employment tax liabilities made in the second quarter of fiscal year 2010, while there was a \$2.0 billion adjustment in the second quarter of fiscal year 2009.

Unemployment insurance—Unemployment insurance receipts, net of refunds, for the second quarter of fiscal year 2010 were \$5.3 billion, an increase of \$0.5 billion over the comparable quarter of fiscal year 2009. Net State taxes deposited in the U.S. Treasury increased by \$0.5 billion to \$4.1 billion. Net Federal Unemployment Tax Act taxes did not change significantly from \$1.2 billion.

Budget Results and Financing of the U.S. Government and Second-Quarter Receipts by Source, con.

Contributions for other insurance and retirement— Contributions for other retirement were \$0.9 billion for the second quarter of fiscal year 2010. This was a negligible change from the comparable quarter of fiscal year 2009.

Excise taxes—Net excise tax receipts for the second quarter of fiscal year 2010 were \$13.3 billion, a decrease of \$1.0 billion over the comparable prior year quarter. Total excise tax refunds for the quarter were \$3.7 billion, an increase of \$3.0 billion over the comparable prior year quarter.

Estate and gift taxes—Net estate and gift tax receipts were \$5.4 billion for the second quarter of fiscal year 2010.

These receipts represent a decrease of \$0.2 billion over the same quarter in fiscal year 2009.

Customs duties—Customs duties net of refunds were \$5.7 billion for the second quarter of fiscal year 2010. This is an increase of \$0.4 billion over the comparable prior year quarter.

Miscellaneous receipts—Net miscellaneous receipts for the second quarter of fiscal year 2010 were \$22.9 billion, an increase of \$15.9 billion over the comparable prior year quarter. This change is due in part to deposits of earnings by Federal Reserve banks increasing by \$16.2 billion.

INTRODUCTION: Source and Availability of the Balance in the Account of the U.S. Treasury

The Department of the Treasury's (Treasury's) operating cash is maintained in accounts with the Federal Reserve banks (FRBs) and branches, as well as in tax and loan accounts in other financial institutions. Major information sources include FRBs, Treasury Regional Financial Centers, Internal Revenue Service Centers, Bureau of the Public Debt, and various electronic systems. As the FRB accounts are depleted, funds are called in (withdrawn) from thousands of tax and loan accounts at financial institutions throughout the country.

Under authority of Public Law 95-147 (codified at 31 United States Code 323), Treasury implemented a program on November 2, 1978, to invest a portion of its operating cash in obligations of depositaries maintaining tax and loan accounts. Under the Treasury tax and loan (TT&L) investment program, depositary financial institutions select the manner in which they will participate. Financial institutions wishing to retain funds deposited into their tax

and loan accounts in interest-bearing obligations can participate. The program permits Treasury to collect funds through financial institutions and to leave the funds in TT&L depositaries and in the financial communities in which they arise until Treasury needs the funds for its operations. In this way, Treasury is able to neutralize the effect of its fluctuating operations on TT&L financial institution reserves and on the economy. Likewise, those institutions wishing to remit the funds to the Treasury account at FRBs do so as collector depositaries.

Deposits to tax and loan accounts occur as customers of financial institutions deposit tax payments that the financial institutions use to purchase Government securities. In most cases, this involves a transfer of funds from a customer's account to the tax and loan account in the same financial institution. Also, Treasury can direct the FRBs to invest excess funds in tax and loan accounts directly from the Treasury account at the FRBs.

¹ This report does not include Supplementary Financing Program balances. ² Represents transfers from tax and loan note accounts, proceeds from sales of securities other than Government account series, and taxes. ³ Represents checks paid, wire transfer payments, drawdowns on letters of credit,

redemptions of securities other than Government account series, and investment (transfer) of excess funds out of this account to the tax and loan note accounts.

⁴ Taxes eligible for credit consist of those deposited by taxpayers in the tax and loan depositaries as follows: withheld income taxes beginning March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950 and under the Railroad Retirement Tax Act beginning July 1951; a number of excise taxes beginning July 1953; estimated corporation income taxes beginning April 1967; all corporation income taxes due on or after March 15, 1968; Federal Unemployment Tax Act taxes beginning April 1970; and individual estimated income taxes beginning October

INTRODUCTION: Federal Debt

Treasury securities (i.e., public debt securities) comprise most of the Federal debt, with securities issued by other Federal agencies accounting for the rest. Tables in this section of the "Treasury Bulletin" reflect the total. Further detailed information is published in the "Monthly Statement of the Public Debt of the United States." Likewise, information on agency securities and on investments of Federal Government accounts in Federal securities is published in the "Monthly Treasury Statement of Receipts and Outlays of the United States Government."

Treasury's Financial Management Service (FMS) compiles data in the "Treasury Bulletin" tables FD-2 and FD-6 from the "Monthly Statement of the Public Debt of the United States."

- Table **FD-1** summarizes the Federal debt by listing public debt and agency securities held by the public, including the Federal Reserve. It also includes debt held by Federal agencies, largely by the Social Security and other Federal retirement trust funds. The net unamortized premium and discount also are listed by total Federal securities, securities held by Government accounts and securities held by the public. The difference between the outstanding face value of the Federal debt and the net unamortized premium and discount is classified as the accrual amount. (For greater detail on holdings of Federal securities by particular classes of investors, see the ownership tables, OFS-1 and OFS-2.)
- Table **FD-2** categorizes by type, that is, marketable and nonmarketable, the total public debt securities outstanding that are held by the public.
- In table **FD-3**, nonmarketable Treasury securities held by U.S. Government accounts are summarized by issues to particular funds within Government. Many of the funds invest in par value special series nonmarketables at interest rates determined by law. Others invest in market-based special Treasury securities whose terms mirror those of marketable securities.
- Table **FD-4** presents interest-bearing securities issued by Government agencies. Federal agency borrowing

has declined in recent years, in part because the Federal Financing Bank has provided financing to other Federal agencies. (Federal agency borrowing from Treasury is presented in the "Monthly Treasury Statement of Receipts and Outlays of the United States Government.")

• Table **FD-5** illustrates the average length of marketable interest-bearing public debt held by private investors and the maturity distribution of that debt.

In March 1971, Congress enacted a limited exception to the amount of bonds with rates greater than 4-1/4 percent that could be held by the public. This permitted Treasury to offer securities maturing in more than 7 years at current market interest rates for the first time since 1965. In March 1976, the definition of a bond was changed to include those securities longer than 10 years to maturity. This exception has expanded since 1971, authorizing Treasury to continue to issue long-term securities. The ceiling on Treasury bonds was repealed on November 10, 1988.

The volume of privately held Treasury marketable securities by maturity class reflects the remaining period to maturity of Treasury bills, notes and bonds. The average length is comprised of an average of remaining periods to maturity, weighted by the amount of each security held by private investors. In other words, computations of average length exclude Government accounts and the FRBs.

- In table **FD-6**, the debt ceiling is compared with the outstanding debt subject to limitation by law. The other debt category includes Federal debt Congress has designated as being subject to the debt ceiling.
- Table **FD-7** details Treasury holdings of securities issued by Government corporations and other agencies. Certain Federal agencies are authorized to borrow money from the Treasury, largely to finance direct loan programs. In addition, agencies such as the Bonneville Power Administration are authorized to borrow from the Treasury to finance capital projects. Treasury, in turn, finances these loans by selling Treasury securities to the public.

INTRODUCTION: Public Debt Operations

Chapter 31 of Title 31 of the United States Code allows the Secretary of Treasury to borrow money by issuing Treasury securities. The Secretary determines the terms and conditions of issue, conversion, maturity, payment, and interest rate. New issues of Treasury notes mature in 2 to 10 years. Bonds mature in more than 10 years from the issue date. Each outstanding marketable security is listed in the "Monthly Statement of the Public Debt of the United States." The information in this section of the "Treasury Bulletin" pertains only to marketable Treasury securities.

Table **PDO-1** presents the results of weekly auctions of 4-, 13-, and 26-week bills. Treasury bills mature each Thursday. Issues of 4- and 13-week bills are *reopenings* of 26-week bills. High yields on accepted tenders and the dollar value of total bids are presented, with the dollar value of awards made on both competitive and noncompetitive bases.

To encourage the participation of individuals and smaller institutions, Treasury accepts noncompetitive tenders of up to \$5 million for bills and \$5 million for notes and bonds in each auction of securities.

Table **PDO-2** lists the results of auctions of marketable securities, other than weekly bills, in chronological order over the past 2 years. Issues of *cash management* bills also are presented.

Note: Cash management bills identified below are issued as part of the Supplementary Financing Program (SFP). For more details about the SFP, visit www.treasury.gov/press/releases/hp1144.htm or call 202-622-2960.

Note: On February 4, 2009, Treasury announced the reintroduction of the 7-year note. The first auction of this security took place on February 26, 2009.

TREASURY FINANCING: JANUARY-MARCH

[Source: Bureau of the Public Debt, Office of Financing]

JANUARY

52-Week Bills

On January 7, 2010, Treasury announced it would auction \$26,000 million of 364-day Treasury bills. They were issued January 14, and will mature January 13, 2011. The issue was to refund \$110,008 million of all maturing bills and pay down approximately \$25,008 million. Treasury auctioned the bills on January 12. Tenders totaled \$94,458 million; Treasury accepted \$26,000 million, which included \$180 million of noncompetitive tenders from the public. The high bank discount rate was 0.335 percent.

Auction of 3-Year Notes

On January 7, 2010, Treasury announced it would auction \$40,000 million of 3-year notes. The issue was to refund \$26,295 million of securities maturing January 15 and to raise new cash of approximately \$57,705 million.

The 3-year notes of Series U-2013 were dated and issued January 15. They are due January 15, 2013, with interest payable on July 15 and January 15 until maturity. Treasury set

Auction of 9-Year 10-Month 3-3/8 Percent Notes

On January 7, 2010, Treasury announced it would auction \$21,000 million of 9-year 10-month 3-3/8 percent notes. The issue was to refund \$26,295 million of securities maturing January 15 and to raise new cash of approximately \$57,705 million.

an interest rate of 1-3/8 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon eastern time (e.t.) for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on January 12. Tenders totaled \$119,016 million; Treasury accepted \$40,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 1.490 percent with the equivalent price of \$99.663820. Treasury accepted in full all competitive tenders at yields lower than 1.490 percent. Tenders at the high yield were allotted 79.20 percent. The median yield was 1.452 percent, and the low yield was 1.388 percent. Noncompetitive tenders totaled \$82 million. Competitive tenders accepted from private investors totaled \$39,918 million.

In addition to the \$40,000 million of tenders accepted in the auction process, Treasury accepted \$1,553 million from Federal Reserve banks (FRBs) for their own accounts. On March 4, 2010, Treasury announced it would auction \$26,000 million of 364-day Treasury bills. They were issued March 11, and will mature March 10, 2011. The issue was to refund \$106,998 million of all maturing bills and to raise new cash of approximately \$29,002 million. Treasury auctioned the bills on March 9. Tenders totaled \$103,884 million; Treasury accepted \$26,000 million, which included \$166 million of noncompetitive tenders from the public. The high bank discount rate was 0.375 percent.

Auction of 3-Year Notes

On March 4, 2010, Treasury announced it would auction \$40,000 million of 3-year. The issue was to refund \$14,129 million of securities maturing March 15 and to raise new cash of approximately \$59,871 million.

The 3-year notes of Series W-2013 were dated and issued March 15. They are due March 15, 2013, with interest payable on September 15 and March 15 until maturity. Treasury set an interest rate of 1-3/8 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on March 9. Tenders totaled \$125,069 million; Treasury accepted \$40,000 million. noncompetitive and successful competitive bidders were allotted securities at the high yield of 1.437 percent with the equivalent price of \$99.818589. Treasury accepted in full all competitive tenders at yields lower than 1.437 percent. Tenders at the high yield were allotted 15.66 percent. The median yield was 1.403 percent, and the low yield was 1.340 percent. Noncompetitive tenders totaled \$70 million. Competitive tenders accepted from private investors totaled \$39,830 million.

In addition to the \$40,000 million of tenders accepted in the auction process, Treasury accepted \$473 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series W-2013 is \$100.

Auction of 9-Year 11-month 3-5/8 percent Notes

On March 4, 2010, Treasury announced it would auction \$21,000 million of 9-year 11-month 3-5/8 percent notes. The issue was to refund \$14,129 million of securities maturing March 15 and to raise new cash of approximately \$59,871 million.

The 9-year 11-month notes of Series B-2020 were dated February 15 and issued March 15. They are due February 15, 2020, with interest payable on August 15 and February 15 until maturity

Treasury received tenders for the notes before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on March 10. Tenders totaled \$72,466

million; Treasury accepted \$21,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 3.735 percent with an equivalent price of \$99.090493. Treasury accepted in full all competitive tenders at yields lower than 3.735 percent. Tenders at the high yield were allotted 70.94 percent. The median yield was 3.700 percent, and the low yield was 3.636 percent. Noncompetitive tenders totaled \$71 million. Competitive tenders accepted from private investors totaled \$20,830 million. Accrued interest of \$2.80387 per \$1,000 must be paid for the period from February 15 to March 15.

In addition to the \$21,000 million of tenders accepted in the auction process, Treasury accepted \$248 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series B-2020 is \$100.

Auction of 29-Year 11-Month 4-5/8 percent Bonds

On March 4, 2010, Treasury announced it would auction \$13,000 million of 29-year 11-month 4-5/8 percent bonds. The issue was to refund \$14,129 million of securities maturing March 15 and to raise new cash of approximately \$59,871 million.

The 29-year 11-month bonds of February 2040 were dated February 15 and issued March 15. They are due February 15, 2040, with interest payable on August 15 and February 15 until maturity.

Treasury received tenders for the bonds before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on March 11. Tenders totaled \$37,617 million; Treasury accepted \$13,000 noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.679 percent with an equivalent price of \$99.128159. Treasury accepted in full all competitive tenders at yields lower than 4.679 percent. Tenders at the high yield were allotted 82.80 percent. The median yield was 4.645 percent, and the low yield was 4.580 percent. Noncompetitive tenders totaled \$21 million. Competitive tenders accepted from private investors totaled \$12,979 million. Accrued interest of \$3.57735 per \$1,000 must be paid for the period from February 15 to March 15.

In addition to the \$13,000 million of tenders accepted in the auction process, Treasury accepted \$154 million from FRBs for their own accounts. The minimum par amount required for STRIPS of Bonds of February 2040 is \$100.

Auction of 2-Year Notes

On March 18, 2010, Treasury announced it would auction \$44,000 million of 2-year notes. The issue was to refund \$28,000 million of securities maturing March 31 and to raise new cash of approximately \$90,000 million.

The 2-year notes of Series AJ-2012 were dated and issued March 31. They are due March 31, 2012, with interest payable on September 30 and March 31 until maturity.

Treasury set an interest rate of 1 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on March 23. Tenders totaled \$132,127 Treasury accepted \$44,000 million. noncompetitive and successful competitive bidders were allotted securities at the high yield of 1.000 percent with an equivalent price of \$100.000000. Treasury accepted in full all competitive tenders at yields lower than 1.000 percent. Tenders at the high yield were allotted 56.32 percent. The median yield was 0.960 percent, and the low yield was 0.891 percent. Noncompetitive tenders totaled \$458 million. Competitive tenders accepted from private investors totaled \$43,517 million.

In addition to the \$44,000 million of tenders accepted in the auction process, Treasury accepted \$1,488 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series AJ-2012 is \$100.

Auction of 5-Year Notes

On March 18, 2010, Treasury announced it would auction \$42,000 million of 5-year notes. The issue was to refund \$28,000 million of securities maturing March 31 and to raise new cash of approximately \$90,000 million.

The 5-year notes of Series J-2015 were dated and issued March 31. They are due March 31, 2015, with interest payable on September 30 and March 31 until maturity. Treasury set an interest rate of 2-1/2 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on March 24. Tenders totaled \$107,225 million; Treasury accepted \$42,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 2.605 percent with an equivalent price of \$99.510730. Treasury accepted in full all competitive tenders at yields lower than 2.605 percent.

Tenders at the high yield were allotted 29.97 percent. The median yield was 2.539 percent, and the low yield was 2.450 percent. Noncompetitive tenders totaled \$121 million. Competitive tenders accepted from private investors totaled \$41,854 million.

In addition to the \$42,000 million of tenders accepted in the auction process, Treasury accepted \$1,421 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series J-2015 is \$100.

Auction of 7-Year Notes

On March 18, 2010, Treasury announced it would auction \$32,000 million of 7-year notes. The issue was to refund \$28,000 million of securities maturing March 31 and to raise new cash of approximately \$90,000 million.

The 7-year notes of Series J-2017 were dated and issued March 31. They are due March 31, 2017, with interest payable on September 30 and March 31 until maturity. Treasury set an interest rate of 3-1/4 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on March 25. Tenders totaled \$83,369 million; Treasury accepted \$32,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 3.374 percent with an equivalent price of \$99.232610. Treasury accepted in full all competitive tenders at yields lower than 3.374 percent. Tenders at the high yield were allotted 83.04 percent. The median yield was 3.289 percent, and the low yield was 3.229 percent. Noncompetitive tenders totaled \$46 million. Competitive tenders accepted from private investors totaled \$31,954 million.

In addition to the \$32,000 million of tenders accepted in the auction process, Treasury accepted \$1,082 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series J-2017 is \$100.

INTRODUCTION: Ownership of Federal Securities

Federal securities presented in the following tables are public debt securities such as savings bonds, bills, notes, and bonds that the Treasury issues. The tables also detail debt issued by other Federal agencies under special financing authorities. [See the Federal debt (FD) tables for a more complete description of the Federal debt.]

Effective January 1, 2001, Treasury's Bureau of the Public Debt revised formats, titles, and column headings in the "Monthly Statement of the Public Debt of the United States," Table I: Summary of Treasury Securities Outstanding and Table II: Statutory Debt Limit. These changes should reduce confusion and bring the publication more in line with the public's use of terms.

Treasury's Financial Management Service (FMS) compiles data in the "Treasury Bulletin" table OFS-1 from the "Monthly Statement of the Public Debt of the United States." Effective June 2001, FMS revised procedures and categories in this table to agree with the Bureau of the Public Debt's publication changes.

• Table **OFS-1** presents Treasury marketable and nonmarketable securities and debt issued by other Federal agencies held by Government accounts, the FRBs, and private investors. Social Security and Federal retirement trust fund investments comprise much of the Government account holdings.

The FRBs acquire Treasury securities in the market as a means of executing monetary policy.

• Table **OFS-2** presents the estimated ownership of U.S. Treasury securities. Information is primarily obtained from the Federal Reserve Board of Governors Flow of Funds data, Table L209. State, local, and foreign holdings include special issues of nonmarketable securities to municipal entities and foreign official accounts. They also include municipal, foreign official, and private holdings of marketable Treasury securities. (See footnotes to the table for description of investor categories.)

INTRODUCTION: U.S. Currency and Coin Outstanding and in Circulation

The U.S. Currency and Coin Outstanding and in Circulation (USCC) statement informs the public of the total face value of currency and coin used as a medium of exchange that is in circulation at the end of a given accounting month. The statement defines the total amount of currency and coin outstanding and the portion deemed to be in circulation. It includes some old and current rare issues that do not circulate or that may do so to a limited extent. Treasury includes them in the statement because the issues were originally intended for general circulation.

The USCC statement provides a description of the various issues of paper money. It also gives an estimated average of currency and coin held by each individual, using estimates of population from the Bureau of the Census. USCC information has been published by Treasury since 1888, and was published separately until 1983, when it was incorporated into the "Treasury Bulletin." The USCC comes from monthly reports compiled by Treasury offices, U.S. Mint offices, the Federal Reserve banks (FRBs), and the Federal Reserve Board.

INTRODUCTION: International Financial Statistics

The tables in this section provide statistics on U.S. Government reserve assets, liabilities to *foreigners*, and its international financial position. All monetary figures are in dollars or dollar equivalents.

- Table **IFS-1** shows reserve assets of the United States, including its gold stock, *special drawing rights* held in the Special Drawing Account in the *International Monetary Fund (IMF)*, holdings of convertible foreign currencies and reserve position in the *IMF*.
- Table IFS-2 contains statistics on liabilities to foreign official institutions, and selected liabilities to all other foreigners, which are used in the U.S. balance of payments statistics.
- Table **IFS-3** shows nonmarketable bonds and notes that the Treasury issues to official institutions and other residents of foreign countries.

TABLE IFS-1.—U.S. Reserve Assets

[In millions of dollars. Source: Treasury International Capital Reporting System]

End of calendar year or month	Total reserve assets ¹ (1)	Gold stock ² (2)	Special drawing rights ^{1, 3} (3)	Foreign currencies ⁴ (4)	Reserve position in International Monetary Fund ^{1, 5} (5)
2005	65,127	11,043	8,210	37,838	8,036
2006	65,895	11,041	8,870	40,943	5,040
2007	70,565	11,041	9,476	45,804	4,244
2008	77,648	11,041	9,340	49,584	7,683
2009 - Apr	75,115	11,041	9,098	46,725	8,250
May	81,738	11,041	9,412	49,247	12,037
June	81,489	11,041	9,437	48,897	12,113
July	82,931	11,041	9,444	49,876	12,571
Aug	126,846	11,041	52,660	50,453	12,692
Sept	134,296	11,041	57,945	51,840	13,470
Oct	134,690	11,041	58,147	51,903	13,599
Nov	135,020	11,041	59,381	53,525	11,073
Dec	130,760	11,041	57,814	50,520	11,385
2010 - Jan	129,960	11,041	57,316	50,217	11,386
Feb	129,293	11,041	56,525	50,185	11,541
Mar	127,521	11,041	55,996	48,885	11,598
Apr	126,481	11,041	55,733	48,270	11,437

¹ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing right (SDR) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and reserve position in the IMF also are valued on this basis beginning July 1974.

Note.—Detail may not add to totals due to rounding.

² Treasury values its gold stock at \$42.2222 per fine troy ounce and pursuant to 31 United States Code 5117 (b) issues gold certificates to the Federal Reserve at the same rate against all gold held.

³ Includes allocations of SDRs in the Special Drawing Account in the IMF, plus or minus transactions in SDRs. Recent allocations are as follows: August 2009—\$43,069 million and September 2009—\$4,529 million.

⁴ Includes holdings of Treasury and Federal Reserve System; beginning November 1978, these are valued at current market exchange rates or, where appropriate, at such other rates as may be agreed upon by the parties to the transactions. Excludes outstanding reciprocal currency swaps with foreign central banks. As of end-February 2010, there were no swaps outstanding.
⁵ The United States has the right to purchase foreign currencies equivalent to its

³ The United States has the right to purchase foreign currencies equivalent to its reserve position in the IMF automatically if needed. Under appropriate conditions, the United States could purchase additional amounts related to the U.S. quota.

Includes Bank for International Settlements.

Note.—Table is based on Treasury data and on data reported to the Treasury by banks, other depository institutions and brokers in the United States. Data generally correspond to statistics following in this section and in the "Capital Movements" section. Table excludes International Monetary Fund "holdings of dollars" and holdings of U.S. Treasury letters of credit and nonnegotiable noninterest-bearing special U.S. notes held by international and regional organizations.

Derived by applying reported transactions to benchmark data.
Includes current value of zero-coupon Treasury bond issues to foreign governments as follows: Mexico, beginning March 1990, 30-year maturity issue (Note: this bond was paid off in full in January 2004); Venezuela, beginning December 1990, 30-year maturity issue; Argentina, beginning April 1993, 30-year maturity issue. Also, see footnotes to table IFS-3.

Includes debt securities of U.S. Government corporations, federally-sponsored agencies.

and private corporations.

5 Includes liabilities payable in dollars to foreign banks and liabilities payable in foreign currencies to foreign banks and to "other foreigners."
⁶ Includes marketable U.S. Government bonds and notes held by foreign banks.

⁷ Principally the International Bank for Reconstruction and Development, the Inter-American Development Bank, and the Asian Development Bank.

⁸ Data on the two lines shown for this date reflect different benchmark bases for foreigners' holdings of selected U.S. long-term securities. Figures on the first line are comparable to those for earlier dates; figures on the second line are based in part on benchmark surveys as of end-June 2002, end-June 2003, end-June 2004, end-June 2005, end-June 2006, end-June 2007, end-June 2008, and end-June 2009 respectively, and are comparable to those shown for the following dates.

TABLE IFS-3.—Nonmarketable U.S. Treasury Bonds and Notes Issued to Official Institutions and Other Residents of Foreign Countries

¹ Beginning April 1993, includes current value (principal and accrued interest) of zerocoupon, 30-year maturity Treasury bond issue to the government of Argentina. Remaining face value of issue is \$264 million.

² Beginning December 1990, indicates current value of zero-coupon, 30-year maturity Treasury bond issue to the Republic of Venezuela. Remaining face value of issue is \$2,721 million.

INTRODUCTION: Capital Movements

Background

Data relating to U.S. international transactions in financial instruments and to other portfolio capital movements between the United States and foreign countries have been collected in some form since 1935. This information is necessary for compiling the U.S. balance of payments accounts, for calculating the U.S. international investment position, and for use in formulating U.S. international financial and monetary policies.

From the beginning, reporting under the Treasury data collection program has been mandatory. Under the current Treasury International Capital (TIC) reporting system, an assortment of monthly and quarterly reports are filed with district Federal Reserve banks by commercial banks. securities dealers, other financial institutions, nonbanking enterprises in the United States. These data are centrally processed and maintained at the Federal Reserve Bank of New York, which, along with the district banks, acts as fiscal agent for Treasury. Beginning in late 1998, the Federal Reserve Board also undertakes services on behalf of Treasury in support of the TIC data collection system. The TIC reports of individual respondents are treated as confidential, and access to the respondent level data is strictly limited to specific staff of Treasury and the Federal Reserve System.

Data derived from Treasury reports are published in the Capital Movements section of this quarterly *Treasury Bulletin* and are posted monthly on the TIC website, http://www.ustreas.gov/tic. (See NOTE at the end of the INTRODUCTION text for additional website information.) TIC data aggregates are also published in the *Federal Reserve Bulletin* and are used in the U.S. international transactions and investment position compilations published by the Department of Commerce in the *Survey of Current Business*.

Forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System and in consultation with representatives of banks, securities firms, and nonbanking enterprises. Requests for public comments on proposed changes are published in the Federal Register, and any further modifications are based on the comments received. The most recent revisions to selected reporting forms and instructions were effective June 30, 2006. The reporting forms and instructions may be downloaded from the TIC website. Copies of the reporting forms and instructions also may be obtained from the Global Economics Group, Office of the Assistant Secretary for International Affairs, Treasury, Washington, D.C. 20220; the International Finance Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551; or district Federal Reserve banks.

Basic definitions

The term "foreigner" as used in TIC reporting covers all institutions and individuals resident outside the United States, including: U.S. citizens domiciled abroad; the foreign branches, subsidiaries and offices of U.S. banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term "foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, information is reported opposite the country or geographical area where the foreigner is located, as shown on records of reporting institutions. This information may not always reflect the ultimate ownership of assets. Reporting institutions are not required to go beyond addresses shown on their records and may not be aware of the actual country of domicile of the ultimate beneficiary.

Transactions with branches or agencies of foreign official institutions, wherever located, are reported opposite the country that has sovereignty over the institutions. Transactions with international and regional organizations are not reported opposite any single country, but are accounted for in regional groupings of such organizations. Effective beginning with data for June 2006, information pertaining to the Bank for International Settlements is now included with data for international organizations, and information for the European Central Bank is distributed across the individual euro-area countries. For prior dates, information for these organizations is included in "Other Europe".

"Short-term" refers to obligations payable on demand or having an original maturity of one year or less. "Long-term" refers to obligations having an original maturity of more than one year and includes securities having no maturity.

Reporting coverage

TIC reports are required from banks and other depository institutions, bank/financial holding companies (BHCs/FHCs), securities brokers and dealers, and nonbanking concerns in the United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign banking and nonbanking firms. Institutions with total reportable liabilities, claims, or securities transactions below specified reporting thresholds are exempt from reporting.

Beginning in February 2003, substantial revisions to the coverage and formats of the TIC B-series and C-series forms were introduced. The reasons for the changes were to comply with new and expanded international standards for reporting data on portfolio investment; to reduce reporting burden; to clarify reporting concepts and instructions; and to improve the quality of the series by closing known gaps in the data.

Banks, other depository institutions, and securities brokers and dealers file monthly B-series reports covering their dollar liabilities to and dollar claims on foreigners in a number of countries. Quarterly reports are filed for liabilities and claims denominated in foreign currencies and for claims on foreigners held for respondents' domestic customers. All positions are exclusive of long-term securities. Beginning January 2001, the exemption level applicable to the banking reports was raised from \$15 million to \$50 million. This exemption level is also subject to the provision that reportable amounts for any one country do not exceed \$25 million.

Banks and other depository institutions, securities brokers and dealers, and other entities report their transactions with foreigners by country in long-term securities on monthly Form S. Respondents must report securities transactions with foreigners if their aggregate purchases or their aggregate sales amount to at least \$50 million during the covered month.

TIC Form D is filed quarterly by all U.S. resident banks, securities dealers, and other firms with worldwide holding of derivatives in their own and in their customers' accounts exceeding \$100 billion in notional value. Data from this information collection was first released on May 15, 2007, with data on holdings beginning from end-December 2005, and data on net settlements beginning from the first quarter of 2006.

Quarterly reports are also filed by exporters, importers, industrial and commercial concerns, financial institutions (other than banks, other depository institutions, and securities firms), and other nonbanking enterprises on their liabilities and claims positions with unaffiliated foreigners. Separate reports are filed for financial balances and for commercial balances. Effective for reports filed as of March 31, 2003, the threshold applicable to Form CQ-1 for reporting financial liabilities to, and claims on, foreigners is \$50 million, up from \$10 million. At the same time, the reporting threshold for Form CQ-2, which covers commercial liabilities and claims positions with foreigners, was raised from \$10 million to \$25 million.

Effective with the reports filed for June 2006, the country coverage of the monthly TIC forms was expanded significantly and the semiannual reports, which covered the smaller market economies, were discontinued. Country coverage was also expanded for the quarterly banking forms, the Form S, the Form D, and the Forms CQ-1 and CQ-2, effective with reports filed for June 2006.

The data in these tables do not cover all types of reported capital movements between the United States and other countries. Except as noted in Section IV in "Description of statistics" below, the principal exclusions are the intercompany capital transactions of nonbanking business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies (own foreign offices) and capital transactions of the U.S. Government. Consolidated data on all types of international

capital transactions are published by the Department of Commerce in its regular reports on the U.S. balance of payments.

Effective with the December 2009 Treasury Bulletin, a number of data reporters were reclassified in the TIC system as bank holding companies, beginning with the reports as of the fourth quarter of 2008. These data reporters are now included in the monthly bank-reported statistics and are no longer reporting as nonbanks.

Description of statistics

Data collected on the TIC forms are published in the "Capital Movements" tables in four sections. Each section contains all the data relevant to the same statistical series, with tables showing time series by type and country, and detailed breakdowns of the latest available data. The expansion of the country coverage on the standard report forms allows for publication of additional country detail for data beginning as of June 2006. As a result, the former Capital Movements Section III, which listed bank-reported claims and liabilities of selected countries from the semiannual reports, has been discontinued.

- **Section I** covers liabilities to foreigners reported by banks, other depository institutions, and securities brokers and dealers in the United States. BHCs/FHCs also report for all domestic nonbank, non-securities firm affiliates, other than their insurance affiliates, which report separately on the C-series forms. Dollar-denominated liabilities are reported monthly on Forms BL-1 and BL-2. Liabilities denominated in foreign currencies are reported quarterly on Form BQ-2. Respondents report certain of their own liabilities and a wide range of their custody liabilities to foreigners. Effective with reports filed as of February 28, 2003, coverage was broadened to cover the positions of U.S. broker-dealer respondents with their affiliated foreign offices. (Depository institutions and BHCs/FHCs already reported such positions.) The scope of the reports was also extended to include cross-border brokerage balances as well as offshore sweep accounts and loans to U.S. residents in "managed" foreign offices of U.S. reporting institutions. Additionally, in a new Part 2, Form BQ-2 was expanded to include the foreign currency-denominated liabilities held by respondents for their domestic customers. Further, banks' own positions have been defined to be consistent with regulatory reports such as the FR 2950/2951 to include all amounts in the respondent's "due to/due from" accounts, unless in an instrument that is specifically excluded. Finally, the columns for demand deposits and non-transactions accounts are now combined, as are short-term U.S. agency securities and other negotiable and readily transferable instruments.
- Section II presents claims on foreigners reported by banks, other depository institutions, and securities brokers and dealers in the United States. BHCs/FHCs also report for their domestic nonbank and non-securities firm affiliates, other than their insurance affiliates, which report

separately on the C-series forms. Data on respondents' own dollar claims are collected monthly on Form BC. Information on claims held for domestic customers as well as on claims denominated in foreign currencies is collected on a quarterly basis only on Forms BQ-1 and BQ-2, respectively. Effective with reports filed as of February 28, 2003, reporting coverage was expanded as outlined in Section I. Additionally, columns were added for separate reporting of issued by foreigners. Further, the foreigner category, negotiable CDs and other short-term negotiable instruments issued by foreigners. Further, the foreigner category, "foreign official institutions," replaced the former, broader category, "foreign public borrowers," for consistency with the liabilities reporting on this sector.

• Section III (formerly reported as Section IV) shows the liabilities to, and claims on, unaffiliated foreigners of exporters, importers, industrial and commercial concerns, financial institutions (other than banks, other depository institutions, and securities brokers and dealers), and other nonbanking enterprises in the United States. Data exclude claims on foreigners held by banks in the United States.

Historically, the TIC reports CQ-1 and CQ-2 exclude accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. Such accounts with foreign affiliates are reported by business enterprises to Commerce on its direct investment forms. There was an exception when reporting of foreign affiliate positions of insurance underwriting subsidiaries and financial intermediaries was included in Section B of Form CQ-1 for reports between end-March 2003 and end-March 2006. That reporting requirement was discontinued with the reports beginning as of June 2006.

• Section IV (formerly Section V) contains information on transactions with foreigners in long-term domestic and foreign securities as reported by banks, securities brokers and dealers, and other entities in the United States. The data cover transactions executed in the United States for the accounts of foreigners and transactions executed abroad for the accounts of reporting institutions and their domestic customers. This includes transactions in newly-issued securities as well as transactions in, and redemptions of, outstanding issues. However, the data do not include nonmarketable Treasury bonds and notes shown in Table IFS-3.

The geographical allocation of the transactions data indicates the country of location of the foreign buyers and sellers who deal directly with reporting institutions in the United States. The data do not necessarily indicate the country of beneficial owner or issuer, or the currency of denomination of securities. For instance, a U.S. purchaser's order for Japanese securities may be placed directly with an intermediary in London. In this instance, the transaction for Form S reporting purposes would be recorded opposite the

United Kingdom and not opposite Japan. Similarly, purchases and sales of U.S. securities for the account of an Italian resident may be placed, for example, in the Swiss market. In that case, the trades would be reported opposite Switzerland and not opposite Italy.

• Section V presents quarterly data on holdings and net cash settlements of cross-border derivatives contracts reported by banks, securities brokers, dealers, and nonfinancial companies in the U.S. with sizable holdings of derivatives contracts. Total holdings are divided between those contracts with positive fair values and those contracts with negative fair values from the perspective of the reporter. The fair (market) value is generally defined as the amount for which a derivative contract could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The data on U.S. net settlements with foreign residents include all cash receipts and payments made during the quarter for the acquisition, sale, or final closeout of derivatives, including all settlement payments under the terms of derivatives contracts such as the periodic settlement under a swap agreement and the daily settlement of an exchange-traded contract. In calculating net settlements, U.S. receipts of cash from foreign persons are positive amounts (+), and U.S. payments of cash to foreign persons are negative amounts (-). Items excluded from net settlements are: (a) collateral including initial and maintenance margins, whether or not in the form of cash; and (b) purchases of underlying commodities, securities, or other noncash assets. (e.g., the purchase/sale by foreigners of a long-term security is reported on TIC Form S).

The gross fair (market) values and net settlement payments on derivatives are reported by type of derivative and by country based on the residence of the direct foreign counterparty. Positions of foreign customers on U.S. exchanges are reported opposite the country in which the foreign counterparty resides. In the case of U.S. residents' futures contracts on foreign exchanges, the country of the exchange is reported as the country of the foreign counterparty.

NOTE: Current and historical data on United States transactions with foreigners in long-term securities on the gross foreign liabilities and claims reported by banks and nonbanks in the United States and on derivatives contracts with foreigners are available on the TIC website: http://www.ustreas.gov/tic. These data may be downloaded as separate time series for each country or geographical area regularly shown in the capital movements tables. Also available on this website are other series, including a table on "Major Foreign Holders of Treasury Securities," showing estimated total holdings of U.S. Treasury bills, bonds and notes for current and recent periods. All data series on the TIC website are updated monthly.

SECTION I.—Liabilities to Foreigners Reported by Banks in the United States

¹ Excludes negotiable certificates of deposit.

Excludes negotiable cermicates of deposit.

2 Includes both banks' own liabilities and banks' customer liabilities to foreigners primarily in the form of loans, including loans associated with repurchase agreements, and non-negotiable short-term securities.

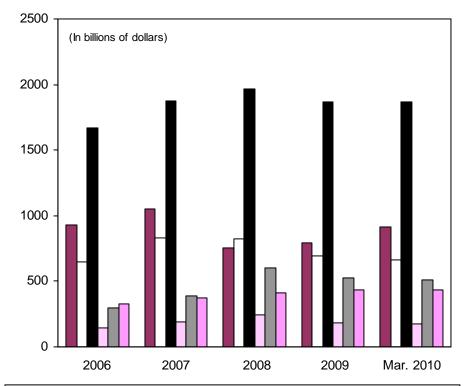

3 Foreign currency data are as of the previous quarter-end.

⁴ Includes Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, and Spain. For data as of January 2008, also includes Cyprus, Malta, and Slovenia. For data as of January 2009, also includes Slovakia.

⁵ Includes European, Latin American, Caribbean, Asian, African, and Middle East regional

organizations.

Grand total	4,010,359	4,706,310	4,807,794	4,502,333	4,557,583					

¹ Includes Bahamas, Bermuda, Cayman Islands, Netherlands Antilles, and Panama. For data beginning June 2006, also includes the British Virgin Islands.

U.S. liabilities to foreigners reported by U.S. banks were recorded at \$4.6 trillion in March 2010, an increase of \$55 billion from yearend 2009. U.S. banking liabilities include foreign holdings of U.S. short-term securities but exclude foreign holdings of U.S. long-term securities. U.S. banking liabilities decreased about \$305 billion in 2009 but increased about \$101 billion in 2008 and about \$696 billion in 2007. However, the 2008 increase is primarily attributed to the addition of several new bank holding companies to the reporter

U.S. banking liabilities are concentrated in international financial centers. The data on this page show that over 60 percent of U.S. banking liabilities is currently recorded against the United Kingdom and banking centers in the Caribbean. These financial centers recorded most of the growth in banking liabilities in the years just before the financial crisis and also most of the decline from 2007 through 2009. The United Kingdom, in particular, saw a sharp fall in recorded banking liabilities in 2008. However, the crisis affected other areas as well; U.S. banking liabilities to all other Europe and to Asia, including Japan, also declined during 2009. A slight downward trend in U.S. liabilities to foreigners persisted through the first quarter of 2010 for most countries except the United Kingdom, which experienced growth in its banking liabilities of nearly \$120 billion since yearend 2009.

In December 2009, U.S. claims on foreigners reported by U.S. banks amounted to about \$4.1 trillion, an increase of \$521 billion from that recorded at yearend 2008. U.S. banking claims include holdings of foreign short-term securities but exclude holdings of foreign longterm securities. U.S. banking claims decreased \$183 billion in 2008, despite an increase from the addition of several new bank holding companies to the reporter panel. However, such claims increased \$671 billion in 2007 and \$640 billion in 2006, although part of the 2006 increase reflects changes in coverage in the bankreported data in the first and second quarters of 2006.

As with U.S. banking liabilities, U.S. banking claims on foreigners are concentrated in international financial centers. More than 60 percent of these claims are reported opposite the United Kingdom and banking centers in the Caribbean. These financial centers recorded much of the growth in U.S. banking claims through 2007. During 2008, claims against Caribbean banking centers continued to grow while claims fell against the United Kingdom, other Europe, and most of Asia. This trend reversed in 2009 when claims against the Caribbean declined slightly while claims against all other foreigners grew. Despite the turmoil in financial markets in recent years, U.S. banking claims on foreigners have far surpassed their 2006 and 2007 levels.

¹ Includes Bahamas, Bermuda, Cayman Islands, Netherlands Antilles, and Panama. For data beginning June 2006, also includes the British Virgin Islands.

SECTION III.—Liabilities to, and Claims on, Unaffiliated Foreigners Reported by Nonbanking Business Enterprises in the United States

¹ Before June 2006, data for Cyprus, Kazakhstan, Monaco, and Ukraine are included in "All other Europe."
² On February 4, 2003, Yugoslavia changed its name to Serbia and Montenegro. Data for other entities of the former Yugoslavia recognized as independent states by the United States are reported under "All other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia, and Slovenia; and beginning in December 1994 for the former Yugoslav Republic of Macedonia.

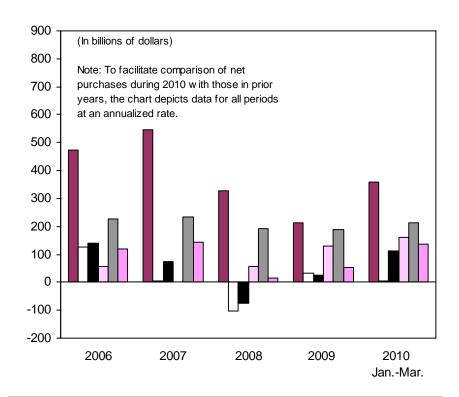

³ Includes Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, and Spain. For data as of January 2008, also includes Cyprus, Malta, and Slovenia. For data as of January 2009, also includes Slovakia.

⁴ Parker, June 2006, data for Coste Rice are included in "All other Latin America."

Before June 2006, data for Costa Rica are included in "All other Latin America."
 Before June 2006, data for Anguilla, Barbados, and the British Virgin Islands are included in "All other Caribbean."

⁶ Includes European, Latin America, Caribbean, Asian, African, and Middle East regional organizations.

¹ Includes Bahamas, Bermuda, Cayman Islands, Netherlands Antilles, and Panama. For data beginning June 2006, also includes the British Virgin Islands.

The data on this page represent foreign investors' purchases and sales of long-term U.S. securities (that is, U.S. Treasury and Government agency bonds and notes, and U.S. corporate bonds and stocks) as reported in the TIC reporting system. Foreign investors have also acquired U.S. equities through mergers and reincorporations that involve stock swaps, but these acquisitions have been relatively small recently, totaling only \$4 billion in 2006 and \$11 billion in 2007. There were no reported acquisitions through stock swaps in 2008. Acquisitions totaled less than \$1 billion in both 2009 and in the first quarter of 2010. (Stock swaps data for the most recent quarter are Federal Reserve Board/Treasury estimates and are subject to substantial revisions.) These stock swaps are not reported under the TIC reporting system, but are available on the TIC Website. The TIC Website also provides estimates from the Federal Reserve Bank of New York on principal repayment flows of foreign holdings of U.S. government agency and corporate asset-backed securities (ABS). These repayments are estimated to have reduced foreign net purchases of U.S. securities by \$160 billion in 2006, \$234 billion in 2007, \$191 billion in 2008, \$203 billion in 2009, and \$49 billion in the first quarter of 2010.

After including stock swaps and accounting for ABS repayment flows, net foreign acquisitions of U.S. securities totaled a record of \$987 billion in 2006, but then slowed to \$782 billion in 2007. Net acquisitions slowed further to \$221 billion in 2008, as foreign investors continued to acquire U.S. securities in the first half of the year, but on net sold U.S. securities in the second half of the year. Foreign net purchases recovered to \$436 billion in 2009, and the pace of acquisition picked up further in the first quarter of 2009, when foreign net purchases were recorded at \$197 billion.

CHART CM-D.—Net Purchases of Long-Term Foreign Securities by U.S. Investors*

 $^{^{\}star} \, \text{Net purchases by U.S. investors equal net sales by foreigners, or gross sales minus gross purchases of securities.}$

The data on this page represent U.S. investors' purchases and sales of longterm foreign securities as reported to the TIC reporting system. U.S. investors also have acquired foreign stocks through mergers that involve stock swaps. Net acquisitions through stock swaps amounted to \$4 billion in 2005, \$19 billion in 2006, \$12 billion in 2007, \$7 billion in 2008, and \$2 billion in 2009. No stock swaps were recorded during the first quarter of 2010. (Stock swaps data for the most recent quarter are Federal Reserve Board/Treasury estimates and are subject to substantial revisions.) These stock swaps are not reported under the TIC reporting system, but are available on the TIC Website.

Including acquisitions through stock swaps, U.S. net purchases of long-term foreign securities amounted \$176 billion in 2005 and \$270 billion in 2006, but then eased somewhat to \$241 billion in 2007. U.S. investors switched to net sales of \$80 billion in foreign securities in 2008. U.S. investors' acquisitions have recovered in 2009, amounting to \$199 billion. The pace of activity was similar during the first quarter of 2010, when U.S. investors acquired \$43 billion in foreign securities.

INTRODUCTION: Foreign Currency Positions

The "Treasury Bulletin" reports foreign currency holdings of large foreign exchange market participants. These reports provide information on positions in derivative instruments, such as foreign exchange futures and options, that are increasingly used in establishing foreign exchange positions but were not covered in the old reports.

The information is based on reports of large foreign exchange market participants on holdings of five major foreign currencies (Canadian dollar, Japanese yen, Swiss franc, pound sterling, and euro) and the U.S. dollar. Positions in the U.S. dollar, which have been collected since January 1999, are intended to approximate "all other" currency positions of reporting institutions. U.S.-based businesses file a consolidated report for their domestic and foreign subsidiaries, branches, and agencies. U.S. subsidiaries of foreign entities file only for themselves, not for their foreign parents. Filing is required by law (31 United States Code 5315; 31 Code of Federal Regulations 128, Subpart C).

Weekly and monthly reports must be filed throughout the calendar year by major foreign exchange market participants, which are defined as market participants with more than \$50 billion equivalent in foreign exchange contracts on the last business day of any calendar quarter during the previous year (end March, June, September, or December). Such contracts include the amounts of foreign exchange spot contracts bought and sold, foreign exchange forward contracts bought and sold, foreign exchange futures bought and sold, and one half the notional amount of foreign exchange options bought and sold.

A quarterly report must be filed throughout the calendar year by each foreign exchange market participant that had more than \$5 billion equivalent in foreign exchange contracts on the last business day of any quarter the previous year (end March, June, September, or December).

This information is published in six sections corresponding to each of the major currencies covered by the reports. Tables I-1 through VI-1 present the currency data reported weekly by major market participants. Tables I-2 through VI-2 present more detailed currency data of major market participants, based on monthly Treasury reports. Tables I-3 through VI-3 present quarterly consolidated currency data reported by large market participants that do not file weekly reports.

Principal exchanged under cross-currency interest rate swaps is reported as part of purchases or sales of foreign exchange. Such principal also was noted separately on monthly and quarterly reports through December 1998, when this practice was discontinued. The net options position, or the net delta-equivalent value of an options position, is an estimate of the relationship between an option's value and an equivalent currency hedge. The delta equivalent value is defined as the product of the first partial derivative of an option valuation formula (with respect to the price of the underlying currency) multiplied by the notional principal of the contract.

INTRODUCTION: Exchange Stabilization Fund

To stabilize the exchange value of the dollar, the Exchange Stabilization Fund (ESF) was established pursuant to chapter 6, section 10 of the Gold Reserve Act of January 30, 1934 (codified at 31 United States Code 5302), which authorized establishment of a Treasury fund to be operated under the exclusive control of the Secretary, with approval of the President.

Subsequent amendment of the Gold Reserve Act modified the original purpose somewhat to reflect termination of the fixed exchange rate system.

Resources of the fund include dollar balances, partially invested in U.S. Government securities, *special drawing rights* (SDRs), and balances of foreign currencies. Principal sources of income (+) or loss (-) for the fund are profits (+) or losses (-) on SDRs and foreign exchange, as well as interest earned on assets.

- Table **ESF-1** presents the assets, liabilities, and capital of the fund. The figures are in U.S. dollars or their equivalents based on current exchange rates computed according to the accrual method of accounting. The capital account represents the original capital appropriated to the fund by Congress of \$2 billion, minus a subsequent transfer of \$1.8 billion to pay for the initial U.S. quota subscription to the International Monetary Fund. Gains and losses are reflected in the cumulative net income (+) or loss (-) account.
- Table **ESF-2** shows the results of operations by quarter. Figures are in U.S. dollars or their equivalents computed according to the accrual method. "Profit (+) or loss (-) on foreign exchange" includes realized profits or losses. "Adjustment for change in valuation of SDR holdings and allocations" reflects net gain or loss on revaluation of SDR holdings and allocations for the quarter.

TABLE ESF-1.—Balances as of Sept. 30, 2009, and Dec. 31, 2009

		Oct. 1, 2009, through		
Assets, liabilities, and capital	Sept. 30, 2009	Dec. 31, 2009	Dec. 31, 2009	
Assets				
U.S. dollars:				
Held with Treasury:				
Fund Balance	-	-	-	
U.S. Government securities	19,816,089	626,244	20,442,333	
Government Sponsored Enterprises (GSE) Securities	1,100,000	-1,100,000	-

TABLE ESF-2.—Income and Expense

[In thousands of dollars. Source: Office of the Assistant Secretary of the Treasury for Management]

	Current quarter Oct. 1, 2009, through Dec. 31, 2009	Fiscal year to date Oct. 1, 2009, through Dec. 31, 2009
ncome and expense		
Profit (+) or loss (-) on:		
Foreign exchange	-725,129	-725,129
Adjustment for change in valuation of SDR holdings and allocations ¹	-27,500	-27,500
Interest (+) or net charges (-) on:		
SDRs	1,438	1,438
U.S. Government securities	2,110	2,110
GSE Securities	150	150
Foreign exchange	65,514	65,514
Insurance premiums	-	
Commissions	-	-
Income from operations	-683,417	-683,417
Net income (+) or loss (-)	-683,417	-683,417

¹ Beginning July 1974, the International Monetary Fund adopted a technique for valuing the SDRs based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and allocations are valued on this basis beginning July 1974.

Note.— Annual balance sheets for fiscal years 1934 through 1940 appeared in the 1940 "Annual Report of the Secretary of the Treasury" and those for succeeding years appeared in subsequent reports through 1980. Quarterly balance sheets beginning with December 31, 1938, have been published in the "Treasury Bulletin." Data from inception to September 30, 1978, may be found on the statements published in the January 1979 "Treasury Bulletin."

TABLE TF-6A.—Highway Trust Fund

The following information is released according to the provisions of the Byrd Amendment [codified at 26 United States Code 9503(d)] and represents data concerning the Highway Trust Fund. The figure described as "unfunded authorizations" is the latest estimate received from the DOT for fiscal year 2011.

The 48-month revenue estimates for the highway and mass transit accounts, respectively, include the latest estimates received from Treasury's Office of Tax Analysis for excise taxes, net of refunds. They represent net highway receipts for those periods beginning at the close of fiscal year 2011.

Glossary

With References to Applicable Sections and Tables

Source: Financial Management Service

Amounts outstanding and in circulation (USCC)—Includes all issues by the Bureau of the Mint purposely intended as a medium of exchange. Coins sold by the Bureau of the Mint at premium prices are excluded; however, uncirculated coin sets sold at face value plus handling charge are included.

Average discount rate (PDO-1, -2)—In Treasury bill auctions, purchasers tender competitive bids on a discount rate basis. The average discount rate is the weighted, or adjusted, average of all bids accepted in the auction.

Budget authority ("Federal Fiscal Operations")—Congress passes laws giving budget authority to Government entities, which gives the agencies the power to spend Federal funds. Congress can stipulate various criteria for the spending of these funds. For example, Congress can stipulate that a given agency must spend within a specific year, number of years, or any time in the future.

The basic forms of budget authority are appropriations, authority to borrow, contract authority, and authority to obligate and expend offsetting receipts and collections. The period of time during which Congress makes funds available may be specified as 1-year, multiple-year, or no-year. The available amount may be classified as either definite or indefinite; a specific amount or an unspecified amount can be made available. Authority also may be classified as current or permanent. Permanent authority requires no current action by Congress.

Budget deficit—The total, cumulative amount by which budget outlays (spending) exceed budget receipts (income).

Cash management bills (PDO-1)—Marketable Treasury bills of irregular maturity lengths, sold periodically to fund short-term cash needs of Treasury. Their sale, having higher minimum and multiple purchase requirements than those of other issues, is generally restricted to competitive bidders.

Competitive tenders ("Treasury Financing Operations")—A bid to purchase a stated amount of one issue of Treasury securities at a specified yield or discount. The bid is accepted if it is within the range accepted in the auction. (See Noncompetitive tenders.)

Currency no longer issued (USCC)—Old and new series gold and silver certificates, Federal Reserve notes, national bank notes, and 1890 Series Treasury notes.

Debt outstanding subject to limitation (FD-6)—The debt incurred by the Treasury subject to the statutory limit set by Congress. Until World War I, a specific amount of debt was authorized to each separate security issue. Beginning with the

Second Liberty Loan Act of 1917, the nature of the limitation was modified until, in 1941, it developed into an overall limit on the outstanding Federal debt. As of March 2010, the debt limit was \$14,294,000 million; the limit may change from year to year.

The debt subject to limitation includes most of Treasury's public debt except securities issued to the Federal Financing Bank, upon which there is a limitation of \$15 billion, and certain categories of older debt (totaling approximately \$595 million as of February 1991).

Discount—The interest deducted in advance when purchasing notes or bonds. (See Accrued discount.)

Discount rate (PDO-1)—The difference between par value and the actual purchase price paid, annualized over a 360-day year. Because this rate is less than the actual yield (coupon-equivalent rate), the yield should be used in any comparison with coupon issue securities.

Dollar coins (USCC)—Include standard silver and nonsilver coins.

Domestic series (**FD-2**)—Nonmarketable, interest- and non-interest-bearing securities issued periodically by Treasury to the Resolution Funding Corporation (RFC) for investment of funds authorized under section 21B of the Federal Home Loan Bank Act (12 United States Code 1441b).

Federal intrafund transactions ("Federal Fiscal Operations")—Intrabudgetary transactions in which payments and receipts both occur within the same Federal fund group (Federal funds or trust funds).

Federal Reserve notes (USCC)—Issues by the U.S. Government to the public through the Federal Reserve banks and their member banks. They represent money owed by the Government to the public. Currently, the item "Federal Reserve notes—amounts outstanding" consists of new series issues. The Federal Reserve note is the only class of currency currently issued.

Foreign ("Foreign Currency Positions," IFS-2, -3)—Locations other than those included under the definition of the United States. (See United States.)

Foreigner ("Capital Movements," IFS-2)—All institutions and individuals living outside the United States, including U.S. citizens living abroad, and branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; central governments, central banks, and other official institutions of countries other than the United States; and

GLOSSARY 107

international and regional organizations, wherever located. Also refers to persons in the United States to the extent that they are known by reporting institutions to be acting for foreigners.

Foreign official institutions ("Capital Movements")—Includes central governments of foreign countries, including all departments and agencies of national governments; central banks, exchange authorities, and all fiscal agents of foreign national governments that undertake activities similar to those of a treasury, central bank, or stabilization fund; diplomatic and consular establishments of foreign national governments; and any international or regional organization, including subordinate and affiliate agencies, created by treaty or convention between sovereign states.

Foreign public borrower ("Capital Movements")—Includes foreign official institutions, as defined above, the corporations and agencies of foreign central governments, including development banks and institutions, and other agencies that are majority-owned by the central government or its departments; and state provincial and local governments of foreign countries and their departments and agencies.

Foreign-targeted issue (PDO-2)—Foreign-targeted issues were notes sold between October 1984 and February 1986 to foreign institutions, foreign branches of U.S. institutions, foreign central banks or monetary authorities, or to international organizations in which the United States held membership. Sold as companion issues, they could be converted to domestic (normal) Treasury notes with the same maturity and interest rates. Interest was paid annually.

Fractional coins (USCC)—Coins minted in denominations of 50, 25, and 10 cents, and minor coins (5 cents and 1 cent).

Government account series (FD-2)—Certain trust fund statutes require the Secretary of the Treasury to apply monies held by these funds toward the issuance of nonmarketable special securities. These securities are sold directly by Treasury to a specific Government agency, trust fund, or account. Their rate is based on an average of market yields on outstanding Treasury obligations, and they may be redeemed at the option of the holder. Roughly 80 percent of these are issued to five holders: the Federal Old-Age and Survivors Insurance Trust Fund; the civil service retirement and disability fund; the Federal Hospital Insurance Trust Fund; the military retirement fund; and the Unemployment Trust Fund.

Interfund transactions ("Federal Fiscal Operations")— Transactions in which payments are made from one fund group (either Federal funds or trust funds) to a receipt account in another group.

International Monetary Fund ("Exchange Stabilization Fund," IFS-1)—(IMF) Established by the United Nations, the IMF promotes international trade, stability of exchange, and monetary cooperation. Members are allowed to draw from the fund.

Intrabudgetary transactions ("Federal Fiscal Operations")— These occur when payment and receipt both occur within the budget, or when payment is made from off-budget Federal entities whose budget authority and outlays are excluded from the budget totals.

Noncompetitive tenders ("Treasury Financing Operations")—This is a tender or bid to purchase a stated par amount of securities at the highest yield or discount rate awarded to competitive bidders for a single-price auction.

Obligations ("Federal Fiscal Operations")—An unpaid commitment to acquire goods or services.

Off-budget Federal entities ("Federal Fiscal Operations")— Federally owned and controlled entities whose transactions are excluded from the budget totals under provisions of law. Their receipts, outlays, and surplus or deficit are not included in budget receipts, outlays, or deficits. Their budget authority is not included in totals of the budget.

Outlays ("Federal Fiscal Operations")—Payments on obligations in the form of cash, checks, the issuance of bonds or notes, or the maturing of interest coupons.

Own foreign offices ("Capital Movements")—Refers to U.S. reporting institutions' parent organizations, branches and/or majority-owned subsidiaries located outside the United States.

Par value—The face value of bonds or notes, including interest.

Quarterly financing ("Treasury Financing Operations")—

Treasury has historically offered packages of several "coupon" security issues on the 15th of February, May, August, and November, or on the next working day. These issues currently consist of a 3-year note, a 10-year note, and a 30-year bond. Treasury sometimes offers additional amounts

issues currently consist of a 3-year note, a 10-year note, and a 30-year bond. Treasury sometimes offers additional amounts of outstanding long-term notes or bonds, rather than selling new security issues. (See Reopening.)

Receipts ("Federal Fiscal Operations")—Funds collected from selling land, capital, or services, as well as collections from the public (budget receipts), such as taxes, fines, duties, and fees.

Reopening (PDO-2)—The offer for sale of additional amounts of outstanding issues, rather than an entirely new issue. A reopened issue will always have the same maturity date, CUSIP-number, and interest rate as the original issue.

Special drawing rights ("Exchange Stabilization Fund," IFS-1)—International assets created by IMF that serve to increase international liquidity and provide additional international reserves. SDRs may be purchased and sold among eligible holders through IMF. (See IMF.)

SDR allocations are the counterpart to SDRs issued by IMF based on members' quotas in IMF. Although shown in Exchange Stabilization Fund (ESF) statements as liabilities,

108 GLOSSARY

they must be redeemed by ESF only in the event of liquidation of, or U.S. withdrawal from, the SDR department of IMF or cancellation of SDRs.

SDR certificates are issued to the Federal Reserve System against SDRs when SDRs are legalized as money. Proceeds of monetization are deposited into an ESF account at the Federal Reserve Bank of New York.

Spot ("Foreign Currency Positions")—Due for receipt or delivery within 2 workdays.

State and local government series (SLGS) (FD-2)—Special nonmarketable certificates, notes, and bonds offered to State and local governments as a means to invest proceeds from their own tax-exempt financing. Interest rates and maturities comply with IRS arbitrage provisions. SLGS are offered in both time deposit and demand deposit forms. Time deposit certificates have maturities of up to 1 year. Notes mature in 1 to 10 years and bonds mature in more than 10 years. Demand deposit securities are 1-day certificates rolled over with a rate adjustment daily.

Statutory debt limit (FD-6)—By Act of Congress there is a limit, either temporary or permanent, on the amount of public debt that may be outstanding. When this limit is reached, Treasury may not sell new debt issues until Congress

increases or extends the limit. For a detailed listing of changes in the limit since 1941, see the Budget of the United States Government. (See debt outstanding subject to limitation.)

STRIPS (PDO-2)—Separate Trading of Registered Interest and Principal Securities. Long-term notes and bonds may be divided into principal and interest-paying components, which may be transferred and sold in amounts as small as \$1,000. STRIPS are sold at auction at a minimum par amount, varying for each issue. The amount is an arithmetic function of the issue's interest rate.

Treasury bills—The shortest term Federal security (maturity dates normally varying from 3 to 12 months), are sold at a discount.

Trust fund transaction ("Federal Fiscal Operations")—An intrabudgetary transaction in which both payments and receipts occur within the same trust fund group.

United States—Includes the 50 States, District of Columbia, Commonwealth of Puerto Rico, American Samoa, Midway Island, Virgin Islands, Wake Island, and all other territories and possessions.

U.S. notes (**USCC**)—Legal tender notes of five different issues: 1862 (\$5-\$1,000 notes); 1862 (\$1-\$2 notes); 1863 (\$5-\$1,000 notes); 1863 (\$1-\$10,000 notes); and 1901 (\$10 notes).
