U.S. Government Standard General Ledger Account Transactions

This section provides accounting transactions for events occurring throughout the Federal Government. The transactions illustrate both proprietary and budgetary entries for each accounting event. Transactions are grouped under the following categories:

\triangleright	A 100-799	Funding Sources
\triangleright	B 100-699	Disbursements and Payables
\triangleright	C 100-799	Collections and Receivables
\triangleright	D 100-799	Adjustments/Writeoffs/Reclassifications
\triangleright	E 100-799	Accruals/Non-Budgetary Transfers Other Than Disbursements
		and Collections
\triangleright	F 100-499	Yearend
\triangleright	G 100-299	Memorandum Entries
\triangleright	Н 100-799	Other Specialized Transaction Entries

The above categories provide a basic framework for organizing the transactions. Also included, as a quick reference, is a listing of transaction descriptions. These accounting transactions document basic standard posting logic for financial events across the Federal Government.

The following notes explain conventions to follow when using the USSGL and the limitations of this compilation of USSGL transactions:

- There are valid accounting events/postings not yet documented. Agencies may engage in financial activity that the USSGL Board has not yet addressed. If so, submit an issue to the USSGL Board through the agency's USSGL representative. To illustrate the issue, document accounting events specific to the activity in a simple accounting scenario. Include references to specific legislation, accounting standards, or central agency requirements that make the activity unique from those currently documented. This documentation may be useful for explaining variances from the USSGL standard to auditors.
- For nonexpenditure transfers of budget authority between Treasury Appropriation Fund Symbols (TAFS), the "Transfer From" entity will determine the source of funds being transferred and record a proprietary USSGL account that designates the funding as being derived from either:
 - Unexpended appropriations from general fund resources not earmarked by law for a specific purpose - USSGL account 310300, "Unexpended Appropriations -Transfers-Out," or
 - Financing sources that impact cumulative results of operations USSGL account 576500, "Nonexpenditure Financing Sources Transfers-Out."

The "Transfer To" entity must use a propriety USSGL account that corresponds to the proprietary USSGL account used by the "Transfer From" entity. USSGL account 310200, "Unexpended Appropriations - Transfers-In" corresponds to USSGL account 3103. USSGL account 575500, "Nonexpenditure Financing Sources – Transfers-In" corresponds to USSGL account 576500. Failure of both entities to record the matching proprietary USSGL account category (310200/310300 or 575500/576500) will result in agency-wide and/or Government-wide elimination discrepancies.

• There may be mixed funding in a single TAFS. The net position of a TAFS may be a mix of:

- Unexpended appropriations derived from general fund resources not earmarked by law for a specific purpose, and
- Financing sources, such as Economy Act revenue, that impact cumulative results of operations.
- To facilitate reconciliation of interagency expenses and revenues, do not post cost directly to "inprocess type" asset accounts. Agencies must first record cost, such as direct labor (payroll and
 benefits) and direct materials that do not meet agency established capitalization thresholds, in the
 appropriate USSGL account 600000 series expense account. Use USSGL account 661000, "Cost
 Capitalization Offset" to apply the cost to the desired "in-process type" asset account. Do not
 record amounts applied to asset accounts under this method to USSGL account 88XXXX series
 accounts.
- The transactions illustrate USSGL accounts without applicable attribute values. Therefore, a single transaction listed here may translate to several similar transactions in the agency's accounting system depending on how many combinations of USSGL accounts and attribute values are valid to record the agency's activities. Agencies must post transactions using the 6-digit USSGL account plus valid attribute values to fully comply with implementation of the USSGL at the transaction level and to facilitate necessary central agency reporting. Additionally, since the 4-digit base account combined with valid attributes is itself a USSGL account, agencies must post debit and credit entries to reclassify balances even when the 6-digit base account is the same.
- Transactions affecting budgetary status may contain debit or credit postings to multiple USSGL status accounts that may be valid for a particular transaction. Choose a USSGL account appropriate to the status of authority in the affected TAFS and the accounting event recorded.
- All transactions apply to activity with Federal and non-Federal entities unless limited by account definition or otherwise noted in the transaction description.
- A USSGL transaction crosswalk (beginning with inception date 8/86), can be obtained at the USSGL Web site.
- The transaction reference provides an example of where this transaction appears. It may not provide all possible USSGL implementation guidance that contains this transaction.

B406 To record the delivery of goods and services in the same year the order was placed and to accrue a liability. The current-year expended authority is more than the original obligation.

Comment: If funded by a direct appropriation, also post TC-B134. For payroll and benefits, see USSGL TC-

E102. Assume a title has been passed when the goods are received. Also post USSGL TCs G120, G122, and G124 to track purchases. For "in-process type" accounts, see USSGL TC-D514. Due to the reconciliation of interagency expenses and revenues, agencies must first record all direct costs to a USSGL account 600000 expense series account and then

offset those amounts using USSGL account 661000 when the costs are capitalized to the appropriate "in-process type" account. For other payroll related transactions, see USSGL TCs-E104 through E117.

C430 To record an old motor vehicle that was traded in for a new motor vehicle using the direct method.

Comment: This entry is to show a trade-in only. An entry for indirect cost is not included. This is the way the

Department of Defense accounts for repairable items involving trade-ins. Accounts receivable represents the cash amount the vehicle procurer will receive from the customer. Inventory held for repair represents the value of an asset after it is repaired (value of a similar new asset). Other financing source represents fair market value of the old vehicle. Other financing source was used instead of revenue from goods sold due to a trade-in, which is not a budgetary resource. Inventory

allowance represents the estimated repair cost of the damaged vehicle.

SUPPLEMENT SECTION IV

U.S. Government Standard General Ledger USSGL Account Attributes

To meet external reporting requirements, agencies need data at a level below the 6-digit USSGL account. Agencies' systems must capture this information at the transaction level by recording transactions using USSGL 6-digit accounts plus attributes. This section provides an Attribute Definition Report and an Attribute Table for both proprietary and budgetary USSGL accounts and attributes reported to the Governmentwide Treasury Account Symbol Adjusted Trial Balance System (GTAS).

The Attribute Definition report provides definitions and related information for all attributes associated with each entry. Agencies will report on those attributes described in the detailed financial information entity. The Attribute Table shows USSGL accounts, account titles, and normal balance indicators for USSGL accounts that agencies will use for GTAS reporting. Also, the tables show related attributes agencies must provide for each USSGL account reported in GTAS

The USSGL proprietary account data in the Attribute Table shows the related attribute information captured at the transaction level that support production of the *Financial Report of the United States Government*. The USSGL crosswalks for the financial statements reference these attributes as a requirement for proper reporting on the particular financial statement line items.

Attributes are like adjectives that further describe a USSGL account in order to meet a specific reporting requirement. Domain values are all of the possible valid choices within an attribute. For example, if there is a red chair and a blue chair in a room, then you only need one attribute to describe them: color. The valid domain values within the attribute "color" would be "red" or "blue." If you wanted the red chair, there would be no need to use additional adjectives such as weight, height, or size to describe it. This is because, in this example, color is enough to uniquely identify the chair. Therefore, only those attributes and those domain values that are necessary to uniquely identify the reporting requirement appear on the crosswalks.

Note: Some USSGL accounts do not have certain attributes in this document for reporting purposes, but do require these attributes for accounting purposes. An example is downward adjustments of prior-year obligations. For reporting purposes, the following USSGL Accounts do not need the reimbursable flag attribute with the domain values of direct and reimbursable: USSGL accounts 487100, "Downward Adjustments of Prior-Year Unpaid Undelivered Orders – Obligations, Recoveries," 487200, "Downward Adjustments of Prior-Year Prepaid/Advanced Undelivered Orders – Obligations, Refunds Collected," 497100, "Downward Adjustments of Prior-Year Unpaid Delivered Orders – Obligations, Recoveries," and 497200, "Downward Adjustments of Prior-Year Paid Delivered Orders – Obligations, Refunds Collected.". However, at yearend these accounts close to the following USSGL accounts which require the reimbursable flag attribute for reporting: USSGL accounts 480100, "Undelivered Orders – Obligations, Unpaid," 480200, "Undelivered Orders – Obligations, Prepaid/Advanced," 490100, "Delivered Orders – Obligations, Unpaid," and 490200, "Delivered Orders – Obligations, Paid." Therefore, an agency must similarly identify the adjustment accounts to close these accounts properly.

SUPPLEMENT SECTION V

U.S. Government Standard General Ledger

SECTION V. USSGL Crosswalks to Standard External Reports

This section includes crosswalks for use in fiscal 2014 GTAS Implementation Testing. These crosswalks map USSGL accounts to external reports in accordance with current reporting guidance from the Office of Management and Budget (OMB), the Federal Accounting Standards Advisory Board (FASAB), and the Bureau of Fiscal Service.

Each report crosswalk lists the proper USSGL accounts and applicable attributes for each line and/or column on the reports. Attributes identify information subsidiary to the basic 6-digit USSGL accounts. This subsidiary information is necessary to meet external reporting requirements. See Section IV for additional information on attributes.

All crosswalks require preclosing USSGL account balances.

The following are crosswalks from the USSGL Chart of Accounts to standard external reports required by OMB and FMS:

	Page Number

Part 2 Fiscal Year 2014 Reporting

SUPPLEMENT Section V

Footnotes and Additional Information

- 1. When the same SBR line number uses both a beginning (B) and ending (E) balance for the same USSGL account, the beginning balance is subtracted from the ending balance.
- 2. Anticipated amounts should be zero for the yearend preclosing trial balance.
- The total of the specified balances in the USSGL accounts for this line should equal the beginning balances of USSGL accounts 4450, 4650, and 4620.
- 4. Distributed offsetting receipt accounts are included to reconcile to information in the Budget of the United States Government and the Combined Statement of Receipts, Outlays, and Balances of the United States Government. This line must equal cash deposits for distributed offsetting receipts to Treasury that are reported on SF 224, FMS 1219, and FMS 1220. In all cases, include only amounts collected, deposited, and distributed in offsetting receipt accounts. Refer to the Quarterly Distributed Offsetting Receipts by Department Reports published by FMS at www.fms.treas.gov/mts/receipts-by-dept.
- 5. This line corresponds with SF133/P&F line 1020. However, budgetary and financial statement requirements for reporting adjustments differs from one another. For budgetary reporting, materiality thresholds do not apply, whereas for financial statement reporting, materiality thresholds do apply. Therefore the balance of this line will not always tie with the balance of SF133/P&F line 1020.
- 6. This line corresponds with SF133/P&F line 3016. However, budgetary and financial statement requirements for reporting adjustments differs from one another. For budgetary reporting, materiality thresholds do not apply, whereas for financial statement reporting, materiality thresholds do apply. Therefore the balance of this line will not always tie with the balance of SF133/P&F line 3016.

SECTION VI. USSGL Crosswalks - Reclassified Statements

This section includes crosswalks for use in fiscal 2014 GTAS Implementation Testing. These crosswalks map USSGL accounts to external reports in accordance with TFM Volume I, Part 2, Chapter 4700, Agency Reporting Requirements for the *Financial Report of the United States Government*, Transmittal Letter 684, dated May 30, 2013.

Each report crosswalk lists the proper USSGL accounts and applicable attributes for each line and/or column on the reports. Attributes identify information subsidiary to the basic 6-digit USSGL accounts. This subsidiary information is necessary to meet external reporting requirements. See Section IV for additional information on attributes.

The following are crosswalks from the USSGL Chart of Accounts to standard external reports required by FMS:

Fiscal 2014 Reporting:	Page Number
USSGL Crosswalk Reclassified Balance Sheet	VI - 3
USSGL Crosswalk Reclassified Statement of Net Cost	VI - 29
 USSGL Crosswalk Reclassified Statement of Changes in Net Positio 	n VI - 37

Supplement Section VI Footnotes and Additional Information

- 1. For Reciprocal Category (RC) detail information, see TFM Volume 1, Part 2, Chapter 4700, Agency Reporting Requirements for the Financial Report of the United States Government, Appendix 7.
- 2. As defined in TFM, Volume I, Part 2, Chapter 4700, Agency Reporting Requirements for the Financial Report of the United States Government.
- 3. This account is associated with RC 24 rather than RC 29.
- 4. Seigniorage is defined as "Other Financing Sources" (see SFFAS No. 7, paragraph 305) and has a non-Federal attribute. A new line to accommodate seigniorage with an "N" attribute was not added to the "Other Financing Sources" line since seigniorage does not meet the Financial Report's materiality threshold. As a result, seigniorage was added to the "Other Taxes and Receipts" line instead.
- 5. Exclude General Fund activity in this account.
- 6. Budgetary portion only.
- 7. Non budgetary portion only.
- 8. This line now includes amounts previously captured in lines 7.10 and 7.11. If a new RC is established then the data can be segregated.
- 9. This line now includes amounts previously captured in lines 8.4 and 8.5. If a new RC is established then the data can be segregated.

U.S. Government Standard General Ledger Validations and Edits

One of the goals FMS has envisioned for GTAS is to improve the consistency in agency trial balance reporting. This will be accomplished through validations and edits.

The validations ensure that the attributes reported in agencies' GTAS trial balance submissions are valid for the USSGL account. The validations encompass both USSGL level attributes per the USSGL Attribute Table and Treasury Account Symbol (TAS) level attributes found in the Super Master Account (SMAF). Simple validations are those involving one attribute while special validations involve more than one attribute. All validations are fatal.

The edits compare the agency trial balances with USSGL rules and with data from authoritative sources such as the Central Accounting and Reporting System (CARS) the Bureau of Fiscal Service and the Federal Financing Bank. The edits may be either fatal or proposed. FMS will use the proposed edits only for analytical purposes. FMS disclaims any role or responsibility with the agency auditor relationship concerning the GTAS fatal and proposed analytical edits.

The following are the validation and edit reports included in this section:

- GTAS Validation Summary Report
- GTAS Validation Detail Report
- GTAS Edits Summary Report
- GTAS Edits Detail Report
- GTAS Closing Edits Report
