C124 To record the maturity of federal securities acquired at a discount by a Treasury Appropriation Fund Symbol (TAFS) other than a nonfiduciary deposit fund.

**Comment:** Prior to maturity, an entry is made to complete the amortization of a discount. The budgetary entry shows the purchase discount is realized as a budgetary resource when the security matures. Special and trust funds use USSGL account 411400, if budgetary resources were previously anticipated, revolving funds credit USSGL account 407000 and special and trust funds credit USSGL account 412000. Also post USSGL TC-A122 if authority was previously anticipated and apportioned or USSGL TCA123 if authority was previously anticipated in programs exempt from apportionment. Fiduciary deposit funds would not record the budgetary entry. See USSGL TC-A195, TC-C109, or TC-C140 to record the collection of interest received on the maturity. See USSGL TC-C128 to record the maturity of a U.S. Treasury Zero Coupon Bond issued by the Bureau of the Fiscal Service. C430 To record an old motor vehicle that was traded in for a new motor vehicle using the direct method.

Comment: This entry is to show a trade-in only. An entry for indirect cost is not included. This is the way the Department of Defense accounts for repairable items involving trade-ins. Accounts receivable represents the cash amount the vehicle procurer will receive from the customer. Inventory held for repair represents the value of an asset after it is repaired (value of a similar new asset). Other financing source represents fair market value of the old vehicle. Other financing source was used instead of revenue from goods sold due to a trade-in, which is not a budgetary resource. Inventory allowance represents the estimated repair cost of the damaged vehicle.
