U.S. Government Standard General Ledger Chart of Accounts

The Chart of Accounts provides the basic structure for the U.S. Government Standard General Ledger (USSGL). It incorporates both proprietary and budgetary accounts. The proprietary and budgetary sets of general ledger accounts are self-balancing (the total debits equal total credits). It is important to note that central agency reporting requires a lower level of detail than the 4-digit USSGL account numbers provided. Therefore, the USSGL Board developed attributes containing various domain values that, when added to a basic 4-digit USSGL account, provide the appropriate level of detail needed for central agency reporting and, in effect, create new USSGL accounts. See Section IV for attribute definitions and domain values. It is this lower level of detail, the basic 4-digit USSGL account plus applicable attribute domain values, that agencies must capture at the transaction level to (1) comply with USSGL policy contained herein, and (2) achieve the desired result for proper reporting.

The basic 4-digit USSGL accounts are classified as follows:

- **1000 Assets**
- **2000 Liabilities**
- **3000 Net Position**
- **4000 Budgetary**
- **5000 Revenue and Other Financing Sources**
- **6000 Expenses**
- **7000 Gains/Losses/Miscellaneous Items**
- **8000 Memorandum**

Agencies may expand this numbering system to as many digits as necessary to accommodate agency-specific requirements. However, subsidiary accounts must summarize or “roll-up” to the 4-digit USSGL accounts plus any related attributes as defined herein. The 9000 series of accounts are available for agencies to record and maintain agency-specific statistical and/or memorandum data.

In February 1999, the USSGL Board voted to delete summary accounts. However, agencies may summarize accounts as they find useful. Section headings replace many of the deleted summary accounts to maintain the integrity of the account structure.

The above categories provide a basic framework for organizing the transactions. Also included, as a quick reference, is a listing of transaction descriptions. These accounting transactions document basic standard posting logic for financial events across the Federal Government.

The following notes explain conventions to follow when using the USSGL and the limitations of this compilation of USSGL transactions:

- There are valid accounting events/postings not yet documented. Agencies may engage in financial activity that the USSGL Board has not yet addressed. If so, submit an issue to the USSGL Board through the agency's USSGL representative. To illustrate the issue, document accounting events specific to the activity in a simple accounting scenario. Include references to specific legislation, accounting standards, or central agency requirements that make the activity unique from those currently documented. This documentation may be useful for explaining variances from the USSGL standard to auditors.
- For nonexpenditure transfers of budget authority between Treasury Appropriation Fund Symbols (TAFS), the "Transfer From" entity will determine the source of funds being transferred and record a proprietary USSGL account that designates the funding as being derived from either:
 - Unexpended appropriations from general fund resources not earmarked by law for a specific purpose - USSGL account 3103, "Unexpended Appropriations - Transfers-Out," or
 - Financing sources that impact cumulative results of operations - USSGL account 5765, "Nonexpenditure Financing Sources – Transfers-Out."

The "Transfer To" entity must use a propriety USSGL account that corresponds to the proprietary USSGL account used by the "Transfer From" entity. USSGL account 3102, "Unexpended Appropriations - Transfers-In" corresponds to USSGL account 3103. USSGL account 5755, "Nonexpenditure Financing Sources – Transfers-In" corresponds to USSGL account 5765. Failure of both entities to record the matching proprietary USSGL account category (3102/3103 or 5755/5765) will result in agency-wide and/or Government-wide elimination discrepancies.

- There may be mixed funding in a single TAFS. The net position of a TAFS may be a mix of:
 - Unexpended appropriations derived from general fund resources not earmarked by law for a specific purpose, and
 - Financing sources, such as Economy Act revenue, that impact cumulative results of operations.
- To facilitate reconciliation of interagency expenses and revenues, do not post cost directly to “in-process type” asset accounts. Agencies must first record cost, such as direct labor (payroll and benefits) and direct materials that do not meet agency established capitalization thresholds, in the appropriate USSGL account 6000 series expense account. Use USSGL account 6610, “Cost Capitalization Offset” to apply the cost to the desired “in-process type” asset account. Do not record amounts applied to asset accounts under this method to USSGL account 88XX series accounts.
- The transactions illustrate USSGL accounts without applicable attribute values. Therefore, a single transaction listed here may translate to several similar transactions in the agency’s accounting system depending on how many combinations of USSGL accounts and attribute values are valid to record the agency’s activities. Agencies must post transactions using the 4-digit USSGL account plus valid attribute values to fully comply with implementation of the USSGL at the transaction level and to facilitate necessary central agency reporting. Additionally, since the 4-digit base account combined with valid attributes is itself a USSGL account, agencies must post debit and credit entries to reclassify balances even when the 4-digit base account is the same.
- Transactions affecting budgetary status may contain debit or credit postings to multiple USSGL status accounts that may be valid for a particular transaction. Choose a USSGL account appropriate to the status of authority in the affected TAFS and the accounting event recorded.
- All transactions apply to activity with Federal and non-Federal entities unless limited by account definition or otherwise noted in the transaction description.
- A USSGL transaction crosswalk (beginning with inception date 8/86), can be obtained at the USSGL Web site.
- The transaction reference provides an example of where this transaction appears. It may not provide all possible USSGL implementation guidance that contains this transaction.

- C430 To record an old motor vehicle that was traded in for a new motor vehicle using the direct method.
Comment: This entry is to show a trade-in only. An entry for indirect cost is not included. This is the way the Department of Defense accounts for repairable items involving trade-ins. Accounts receivable represents the cash amount the vehicle procurer will receive from the customer. Inventory held for repair represents the value of an asset after it is repaired (value of a similar new asset). Other financing source represents fair market value of the old vehicle. Other financing source was used instead of revenue from goods sold due to a trade-in, which is not a budgetary resource. Inventory allowance represents the estimated repair cost of the damaged vehicle.

U.S. Government Standard General Ledger USSGL Account Attributes

To meet external reporting requirements, agencies need data at a level below the 4-digit USSGL account. Agencies' systems must capture this information at the transaction level by recording transactions using USSGL 4-digit accounts plus attributes. This section provides USSGL attribute tables for both proprietary and budgetary USSGL accounts and attributes reported to the the FMS-administered FACTS I and FACTS II "trial-balance" reporting systems.

Attributes are like adjectives that further describe a USSGL account in order to meet a specific reporting requirement. Domain values are all of the possible valid choices within an attribute. For example, if there is a red chair and a blue chair in a room, then you only need one attribute to describe them: color. The valid domain values within the attribute "color" would be "red" or "blue." If you wanted the red chair, there would be no need to use additional adjectives such as weight, height, or size to describe it. This is because, in this example, color is enough to uniquely identify the chair. Therefore, only those attributes and those domain values that are necessary to uniquely identify the reporting requirement appear on the crosswalks.

Note: Some USSGL accounts do not have certain attributes in this document for reporting purposes, but do require these attributes for accounting purposes. An example is downward adjustments of prior-year obligations. For FACTS II reporting, USSGL accounts 4871, "Downward Adjustments of Prior-Year Unpaid Undelivered Orders – Obligations, Recoveries," 4872, "Downward Adjustments of Prior-Year Prepaid/Advanced Undelivered Orders – Obligations, Refunds Collected," 4971, "Downward Adjustments of Prior-Year Unpaid Delivered Orders – Obligations, Recoveries," and 4972, "Downward Adjustments of Prior-Year Paid Delivered Orders – Obligations, Refunds Collected," do not need the reimbursable flag attribute with the domain values of direct and reimbursable. However, at yearend these accounts close to USSGL accounts 4801, "Undelivered Orders – Obligations, Unpaid," 4802, "Undelivered Orders – Obligations, Prepaid/Advanced," 4901, "Delivered Orders – Obligations, Unpaid," and 4902, "Delivered Orders – Obligations, Paid," that do require the reimbursable flag attribute for FACTS II reporting. Therefore, an agency must similarly identify the adjustment accounts to close these accounts properly.

Attributes Used To Prepare the Financial Report of the United States Government

USSGL attributes are one component of detailed data in agencies' financial systems related to the external reporting of financial statements. The USSGL proprietary account data table shows the related attribute information captured at the transaction level that support production of the *Financial Report of the United States Government*. The USSGL crosswalks for the financial statements reference these attributes as a requirement for proper reporting on the particular financial statement line items.

Office of Management and Budget (OMB) Form and Content Agency Financial Reports

The USSGL proprietary attribute data table also shows the USSGL account attributes necessary to produce agency financial statements required by OMB. Refer to Section V: Crosswalks to Standard External Reports.

Attribute Definition Report

This report provides definitions for the attributes associated with each proprietary USSGL account for reporting. Agencies are required to report their adjusted trial balances and selected NOTES amounts in FACTS I with attributes described in the detailed financial information.

USSGL Proprietary Accounts and Attributes

The USSGL proprietary accounts table provides USSGL accounts, account titles, normal balance indicators, and associated attributes for USSGL accounts that agencies will use for reporting; these columns contain one of two values:

Space	Attributes are not required for the USSGL account.
Y	This value indicates that the attribute is required when this USSGL account is reported. A list of the valid domain values for each attribute is provided on the last page of the attribute table.

The FACTS I team may update between USSGL TFM releases. For the latest information, access the GFRS/FACTS I Web site at www.fms.treas.gov/factsi/index.html.

Fiscal 2011 Attributes Used To Prepare Budgetary Reports

USSGL attributes are one component of a data model that describes how detailed data in agencies' financial systems (for example, USSGL account balances with related attributes captured at the transaction level) relate to external requirements. The data model also shows the relationships between the budget accounts published in the President's Budget and the Treasury appropriation/fund symbols collected in FACTS II, which are published in the Treasury Annual Report/Appendix. The data model includes:

- ◆ FACTS II Attribute Definition Report;
- ◆ FACTS II USSGL Account Attributes Table.

FACTS II Attribute Definition Report

This report provides definitions and related information for all attributes associated with each entry. Agencies will report on those attributes described in the detailed financial information entity.

FACTS II USSGL Account Attribute Tables

The FACTS II attribute table for fiscal 2011 show USSGL accounts, account titles, and normal balance indicators for USSGL accounts that agencies will use for FACTS II reporting. Also, the tables show related attributes agencies must provide for each USSGL account reported in FACTS II; these columns contain one of three values:

Space	This attribute is not reported in FACTS II for the USSGL account.
Y	Yes, report this attribute in FACTS II when this USSGL account is submitted. To determine valid domain values, refer to the "FACTS II - Attribute Definition Report" in this section.

For the latest information, access the FACTS II Web site at www.fms.treas.gov/factsii/index.html.

FOOTNOTES AND ADDITIONAL INFORMATION:ADDITIONAL INFORMATION

- Use USSGL account attribute domains as provided in USSGL Section IV.

- The crosswalk from the USSGL to the Statement of Budgetary Resources (SBR) is in compliance with OMB Circular No. A-136, Financial Reporting Requirements.

- There are three major format differences between the SF 133 and the SBR.
 - The SBR is submitted on an agency-wide basis, whereas the SF 133 is submitted by Treasury Appropriation Fund Sybmol (TAFS.)
The SBR should include a separate column for nonbudgetary Credit Program financing accounts.

 - The SBR includes Distributed Offsetting Receipts to compute agency-wide Net Outlays while the SF 133 does not.

 - The SBR includes "prior-period adjustments" while the SF 133 includes "prior year adjustments." These terms are defined in OMB Circular No. A-136 and OMB Circular No. A-11.

- Information on the SBR should be consistent with budget execution information on the SF 133.

FOOTNOTES

- 1/ Anticipated amounts should be zero for the yearend preclosing trial balance.

- 2/ The total of the specified balances in the USSGL accounts for this line should equal the beginning balances of USSGL accounts 4450, 4650, and 4620.

- 3/ When the same SBR line number uses both a beginning (B) and ending (E) balance for the same USSGL account, the beginning balance is subtracted from the ending balance.

- 4/ Distributed offsetting receipt accounts are included to reconcile to information in the Budget of the United States Government and the Combined Statement of Receipts, Outlays, and Balances of the United States Government. This line must equal cash deposits for distributed offsetting receipts to Treasury that are reported on SF 224, FMS 1219, and FMS 1220. In all cases, include only amounts collected, deposited, and distributed in offsetting receipt accounts. Refer to the Quarterly Distributed Offsetting Receipts by Department Reports published by FMS at www.fms.treas.gov/mts/receipts-by-dept.

SECTION V

Footnotes and Additional Information:

Comment: If collecting entities recognize virtually no cost in connection with earning revenue, that revenue is reported on the Statement of Custodial Activity. (See amendments to OMB Circular No. A-136 "Financial Reporting Requirements," and " FASAB SFFAS No. 7 "Accounting for Revenue and Other Financing Sources," paragraph 45). If collecting entities have custodial collections that are nonmaterial and incidental to their primary mission, then sources and disposition of the collections may be disclosed in accompanying footnotes. (See amendments to OMB Circular No. A-136.)

Footnotes:

1/ Use USSGL account attribute domains as provided in USSGL Section IV, page 4.

2/ Interest revenue not related to the cost incurred by the collecting entity should be reported on the SCA. See SFFAS 7, paragraph 281.

3/ (Increase)/Decrease

4/ Related to other revenue.

5/ Related to tax revenue refunded and custodial interest expense

6/ Related to tax revenue refunds.

7/ If the balance of USSGL account 5990 is used to get the amount of cash collected for others, then USSGL account 2980 should not be used. USSGL account 2980 is included on the crosswalk as an alternative to using USSGL account 5990.

8/ Cash collections only - from debits to 2980.

9/ By definition, the USSGL account can only have this USSGL account attribute domain.

10/ Amount yet to be collected.

11/ Must equal zero.

12/ This account is available for MMS for recording royalty credit. All other agencies need Treasury approval to use this account on this statement.

SECTION VI. USSGL Crosswalks - Reclassified Statements

This section includes crosswalks for use in fiscal 2011. These crosswalks map USSGL accounts to external reports in accordance with TFM Volume I, Part 2, Chapter 4700, Agency Reporting Requirements for the *Financial Report of the United States Government*, Transmittal Letter 663, dated June 16, 2011.

Each report crosswalk lists the proper USSGL accounts and applicable attributes for each line and/or column on the reports. Attributes identify information subsidiary to the basic 4-digit USSGL accounts. This subsidiary information is necessary to meet external reporting requirements. See Section IV for additional information on attributes.

The following are crosswalks from the USSGL Chart of Accounts to standard external reports required by FMS:

SUPPLEMENT**SECTION VI****Footnotes and Additional Information:**

1/ Use USSGL account attribute domains as provided in USSGL Section IV, page 4.

2/ For Reciprocal Category (RC) detail information, see TFM Volume 1, Part 2, Chapter 4700, Agency Reporting Requirements for the Financial Report of the United States Government, Appendix 7.

3/ As defined in TFM, Volume I, Part 2, Chapter 4700, Agency Reporting Requirements for the Financial Report of the United States Government.

4/ This account is associated with RC 24 rather than RC 29.

5/ Seigniorage is defined as "Other Financing Sources" (see SFFAS No. 7, paragraph 305) and has a non-Federal attribute. A new line to accommodate seigniorage with an "N" attribute was not added to the "Other Financing Sources" line since seigniorage does not meet the Financial Report's materiality threshold. As a result, seigniorage was added to the "Other Taxes and Receipts" line instead.

6/ Exclude General Fund (Trading Partner code 9900) activity in this account.

7/ Budgetary portion only.

8/ Non budgetary portion only.

9/ Report only General Fund (Trading Partner code 9900) activity associated with this account. Beginning fiscal 2013, with the implementation of GTAS (<http://fms.treas.gov/gtas/index.html>), there will be a new Federal/NonFederal attribute domain value for General Fund "G" for General Fund.

10/ Not related to the General Fund.

U.S. Government Standard General Ledger Chart of Accounts

The Chart of Accounts provides the basic structure for the U.S. Government Standard General Ledger (USSGL). It incorporates both proprietary and budgetary accounts. The proprietary and budgetary sets of general ledger accounts are self-balancing (the total debits equal total credits). It is important to note that central agency reporting requires a lower level of detail than the 4-digit USSGL account numbers provided. Therefore, the USSGL Board developed attributes containing various domain values that, when added to a basic 4-digit USSGL account, provide the appropriate level of detail needed for central agency reporting and, in effect, create new USSGL accounts. See Section IV for attribute definitions and domain values. It is this lower level of detail, the basic 4-digit USSGL account plus applicable attribute domain values, that agencies must capture at the transaction level to (1) comply with USSGL policy contained herein, and (2) achieve the desired result for proper reporting.

The basic 4-digit USSGL accounts are classified as follows:

- **1000 Assets**
- **2000 Liabilities**
- **3000 Net Position**
- **4000 Budgetary**
- **5000 Revenue and Other Financing Sources**
- **6000 Expenses**
- **7000 Gains/Losses/Miscellaneous Items**
- **8000 Memorandum**

Agencies may expand this numbering system to as many digits as necessary to accommodate agency-specific requirements. However, subsidiary accounts must summarize or “roll-up” to the 4-digit USSGL accounts plus any related attributes as defined herein. The 9000 series of accounts are available for agencies to record and maintain agency-specific statistical and/or memorandum data.

In February 1999, the USSGL Board voted to delete summary accounts. However, agencies may summarize accounts as they find useful. Section headings replace many of the deleted summary accounts to maintain the integrity of the account structure.

USSGL accounts appearing in bold are new or indicate a change from the Fiscal 2011 reporting in Part 1 (changes to the title, normal balance, and/or definition).

U.S. Government Standard General Ledger Account Transactions

This section provides accounting transactions for events occurring throughout the Federal Government. The transactions illustrate both proprietary and budgetary entries for each accounting event. Transactions are grouped under the following categories:

➤	A 100-799	Funding Sources
➤	B 100-699	Disbursements and Payables
➤	C 100-799	Collections and Receivables
➤	D 100-799	Adjustments/Writeoffs/Reclassifications
➤	E 100-799	Accruals/Non-Budgetary Transfers Other Than Disbursements and Collections
➤	F 100-499	Yearend
➤	G 100-299	Memorandum Entries
➤	H 100-399	Other Specialized Transaction Entries

The above categories provide a basic framework for organizing the transactions. Also included, as a quick reference, is a listing of transaction descriptions. These accounting transactions document basic standard posting logic for financial events across the Federal Government.

The following notes explain conventions to follow when using the USSGL and the limitations of this compilation of USSGL transactions:

- There are valid accounting events/postings not yet documented. Agencies may engage in financial activity that the USSGL Board has not yet addressed. If so, submit an issue to the USSGL Board through the agency's USSGL representative. To illustrate the issue, document accounting events specific to the activity in a simple accounting scenario. Include references to specific legislation, accounting standards, or central agency requirements that make the activity unique from those currently documented. This documentation may be useful for explaining variances from the USSGL standard to auditors.
- For nonexpenditure transfers of budget authority between Treasury Appropriation Fund Symbols (TAFS), the "Transfer From" entity will determine the source of funds being transferred and record a proprietary USSGL account that designates the funding as being derived from either:
 - Unexpended appropriations from general fund resources not earmarked by law for a specific purpose - USSGL account 3103, "Unexpended Appropriations - Transfers-Out," or
 - Financing sources that impact cumulative results of operations - USSGL account 5765, "Nonexpenditure Financing Sources – Transfers-Out."

The "Transfer To" entity must use a propriety USSGL account that corresponds to the proprietary USSGL account used by the "Transfer From" entity. USSGL account 3102, "Unexpended Appropriations - Transfers-In" corresponds to USSGL account 3103. USSGL account 5755, "Nonexpenditure Financing Sources – Transfers-In" corresponds to USSGL account 5765. Failure of both entities to record the matching proprietary USSGL account category (3102/3103 or 5755/5765) will result in agency-wide and/or Government-wide elimination discrepancies.

- There may be mixed funding in a single TAFS. The net position of a TAFS may be a mix of:
 - Unexpended appropriations derived from general fund resources not earmarked by law for a specific purpose, and
 - Financing sources, such as Economy Act revenue, that impact cumulative results of operations.
- To facilitate reconciliation of interagency expenses and revenues, do not post cost directly to “in-process type” asset accounts. Agencies must first record cost, such as direct labor (payroll and benefits) and direct materials that do not meet agency established capitalization thresholds, in the appropriate USSGL account 6000 series expense account. Use USSGL account 6610, “Cost Capitalization Offset” to apply the cost to the desired “in-process type” asset account. Do not record amounts applied to asset accounts under this method to USSGL account 88XX series accounts.
- The transactions illustrate USSGL accounts without applicable attribute values. Therefore, a single transaction listed here may translate to several similar transactions in the agency’s accounting system depending on how many combinations of USSGL accounts and attribute values are valid to record the agency’s activities. Agencies must post transactions using the 4-digit USSGL account plus valid attribute values to fully comply with implementation of the USSGL at the transaction level and to facilitate necessary central agency reporting. Additionally, since the 4-digit base account combined with valid attributes is itself a USSGL account, agencies must post debit and credit entries to reclassify balances even when the 4-digit base account is the same.
- Transactions affecting budgetary status may contain debit or credit postings to multiple USSGL status accounts that may be valid for a particular transaction. Choose a USSGL account appropriate to the status of authority in the affected TAFS and the accounting event recorded.
- All transactions apply to activity with Federal and non-Federal entities unless limited by account definition or otherwise noted in the transaction description.
- A USSGL transaction crosswalk (beginning with inception date 8/86), can be obtained at the USSGL Web site.
- The transaction reference provides an example of where this transaction appears. It may not provide all possible USSGL implementation guidance that contains this transaction.

Comment: For amounts paid by a direct appropriation, also post USSGL TC-B134. Due to reconciliation of interagency expenses and revenues, agencies must first record all direct costs to the USSGL account 6000 series and then offset those amounts using USSGL account 6610 (see USSGL TC-D514), when the costs are capitalized to the appropriate "in-process" type asset accounts. Note: Agency systems may accumulate payroll in USSGL account 6100 during the year and distribute those costs to the various "in-process" accounts at yearend. Also, for employment benefits such as pension, health, and life insurance, see USSGL TCs-B604, E104, and E106.

Comment: This entry is to show a trade-in only. An entry for indirect cost is not included. This is the way the Department of Defense accounts for repairable items involving trade-ins. Accounts receivable represents the cash amount the vehicle procurer will receive from the customer. Inventory held for repair represents the value of an asset after it is repaired (value of a similar new asset). Other financing source represents fair market value of the old vehicle. Other financing source was used instead of revenue from goods sold due to a trade-in, which is not a budgetary resource. Inventory allowance represents the estimated repair cost of the damaged vehicle.

U.S. Government Standard General Ledger USSGL Account Attributes

To meet external reporting requirements, agencies need data at a level below the 4-digit USSGL account. Agencies' systems must capture this information at the transaction level by recording transactions using USSGL 4-digit accounts plus attributes. This section provides USSGL attribute tables for both proprietary and budgetary USSGL accounts and attributes reported to the the FMS-administered FACTS I and FACTS II "trial-balance" reporting systems.

Attributes are like adjectives that further describe a USSGL account in order to meet a specific reporting requirement. Domain values are all of the possible valid choices within an attribute. For example, if there is a red chair and a blue chair in a room, then you only need one attribute to describe them: color. The valid domain values within the attribute "color" would be "red" or "blue." If you wanted the red chair, there would be no need to use additional adjectives such as weight, height, or size to describe it. This is because, in this example, color is enough to uniquely identify the chair. Therefore, only those attributes and those domain values that are necessary to uniquely identify the reporting requirement appear on the crosswalks.

Note: Some USSGL accounts do not have certain attributes in this document for reporting purposes, but do require these attributes for accounting purposes. An example is downward adjustments of prior-year obligations. For FACTS II reporting, USSGL accounts 4871, "Downward Adjustments of Prior-Year Unpaid Undelivered Orders – Obligations, Recoveries," 4872, "Downward Adjustments of Prior-Year Prepaid/Advanced Undelivered Orders – Obligations, Refunds Collected," 4971, "Downward Adjustments of Prior-Year Unpaid Delivered Orders – Obligations, Recoveries," and 4972, "Downward Adjustments of Prior-Year Paid Delivered Orders – Obligations, Refunds Collected," do not need the reimbursable flag attribute with the domain values of direct and reimbursable. However, at yearend these accounts close to USSGL accounts 4801, "Undelivered Orders – Obligations, Unpaid," 4802, "Undelivered Orders – Obligations, Prepaid/Advanced," 4901, "Delivered Orders – Obligations, Unpaid," and 4902, "Delivered Orders – Obligations, Paid," that do require the reimbursable flag attribute for FACTS II reporting. Therefore, an agency must similarly identify the adjustment accounts to close these accounts properly.

Attributes Used To Prepare the Financial Report of the United States Government

USSGL attributes are one component of detailed data in agencies' financial systems related to the external reporting of financial statements. The USSGL proprietary account data table shows the related attribute information captured at the transaction level that support production of the *Financial Report of the United States Government*. The USSGL crosswalks for the financial statements reference these attributes as a requirement for proper reporting on the particular financial statement line items.

Office of Management and Budget (OMB) Form and Content Agency Financial Reports

The USSGL proprietary attribute data table also shows the USSGL account attributes necessary to produce agency financial statements required by OMB. Refer to Section V: Crosswalks to Standard External Reports.

Attribute Definition Report

This report provides definitions for the attributes associated with each proprietary USSGL account for reporting. Agencies are required to report their adjusted trial balances and selected NOTES amounts in FACTS I with attributes described in the detailed financial information.

USSGL Proprietary Accounts and Attributes

The USSGL proprietary accounts table provides USSGL accounts, account titles, normal balance indicators, and associated attributes for USSGL accounts that agencies will use for reporting; these columns contain one of two values:

Space	Attributes are not required for the USSGL account.
Y	This value indicates that the attribute is required when this USSGL account is reported. A list of the valid domain values for each attribute is provided on the last page of the attribute table.

The FACTS I team may update between USSGL TFM releases. For the latest information, access the GFRS/FACTS I Web site at www.fms.treas.gov/factsi/index.html.

Fiscal 2012 Attributes Used To Prepare Budgetary Reports

USSGL attributes are one component of a data model that describes how detailed data in agencies' financial systems (for example, USSGL account balances with related attributes captured at the transaction level) relate to external requirements. The data model also shows the relationships between the budget accounts published in the President's Budget and the Treasury appropriation/fund symbols collected in FACTS II, which are published in the Treasury Annual Report/Appendix. The data model includes:

- ◆ FACTS II Attribute Definition Report;
- ◆ FACTS II USSGL Account Attributes Table.

FACTS II Attribute Definition Report

This report provides definitions and related information for all attributes associated with each entry. Agencies will report on those attributes described in the detailed financial information entity.

FACTS II USSGL Account Attribute Tables

The FACTS II attribute table for fiscal 2012 show USSGL accounts, account titles, and normal balance indicators for USSGL accounts that agencies will use for FACTS II reporting. Also, the tables show related attributes agencies must provide for each USSGL account reported in FACTS II; these columns contain one of three values:

Space	This attribute is not reported in FACTS II for the USSGL account.
Y	Yes, report this attribute in FACTS II when this USSGL account is submitted. To determine valid domain values, refer to the "FACTS II - Attribute Definition Report" in this section.

For the latest information, access the FACTS II Web site at www.fms.treas.gov/factsii/index.html.

FOOTNOTES AND ADDITIONAL INFORMATION:ADDITIONAL INFORMATION

- Use USSGL account attribute domains as provided in USSGL Section IV.
- The crosswalk from the USSGL to the Statement of Budgetary Resources (SBR) is in compliance with OMB Circular No. A-136, Financial Reporting Requirements.
- There are three major format differences between the SF 133 and the SBR.
 - The SBR is submitted on an agency-wide basis, whereas the SF 133 is submitted by Treasury Appropriation Fund Symbol (TAFS.) The SBR should include a separate column for nonbudgetary Credit Program financing accounts.
 - The SBR includes Distributed Offsetting Receipts to compute agency-wide Net Outlays while the SF 133 does not.
 - The SBR includes "prior-period adjustments" while the SF 133 includes "prior year adjustments." These terms are defined in OMB Circular No. A-136 and OMB Circular No. A-11.
- Information on the SBR should be consistent with budget execution information on the SF 133.

FOOTNOTES

- 1/ When the same SBR line number uses both a beginning (B) and ending (E) balance for the same USSGL account, the beginning balance is subtracted from the ending balance.
- 2/ Anticipated amounts should be zero for the yearend preclosing trial balance.
- 3/ The total of the specified balances in the USSGL accounts for this line should equal the beginning balances of USSGL accounts 4450, 4650, and 4620.
- 4/ Distributed offsetting receipt accounts are included to reconcile to information in the Budget of the United States Government and the Combined Statement of Receipts, Outlays, and Balances of the United States Government. This line must equal cash deposits for distributed offsetting receipts to Treasury that are reported on SF 224, FMS 1219, and FMS 1220. In all cases, include only amounts collected, deposited, and distributed in offsetting receipt accounts. Refer to the Quarterly Distributed Offsetting Receipts by Department Reports published by FMS at www.fms.treas.gov/mts/receipts-by-dept.
- 5/ This line corresponds with SF133/P&F line 1020. However, budgetary and financial statement requirements for reporting adjustments differs from one another. For budgetary reporting, materiality thresholds do not apply, whereas for financial statement reporting, materiality thresholds do apply. Therefore the balance of this line will not always tie with the balance of SF133/P&F line 1020.
- 6/ This line corresponds with SF133/P&F line 3016. However, budgetary and financial statement requirements for reporting adjustments differs from one another. For budgetary reporting, materiality thresholds do not apply, whereas for financial statement reporting, materiality thresholds do apply. Therefore the balance of this line will not always tie with the balance of SF133/P&F line 3016.

SECTION V

Footnotes and Additional Information:

Comment: If collecting entities recognize virtually no cost in connection with earning revenue, that revenue is reported on the Statement of Custodial Activity. (See amendments to OMB Circular No. A-136 "Financial Reporting Requirements," and " FASAB SFFAS No. 7 "Accounting for Revenue and Other Financing Sources," paragraph 45). If collecting entities have custodial collections that are nonmaterial and incidental to their primary mission, then sources and disposition of the collections may be disclosed in accompanying footnotes. (See amendments to OMB Circular No. A-136.)

Footnotes:

1/ Use USSGL account attribute domains as provided in USSGL Section IV, page 4.

2/ Interest revenue not related to the cost incurred by the collecting entity should be reported on the SCA. See SFFAS 7, paragraph 281.

3/ (Increase)/Decrease

4/ Related to other revenue.

5/ Related to tax revenue refunded and custodial interest expense

6/ Related to tax revenue refunds.

7/ If the balance of USSGL account 5990 is used to get the amount of cash collected for others, then USSGL account 2980 should not be used. USSGL account 2980 is included on the crosswalk as an alternative to using USSGL account 5990.

8/ Cash collections only - from debits to 2980.

9/ By definition, the USSGL account can only have this USSGL account attribute domain.

10/ Amount yet to be collected.

11/ Must equal zero.

12/ This account is available for MMS for recording royalty credit. All other agencies need Treasury approval to use this account on this statement.
