Navy Cash

Introduction and Orientation

Overview

- Navy Cash™ is one of the Navy initiatives to better quality of life afloat.
- Handouts discuss the Navy Cash™ system in more detail.

Features & Benefits

- Eliminates coin, currency, checks, and money orders. All money is carried on the card.
- The cashless environment reduces workload on the Disbursing Office and other retail environments.
- Automates many financial processes on board ship.

So What Does This Really Mean?

- No more Split Pay
- Faster and more secure than carrying cash
- Access your accounts 24/7
- Your money earns interest while in the account

Where Do You Use The Card?

- Buying sodas and candy bars from vending machines on board ship.
- Paying for meals at Ship's Mess.
- Paying for stamps at the Post Office
- Paying for services at MWR.
- Borrowing \$10 from your buddy - do a card-to-card transfer

Navy Cash™ Cards

- Two types: Permanent and Temporary
 - Permanent: assigned to crewmembers; have a magnetic strip on the back; may be used on board and at ATMs worldwide
 - Temporary: assigned to visitors or crewmembers who have lost/damaged their Cards; have no magnetic strip; may only be used on board

Navy Cash™ Interfaces

- **Cashless ATM**
- Located near ATM locations aboard
- Enter card in bill slot and type in your PIN
- Follow directions onscreen for:
 - Fund transfers
 - PIN changes

Navy Cash™ Interfaces, Con't.

- **Retail Operations Management Registers**
- Work with POS Devices
- Located at merchant locations (Ship's Mess, etc.) aboard
- Like paying for something at a grocery store with a debit card

How Navy Cash™ Works

- Load value on to the card - transfer money at the cashless ATM from your account to the chip on your Card, like adding minutes onto a phone card.
- Transfer up to \$350 onto the card.
- Pay for your meals, sodas, etc.
- When you're running low again, transfer available funds from your account to your Card.

Security Features

- Your card will be blocked if you incorrectly enter your PIN 3 times at the cashless ATM
- Chip only holds up to \$350
- Your PIN is required for purchases totaling \$25 – when you hit that limit, you must re-enter your PIN to re-initialize your Card

Security Features, Con't.

- Best security feature on your Card is the PIN

DO NOT SHARE YOUR PIN WITH ANYONE

Even Disbursing Officers will not ask you for your PIN number
