Navy Cash[®] Flash 07-004

4 June 2007

Purpose: To Provide ACL Settings for Navy Cash

Discussion: Situations can occur which require the Navy Cash Access Control List (ACL) entries within the ship's router to be reinstated. This includes a power failure to the router, a change in Internet Protocol Address (IP Address) for Navy Cash, etc. If you are unable to send or receive your roundtrips, and the communications test fails from the server, ask your IT personnel to review your Navy Cash ACL statements/entries within the ship's router. Do not ask if they have recently changed, but request the ACL entries be compared to the configuration below:

```
access-list 110 permit tcp host <navy-cash node #1 IP> any eq 20
access-list 110 permit tcp host <navy-cash node #1 IP> any eq 21
access-list 110 permit tcp host <navy-cash node #2 IP> any eq 20
access-list 110 permit tcp host <navy-cash node #2 IP> any eq 21
access-list 110 permit tcp host <navy-cash node #1 IP> any eq 80
access-list 110 permit tcp host <navy-cash node #2 IP> any eq 80
access-list 110 permit tcp host <navy-cash node #1 IP> any gt 1023
access-list 110 permit tcp host <navy-cash node #2 IP> any gt 1023
```

When you apply the statements, be sure that they do not get placed below any deny statements.

Should inbound ACL settings be established, you must include Navy Cash or it will prevent the communication flow. Contact the Customer Service Center and request assistance.

Keep this flash readily available as checking the ACL settings is one of the first avenues of trouble shooting after a failed COMMs test.
