Payment Application Modernization	Version: 7.0.1
Output File Specification – Notification File to Agencies	Date: March 12, 2014

# 1 Summary –Output File Specification – Agency Notification (Connect:Direct)

The Agency Notification File is created by PAM based on validation of the Payment Request Foundation (PRF) it receives. It is then sent to the Agency that submitted the PRF. Agencies will receive one notification for each PRF that is submitted to the PAM system. The file will contain information about each file received. This notification is based on the legacy daily ACH notification.

## 1.1 File and Record Constraints

File Character Encoding	Text
Maximum data records per file	n/a
Record Type	Fixed Block
Record Size	Each line of text is 132
Data Record Sequence within File	Print Record
Retention	TBD

## 1.2 File Naming Rules

File naming is based on the Notification Configuration scripts from UC 2004.

## 1.3 File Structure Rules

This is a printable file format that agencies can either send to a printer or load to their system. The structure is based on the printable format by line of print. Each page can contain 55 lines of information counting the header and total lines.

Line 1: This is the report header and should be repeated each time a new page is started

Line 2: This is the line that carries the method of payment and should be repeated each time a new method of payment is being reported

Line 3: This is the Data Set Name information and should be repeated each time a new file is being reported

Line 4 and 5: These are the column header lines and should be repeated each time a new page is started

Line 6: This is the data from the schedules in a file. There can be one – many. When there is more than one schedule in the file and for the method of payment, the data should be sorted in the ascending order of the schedule number (alpha numeric sort).

Payment Automation Manager	Version: 7.1.0
Outgoing File Specifications – Agency Notification (Connect:Direct)	Date: September 22, 2014

Total Line 1: This is the PAM accumulated totals from the file (what was read) and should be repeated each time a new file is being reported

Total Line 2: This is the accumulated totals from the schedule totals as submitted (what was reported) and should be repeated each time a new file is being reported

Total Line 3: This is the validation status of the file and should be repeated each time a new file is being reported.

Invalid Line 1: This is the number of invalids per file. Should be repeated for each invalid type.

Payment Screening Line 1: This is a blank line.

Payment Screening Line 2: This is a blank line.

Payment Screening Line 3: This is the payment screening header.

Payment Screening Line 4: This is payment screening detail. The detail varies based on conditions, and may span multiple lines. See Table 1 – Payment Screening Text Derivation Rules for possible conditions and associated detail to populate in these lines.

## 1.4 Content Rules

**Field Name:** If the field name is greater than 35 characters, truncate the field name to 32 characters and add “...” at the end. (Ex: Field name “Indefinite Delivery Vehicle Procurement Instrument Identifier” will be reported as “Indefinite Delivery Vehicle proc...”)

## 1.5 Specification Notes

Field #s are purely for referential and discussion purposes; they are not part of the file’s data. They are unique only within each record specification.

- ◆ **Bold text** indicates actual values to add to an output file.
- ◆ “b” = blank space character
- ◆ Example values are in normal text.
- ◆ **ZZZ,ZZZ,ZZ9 – Z** indicates that the leading zeros and commas are blank space characters. 9 indicates that zeros are printed. Example 000,001,234 would be 1,234 and 000,000,000 would be 0.
- ◆ **For this specification: The Items and Amount columns are Right justified, blank filled.**
- ◆ **\$Z,ZZZ,ZZZ,ZZZ.99** – same as above with the dollar sign in position right before the first number. Example \$0,000,001,234.00 would be \$1,234.00 and \$0,000,000,000.00 would be \$.00.

The outgoing file is comprised of text characters that are either alphabetic or numeric. Field types are as follows:

- ◆ A = alphabetic; A-Z, a-z; special characters
- ◆ N = numeric; 0-9
- ◆ AN = alphabetic and numeric characters including special characters

Payment Application Modernization	Version: 7.0.1
Output File Specification – Notification File to Agencies	Date: March 12, 2014

## 2 File Record Specifications

### 2.1 Print Record

Print Record						
Field #	Field Name	Length	Position	Type	Field Value	Notes
Line 1 Repeat this line if the report goes over multiple pages						
1	Filler	1	1	AN	␣	
2	Date Title	10	2-11	AN	<b>RUN DATE =</b>	
3	Filler	4	12-15	AN	␣	
4	Program Run Date	10	16-25	AN	mm/dd/ccyy	
5	Filler	30	26-55	AN	␣	
6	Report Title	21	56-76	AN	<b>PAM VALIDATION REPORT</b>	Constant
7	Filler	24	77-100	AN	␣	
8	Time Title	10	101-110	AN	<b>RUN TIME =</b>	
9	Filler	1	111	AN	␣	
10	Program Run Time	5	112-116	N	hh:mm	
11	Filler	8	117-124	AN	␣	
12	Page	4	125-128	AN	<b>PAGE</b>	
13	Filler	1	129	AN	␣	
14	Report Page Number	3	130-132	N	nnn	Start with 001, with each notification.
Line 2 This line repeats when the method of payment changes						
15	Filler	62	1-62	AN	␣	

Payment Automation Manager	Version: 7.1.0
Outgoing File Specifications – Agency Notification (Connect:Direct)	Date: September 22, 2014

Print Record						
Field #	Field Name	Length	Position	Type	Field Value	Notes
16	Method of Payment	5	63-67	AN		
17	Filler	65	68-132	AN	␣	
Line 3 This line repeats for every file that is received for a PRF						
18	Filler	2	1-2	AN	␣	
19	DSN Title	16	3-18	AN	<b>AGENCY FILE DSN:</b>	Constant
20	Filler	1	19	AN	␣	
21	Input File Name	44	20-63	AN		FROXr.agency.type.* (r=RFC; type=EFT)
22	Filler	2	64-65	AN	␣

## Payment Screening Text Derivation Rules

The following table defines the derivation rules for the Payment Screening Text lines. Record the derived value in the Payment Screening Text common data element. Only one of the conditions may be met per notification.

Table 1 – Payment Screening Text Derivation Rules

Condition	Payment Screening Text
DNP returned screening results	Use value populated in the AgencyReport element returned in the <i>Input File Specifications - DNP Screening Results</i> . Line formatting will be included in the AgencyReport element.
DNP was bypassed manually or globally. or PRF is Type A	THIS FILE BYPASSED DNP
DNP Did not return screening results within the SLA window (timer expired)	THIS FILE WAS NOT PROCESSED BY DO NOT PAY IN TIME TO STOP PAYMENTS
PRF processing status is <i>Screening Suspended</i>	PAYMENT PROCESSING SUSPENDED – A SECOND NOTIFICATION WILL BE SENT WHEN PROCESSING RESUMES
PAM is configured to bypass DNP or not to include DNP results.	No text regarding payment screening should be populated.
