# Background

---

# What is the FIR?

---

- Application that integrates federal financial information to authorized users in a single location
- The FIR supports transparency and accountability and promotes operational efficiency by providing secure access to the following data
  - Debt Management
  - Payments
  - Collections
  - Accounting
- Information is provided through interactive reports, dashboards, and visualizations that will expand over time

# Why use the FIR?

---

The FIR connects pieces of an agency's financial puzzle

# Engaging Users

# What drives the FIR?

---

# What are users saying?

---

- Great for a quick answer  
-Treasury User

- “I got an executive level request for TROR data today (due immediately) and was able to use the FIR to quickly collect the required information, saving me lots of time. I used the analytics portion and was very happy with it!”  
-VA User
- Drill down functionality is very interesting and would help her gain better insights to FSA information  
-Dept. of Ed User
