Install OTCnet Offline Check Capture Software

To install the OTCnet Offline Check Capture software, complete the following steps:

1. Locate the folder on the workstation where the OTCnet Offline zip file resides, e.g., your Downloads folder. Double select the zip file. Double-click the EXE file. The *Welcome to OTCnet Offline QA Setup program* dialog box appears.

Figure 1. Destination Location Dialog Box

Application Tips

- To install the software to another folder destination, select **Browse** to select a different folder.
- Select **Back** to go back.
- Select Cancel to exit the setup.
- 3. Select **Next**. The *Start Installation* dialog box appears.
- 4. Select **Next**. The Server Port Settings dialog box appears.
- 5. Select Next. The Installing dialog box appears. Wait a moment while the files install.

Application Tips

- The Server Port Settings are pre-populated with the default values.
- If your location has specific Server Port Settings, enter the Server Start Port, Server Stop Port details, Server HTTPS Port, and Server Monitor Port details.
- 6. The message "OTCnet Offline X.X.X has been successfully installed" appears. Select **Finish**. The OTCnet Offline icon appears on your desktop.

Application Tip

- The Offline Installer verifies that Java is installed on the workstation.
- If Java is not installed, you will receive a "Java must be installed for the Offline to function. The JAVA_HOME environment variable must also be set pointing to the main Java installation folder" message as shown in Figure 2. A Windows Administrator must install Java.
